WISE-GRIP® Reduced Hand Span Locking Pliers

THE HISTORY OF IRWIN TOOLS

IRWIN Tools has a long and storied history, stretching for more than a century and set against the backdrop of a young, ambitious nation. In 1885, Charles Irwin patented the Auger bit and, along with four business partners, formed the IRWIN Auger Bit Company. In 1924, William Petersen, a Danish immigrant, invented and patented VISE-GRIP® Locking Pliers. Through innovation and a series of acquisitions, these two companies have now become IRWIN Tools.

IRWIN Tools manufactures and distributes a broad line of hand tools and power tool accessories including JACK® handsaws, RECORD® clamping and locking tools, VISE-GRIP® pliers and wrenches, JORAN® drill bits, QUICK-GRIP® clamping tools, MARPLES® chisels and woodworking tools, and UNIBIT® drill bits.

IRWIN® innovation

Innovation is the hallmark of IRWIN®. For more than 100 years, it's been an idea that has permeated the culture of our company, and it continues to drive everything we do. Beginning in 1885 with development of the first IRWIN® auger bit, and progressing with the introduction of Vise-Grip® locking tools, Blue Groove flat bits, and Quick-Grip® bar clamps, IRWIN® has been at the forefront of the industry, creating better tools in a better way. Our impressive track record of new product development is born from our passion for understanding the needs of our primary user – the professional tradesman. This dedication to improving products begins in the field, where IRWIN®'s specialised end-user teams visit construction sites. There, the IRWIN® Field Product Specialist team learns first-hand – from the professional – how to improve our products, and how to make the pro's job easier and more productive. This hard-earned knowledge is the foundation for a unique product development process utilised by IRWIN®'s engineering, marketing, and manufacturing teams to deliver a continuous stream of new products to the marketplace. Supported by a global network of world-class manufacturing facilities and bolstered by our partnerships with leading global retailers, IRWIN® continuously sets the professional standard in each and every market segment in which we compete. From product feedback and development to distribution and use in the field, we dedicate ourselves to delivering quality tools that meet the stringent requirements of our toughest critics – professional tradesmen.

IRWIN® DESIGN CENTRES

IRWIN® has been delivering high-quality and innovative products for over a century. The experience and knowledge to design and build the IRWIN® products with rigorous testing and quality control are fundamental parts in our ability to offer the best products. Our testing centre facilities across the globe ensure exactly that. The centres below use the very latest technology and testing methods within their specific areas of expertise.

WISE-GRIP®

The Vise-Grip® Locking Tool was invented in 1924 by a blacksmith in a small town of DeWitt, Nebraska. William Petersen was a Danish immigrant who invented the first locking pliers in his blacksmith shop, and began selling them from the back of his car to farmers and people in surrounding towns. He patented his new idea and called it VISE-GRIP®.

Since then, VISE-GRIP® has gained global brand recognition as the first choice for locking pliers. Innovation and quality are the core values of the VISE-GRIP® brand. With proven performance in every turn, these are the tools that tradespeople choose first – and pass on to the next generation.

The IRWIN® VISE-GRIP® family offers a full line of locking pliers, water pump pliers, cutting and VDE Pliers. IRWIN® VISE-GRIP® pliers and wrenches continue to set the standard for dependability, quality, and innovation today and tomorrow. Wherever there's a need for a quality tool, IRWIN® VISE-GRIP® is on the job.

Record®

Originally established in 1898 in the South Yorkshire city of Sheffield in the UK, the Record Tools Factory was swiftly able to make a long lasting contribution to the worldwide reputation of the region for the manufacture of high quality steel and castings.

The Record® brand name was introduced in 1909 and by the 1920's the product range had expanded into vices, planes, clamps and pipe wrenches enabling the business to grow rapidly in the UK and many overseas markets.

Today, IRWIN® Record® continues excelling by sticking to the traditional values set by its founders, producing tools that are highly valued amongst professional users for quality and durability that remains strong today.

LOCKING PLIERS

NEW

The Original

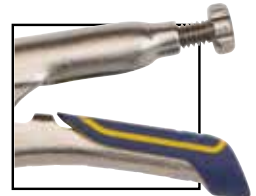

Since 1924™

IRWIN® VISE-GRIP® Original locking tools, with a classic guarded trigger release, are designed to provide maximum locking force.

