## BGS14MA11

## MIPI 2.0 SP4T switch for LTE diversity, Tx and LAA applications

## Key Features

- 0.1 to 6.0 GHz coverage for LTE and LAA application
- LTE TX power handling capabilities
- Ultra low insertion loss: 0.3 dB for band 41 and 0.85 dB for LTE U/ LAA
- Small form factor $1.15 \mathrm{~mm} \times 1.55 \mathrm{~mm}$
- Fully compatible with MIPI 2.0 RFFE standard
- Select pin for USID allows two devices per MIPI RFFE bus
- No decoupling capacitors required (Unless DC applied on RF lines)

## Applications

The SP4T switch is a band selection switch for LTE applications. With LTE TX power handling capability it's suitable for both LTE diversity path and LTE uplink Tx applications. The switch covers up to 6 GHz so it supports Band 42 , Band 43 and also LAA.

## Product Validation

Qualified for industrial applications according to the relevant tests of JEDEC47/20/22.

## Features

## 1 Features

- Ultra low insertion loss 0.3 dB for band 41 and 0.85 dB for LTE U/ LAA
- LTE TX Power Handling Capabilities
- 0.1 to 6.0 GHz coverage for LTE and LAA application
- Low harmonic generation
- High port-to-port-isolation
- Suitable for C2K / LTE / WCDMA Applications
- On chip control logic including ESD protection
- Fully compatible with MIPI 2.0 RFFE standard

- Software programmable MIPI RFFE USID
- USID swap feature
- Small form factor $1.15 \mathrm{~mm} \times 1.55 \mathrm{~mm}$
- No power supply blocking required
- Select pin for USID allows two devices per MIPI RFFE bus
- No decoupling capacitors required (Unless DC applied on RF lines)
- High EMI robustness
- RoHS and WEEE compliant package

## Description

This SP4T RF switch is a perfect solution for multimode handsets based on LTE and WCDMA. It is based on Infineon's proprietary technology and has excellent RF performance. The ultra-low insertion loss helps customers to achieve high system sensitivity, the coverage of LTE Tx power and 6GHz enables very broad application. It features DC-free RF ports, external DC blocking capacitors at the RF ports are only required if DC voltage is applied externally. Its on chip MIPI RFFE 2.0 controller is fully compatible with industry standard, with external USID_SEL pin it can support two devices per MIPI RFFE bus.

MIPI 2.0 SP4T switch for LTE diversity, Tx and LAA applications

## Maximum Ratings

## 2 Maximum Ratings

Table 1: Maximum Ratings, Table I at $T_{A}=25^{\circ} \mathrm{C}$, unless otherwise specified

| Parameter | Symbol | Values |  |  | Unit | Note / Test Condition |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Min. | Typ. | Max. |  |  |
| Frequency Range | $f$ | 0.1 | - | 6.0 | GHz | 1) |
| Supply voltage ${ }^{2)}$ | $V_{D D}$ | -0.5 | - | 3.6 | V | - |
| Storage temperature range | $T_{\text {STG }}$ | -55 | - | 150 | ${ }^{\circ} \mathrm{C}$ | - |
| RF input power at all TRx ports | $P_{\text {RF_max }}$ | - | - | 35 | dBm | short momentary / $50 \Omega$ |
| ESD capability, CDM ${ }^{3)}$ | $V_{\text {ESD }{ }_{\text {com }}}$ | -500 | - | +500 | V |  |
| ESD capability, HBM ${ }^{4)}$ | $V_{\text {ESD }}{ }^{\text {HвM }}$ | -1 | - | +1 | kV |  |
| ESD capability, system level (RF port) ${ }^{5}$ | $V_{\text {ESD }}{ }_{\text {ANT }}$ | -8 | - | +8 | kV | ANT vs system GND, with 27 nH shunt inductor |
| Junction temperature | $T_{j}$ | - | - | 125 | ${ }^{\circ} \mathrm{C}$ | - |

${ }^{1)}$ Switch has a low-pass response. For higher frequencies, losses have to be considered for their impact on thermal heating. The DC voltage at RF ports $V_{R F D C}$ has to be 0 V .
${ }^{2)}$ Note: Consider potential ripple voltages on top of $V_{D D}$. Including RF ripple, $V_{D D}$ must not exceed the maximum ratings: $V_{D D}=V_{D C}+V_{\text {Ripple }}$.
${ }^{3)}$ Field-Induced Charged-Device Model ANSI/ESDA/JEDEC JS-002. Simulates charging/discharging events that occur in production equipment and processes. Potential for CDM ESD events occurs whenever there is metal-to-metal contact in manufacturing.
4) Human Body Model ANSI/ESDA/JEDEC JS-001 ( $R=1,5 \mathrm{k} \Omega, C=100 \mathrm{pF}$ ).
${ }^{5)}$ IEC 61000-4-2 $(R=330 \Omega, C=150 \mathrm{pF})$, contact discharge.
Warning: Stresses above the max. values listed here may cause permanent damage to the device. Exposure to absolute maximum rating conditions for extended periods may affect device reliability. Maximum ratings are absolute ratings; exceeding only one of these values may cause irreversible damage to the integrated circuit.

MIPI RFFE Specification

## 5 MIPI RFFE Specification

All sequences are implemented according to the 'MIPI Alliance Specification for RF Front-End Control Interface' document version 2.0-25. September 2014.

Table 9: MIPI Features

| Feature | Supported | Comment |
| :--- | :--- | :--- |
| MIPI RFFE 1.10 and 2.0 standards | Yes |  |
| Register 0 write command sequence | Yes |  |
| Register read and write command sequence | Yes |  |
| Extended register read and write command se- <br> quence | Yes |  |
| Support for standard frequency range operations <br> for SCLK | Yes | Up to 26 MHz for read and write |
| Support for extended frequency range operations <br> for SCLK | Yes | Up to 52 MHz for write ${ }^{1)}$ |
| Half speed read | Yes |  |
| Full speed read | Yes |  |
| Full speed write | Yes |  |
| Programmable Group SID | Yes |  |
| Trigger functionality | Yes |  |
| Broadcast / GSID write to PM TRIG register | Yes | Via VIO, PM TRIG or software register ${ }^{1)}$ |
| Reset | Yes |  |
| Status / error sum register | Yes |  |
| Extended product ID register | Yes |  |
| Revision ID register | Yes | External pin to provide 2 USIDs. See Tab. 10 |
| Group SID register |  |  |
| USID select pin |  |  |

## IMPORTANT NOTICE

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics ("Beschaffenheitsgarantie"). With respect to any examples, hints or any typical values stated herein and/or any information regarding the application of the product, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation warranties of non-infringement of intellectual property rights of any third party. In addition, any information given in this document is subject to customer's compliance with its obligations stated in this document and any applicable legal requirements, norms and standards concerning customer's products and any use of the product of Infineon Technologies in customer's applications. The data contained in this document is exclusively intended for technically trained staff. It is the responsibility of customer's technical departments to evaluate the suitability of the product for the intended application and the completeness of the product information given in this document with respect to such application.

For further information on technology, delivery terms and conditions and prices, please contact the nearest Infineon Technologies Office (www.infineon.com).

## WARNINGS

Due to technical requirements products may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies office.

Except as otherwise explicitly approved by Infineon Technologies in a written document signed by authorized representatives of Infineon Technologies, Infineon Technologies products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.
