## Low Noise Silicon Bipolar RF Transistor

- For high gain and low noise amplifiers
- Minimum noise figure $N F_{\text {min }}=1.1 \mathrm{~dB}$ at 1.8 GHz

Outstanding $G_{\mathrm{ms}}=21 \mathrm{~dB}$ at 1.8 GHz

- For oscillators up to 10 GHz
- Transition frequency $f_{T}=25 \mathrm{GHz}$

- Pb-free (RoHS compliant) and halogen-free package with visible leads
- Qualification report according to AEC-Q101 available

ESD (Electrostatic discharge) sensitive device, observe handling precaution!

| Type | Marking | Pin Configuration |  |  |  |  |  | Package |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| BFP420 | AMs | $1=\mathrm{B}$ | $2=\mathrm{E}$ | $3=\mathrm{C}$ | $4=\mathrm{E}$ | - | - | SOT343 |

Maximum Ratings at $T_{\mathrm{A}}=25^{\circ} \mathrm{C}$, unless otherwise specified

| Parameter | Symbol | Value | Unit |
| :--- | :--- | :---: | :--- |
| Collector-emitter voltage | $V_{\mathrm{CEO}}$ |  | V |
| $T_{\mathrm{A}}=25^{\circ} \mathrm{C}$ |  | 4.5 |  |
| $T_{\mathrm{A}}=-55^{\circ} \mathrm{C}$ |  | 4.1 |  |
| Collector-emitter voltage | $V_{\mathrm{CES}}$ | 15 |  |
| Collector-base voltage | $V_{\mathrm{CBO}}$ | 15 |  |
| Emitter-base voltage | $V_{\mathrm{EBO}}$ | 1.5 |  |
| Collector current | $I_{\mathrm{C}}$ | 60 | mA |
| Base current | $I_{\mathrm{B}}$ | 9 |  |
| Total power dissipation ${ }^{1)}$ | $P_{\text {tot }}$ | 210 | mW |
| $T_{\mathrm{S}} \leq 98^{\circ} \mathrm{C}$ |  |  |  |
| Junction temperature | $T_{\mathrm{J}}$ | 150 | ${ }^{\circ} \mathrm{C}$ |
| Storage temperature | $T_{\text {Sta }}$ | $-55 \ldots 150$ |  |

${ }^{1} T_{\mathrm{S}}$ is measured on the emitter lead at the soldering point to the pcb

## Thermal Resistance

| Parameter | Symbol | Value | Unit |
| :--- | :--- | :---: | :--- |
| Junction - soldering point ${ }^{1}$ ) | $R_{\text {thJS }}$ | 250 | K/W |
| $1 \quad 2013-09-19$ |  |  |  |

Electrical Characteristics at $T_{\mathrm{A}}=25^{\circ} \mathrm{C}$, unless otherwise specified

| Parameter | Symbol | Values |  |  | Unit |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  |  | min. | typ. | max. |  |

Source impedance for min.
noise figure vs. frequency

$$
V_{\mathrm{CE}}=2 \mathrm{~V}, I_{\mathrm{C}}=5 \mathrm{~mA} / 20 \mathrm{~mA}
$$

## SPICE GP ModeI

For the SPICE Gummel Poon (GP) model as well as for the S-parameters (including noise parameters) please refer to our internet website www.infineon.com/rf.models.
Please consult our website and download the latest versions before actually starting your design. You find the BFP420 SPICE GP model in the internet in MWO- and ADS-format, which you can import into these circuit simulation tools very quickly and conveniently. The model already contains the package parasitics and is ready to use for DC and high frequency simulations. The terminals of the model circuit correspond to the pin configuration of the device. The model parameters have been extracted and verified up to 10 GHz using typical devices. The BFP420 SPICE GP model reflects the typical DC- and RF-performance within the limitations which are given by the SPICE GP model itself. Besides the DC characteristics all S-parameters in magnitude and phase, as well as noise figure (including optimum source impedance, equivalent noise resistance and flicker noise) and intermodulation have been extracted.

The information herein is given to describe certain components and shall not be considered as a guarantee of characteristics.
Terms of delivery and rights to technical change reserved.
We hereby disclaim any and all warranties, including but not limited to warranties of non-infringement, regarding circuits, descriptions and charts stated herein.

## Information

For further information on technology, delivery terms and conditions and prices please contact your nearest Infineon Technologies Office (www.infineon.com).

## Warnings

Due to technical requirements components may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies Office.
Infineon Technologies Components may only be used in life-support devices or systems with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support device or system, or to affect the safety or effectiveness of that device or system.
Life support devices or systems are intended to be implanted in the human body, or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.