Fast Release

IRWIN® VISE-GRIP® Fast Release locking pliers have a one-handed, triggerless release, so they're twice as easy to open as the traditional design. No pinch points.

BEST IN CLASS STRENGTH

20% REDUCED HAND SPAN.*
STOP THE STRAIN,
FORGET THE FATIGUE.

BUILT STRONG TO LAST LONG

PATENTED REDUCED HAND SPAN DESIGN*

HEX KEY ADJUSTING SCREW

ONE-HANDED, TRIGGERLESS RELEASE**

T11T

- BEST IN CLASS STRENGTH**
Holds up under the most extreme conditions.
- PATENTED REDUCED HAND SPAN DESIGN***
The opening of the new locking pliers handles is reduced by 20%.
- ONE-HANDED, TRIGGERLESS RELEASE****
Makes it twice as easy to open than traditional design with no pinch points.

- HEX KEY ADJUSTING SCREW**
Tightens to draw material closer together for tighter grip. Loosens to provide controlled release.
- BUILT STRONG TO LAST LONG**
High grade alloy steel is heat treated for maximum toughness and durability and provides longer life compared to other locking tools.
- RECESSED TEXTURE IN STEEL**
For secure hold in hands.

3X GRIPPING POWER***

CURVED JAW LOCKING PLIERS

Self-energising lower jaw provides three times more gripping power, with no slipping or stripping on any style nut or bolt head.

	T18DR	18DR 18"/ 455mm	18"/ 455mm	7-1/2" / 190 mm	LOCKING C-CLAMPS - DEEP THROAT These clamps have extra throat width and depth for greater clamping reach. These features allow for many clamping applications in welding, automotive and steel framing.	Fabricating Welding Construction
	23	8R 8"/ 200mm	8"/ 200mm	3-1/8" / 78 mm	LOCKING SHEET METAL TOOL The Locking Sheet Metal tool locks on to work with a powerful grip. The tool makes all kinds of bending, forming and crimping jobs easier and faster.	Bending Crimping Forming
	25ZR	9R 8"/ 225mm	9"/ 225mm	2-3/4" / 70 mm	LOCKING WELDING CLAMP The Locking Welding Clamp has deep-throated and U-shaped jaws for visibility and working space. It holds work in proper alignment and is ideal for sheet metal work on automobiles.	Welding Holding
	27ZR	20R 9"/ 225mm	9"/ 225mm	18" / 455 mm	LOCKING CHAIN CLAMP The Locking Chain Clamp holds and locks around any shape or any size of object and adjusts quickly for ratchet action in either direction. Extension chain is available.	Holding
	29	RR 7"/ 175mm	7"/ 175mm	1/4" / 6 mm	LOCKING PINCH-OFF TOOL The Locking Pinch-Off tool with round jaws pinches and locks on tubing instantly without damaging the tubing. It is perfect to use for plumbing work, as it stops flow from untidy tubes. Very popular in the refrigeration market.	Holding
	251	9AC Locking Panel Clamp	9"/ 225mm	2-3/4" / 70 mm	LOCKING PANEL CLAMP The jaws for the Locking Panel Clamp are designed to move in a straight line motion which allows the handle to be out of the way. Auto-body panels can be clamped in place and the door shut to check for gaps before final welding.	Clamping Welding
	8	4LW 4"/ 100mm	4"/ 100mm	7 mm - 14 mm	LOCKING WRENCH The jaws of the Locking Wrench lock on three sides of a bolt and will not slip or mark. The Locking Wrench is adjustable to over 16 wrench sizes and features a built-in wire cutter.	Pulling Tightening
	4	7LW 7"/ 175mm	7"/ 175mm	11 mm - 19 mm		
	2	10LW 10"/ 250mm	10"/ 250mm	16 mm - 28 mm		
	12L3	12LC 12"/ 300mm	12"/ 300mm	3-1/8" / 79 mm	LARGE JAW LOCKING PLIER The large jaws and clamping ability make this tool ideal for plumbers, mechanics, welders and others who work with large objects. Also, its convenient size makes it easier to use than bulkier tools, such as pipe wrenches.	Holding Clamping

GROOVELOCK WATER PUMP PLIERS WITH PROTOUCH™ GRIP

ALL-PURPOSE JAW

PRESS-N-SLIDE BUTTON

ANTI-PINCH NON-SLIP PROTOUCH GRIPS

10507627

MULTI-GROOVE RATCHETING SYSTEM

WATER PUMP PLIERS

GrooveLock Pliers are designed with twice the number of groove positions as traditional groove joint pliers to deliver optimal hand and jaw positioning - providing a superior grip. The specially engineered, all-purpose jaw grips round, hex, square and flat surfaces for incredible versatility.

- 1. ALL-PURPOSE JAW**
Grips onto flat, round, hex & square work pieces to provide tremendous bite
- 2. PRESS-N-SLIDE BUTTON**
Adjusts jaws 2X faster than traditional groove joint pliers
- 3. MULTI-GROOVE RATCHETING SYSTEM**
Has twice the groove positions than other groove joint pliers, for precise positioning on any type of work surface
- 4. ANTI-PINCH NON-SLIP PROTOUCH GRIPS**
Provide comfort, control and less hand fatigue

2X FASTER*

▪ SAFELY WORKING WITH ELECTRICAL EQUIPMENT UP TO AC OR CD1500VOLT

Record®

PIPE WRENCHES

IRWIN® Record® offer a full range of plumbing tools designed to get the job done quickly and efficiently. From our solid-forged Stillson Wrenches to the lightweight Quick-Adjusting Wrench, our range of pipe tools offer superior grip due to the unique 'V-shaped' tooth profile.

FORGED HOOK JAW

QUICK-ADJUSTING JAW

CAST ALUMINIUM CONSTRUCTION

IRWIN RECORD® QUICK-ADJUSTING PIPE WRENCH

1. FORGED HOOK JAW

With 2-1/4" (58mm) jaw capacity equivalent to standard 14" (350mm) pipe wrench; ideal for pipe diameters up to 1-1/2" (38mm); ideal for most surfaces including black, galvanized, PVC and copper pipe, as well as nuts, bolts and couplings; broached teeth

2. QUICK-ADJUSTING JAW

With one-handed operation, ratchets quickly to work the surface

3. CAST ALUMINIUM CONSTRUCTION

40% less weight than standard 14" (350mm) cast iron pipe wrench; ergonomic handle is ideal for heavy torque and maximum comfort

3X FASTER*

HANDIWRENCH

Chain pipe wrenches are mainly used in confined spaces, such as against a wall or close to a nest of other piping. Simply loop the chain around the pipe, lock it and the jaws will grip in the direction of the turn. The pipe can then be easily tightened or loosened with short strokes of the handle.

METAL CUTTING

HACKSAW BLADES

BI-METAL HACKSAW BLADES

IRWIN® high-quality hacksaw blades provide improved cutting performance. Their tooth geometry delivers higher resistance against tooth strippage and increases longevity and durability. Leveraging the advantages of WeldTec™ technology, IRWIN® hacksaw blades allow for faster, smoother and less tiring cutting.

1. **WELDTEC TECHNOLOGY**
Innovative tooth geometry withstands wear and keeps the blade sharp for a long time
2. **BI-METAL CONSTRUCTION**
Prevents blades from shattering and delivers long blade life

10504531	Junior Hacksaw Wood Blade 32TPI, 6" / 150mm, 10 pcs.	5706915045314	10	1

HACKSAW FRAMES

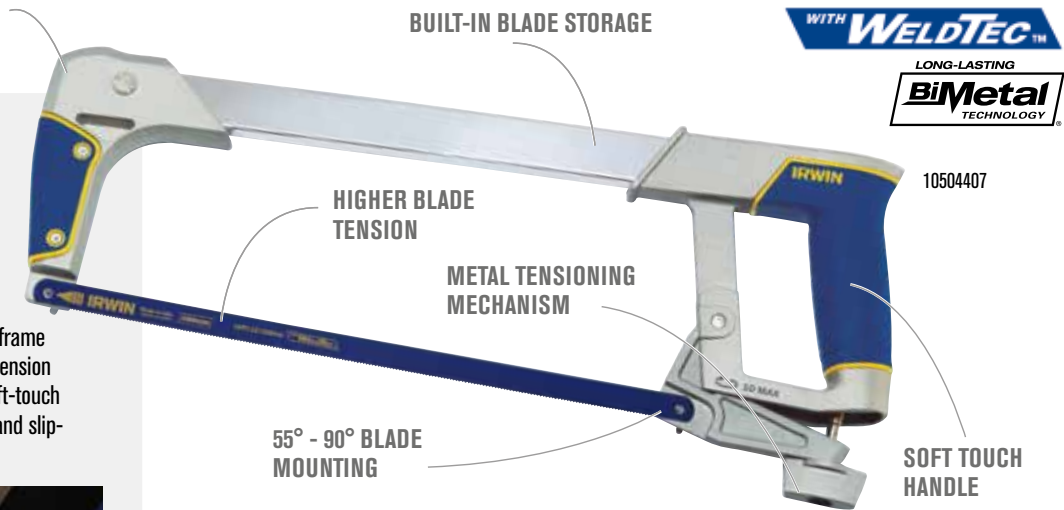

The IRWIN® Hacksaw frames are built to meet the professional's demanding needs. The durable IRWIN® frames make cutting quick and easy.

JAB SAW
OPTION

I - 125 HIGH-TENSION HACKSAW (125kg/25,000 PSI)

The IRWIN® heavy-duty hacksaw frame is able to reach over 125kg blade tension to ensure accurate cutting. The soft-touch handle gives professionals a solid and slip-free grip.

- HIGHER BLADE TENSION**
For straight cuts and prevents blade being released when dropped
- METAL TENSIONING MECHANISM**
For a longer lasting tool
- SOFT TOUCH HANDLE**
Ensure a comfortable sawing grip and prevents slippage
- BUILT-IN BLADE STORAGE**
So spare blades easily accessible
- 55° - 90° BLADE MOUNTING**
For sawing large objects
- JAB SAW OPTION**
For sawing in confined spaces

BOLT CUTTERS

IRWIN® Record® bolt cutters made their debut in 1923. IRWIN® Record® bolt cutters combine specially formulated steel jaws and exacting manufacturing techniques to make a range of cutters that will handle high, low and medium tensile materials of all kinds.

HEAVY-DUTY ARM-ADJUSTED DROP FORGED HANDLES – CENTRE CUT

Designed to withstand the most extreme situations, high-tensile drop-forged and ground steel jaws have also gone through a two-stage heat treatment to significantly increase durability and offer a stable cut capacity. Drop-forged steel handles provide safety and reliability and offer optimal performance for cutting high-tensile material.

TB918H

EACH JAW IS PROGRESSIVELY HEAT TREATED to give a penetrating cutting edge and resilient body
JAWS ARE DROP-FORGED from a specially formulated steel machined to precise specifications
COMPOUND ACTION supplies 80lbs of force for every 1lb applied to the handles
DROP-FORGED steel handles
SAFETY STOPS prevent trapped fingers

GILBOW®

SNIPS AND SHEARS

IRWIN® Gilbow® snips and shears have a cutting capability much greater than the strength of the user. The original tin snips were first designed in 1924 and have dominated the sheet metal cutting industry to such an extent that today, snips and shears are referred to as 'Gilbows'.

GENERAL PURPOSE SNIPS

TG24514

UNIQUE NON-SLIP JOINT set and tested for a perfect cut. This should be re-adjusted only after sharpening
DOUBLE, HOLLOW GROUND BLADES reduce friction for easier cutting
DROP-FORGED carbon tool steel handles and blades
SAFETY STOP prevents trapped fingers

AVIATION AND OFFSET SNIPS

IRWIN® Aviation and Offset Snips have precision formed blades for a longer cutting life; ergonomically designed over-moulded soft-grips for a perfect balance of comfort and performance in the hand, and a long-life torsion spring for a smooth and consistent cut.

SERRATED LOWER BLADE

INCREASED LENGTH OF CUT

IMPROVED BALANCED WEIGHT DISTRIBUTION

AVIATION SNIPS

Serrated blade grips material for a smoother cut on thin material. Ideal for heating, air conditioning, gutter work and general industrial use.

1. SERRATED LOWER BLADE

For firmer action, smoother cut and no double marked edges

2. PROTOUCH™ GRIPS

Moulded for superior comfort and control, resulting in less hand fatigue/stress

3. INCREASED LENGTH OF CUT

For faster work (3.34cm length of cut)

4. IMPROVED BALANCED WEIGHT DISTRIBUTION

For greater comfort

5. DROP-RESISTANT PUSH-UP LATCH

For easy one-handed use that saves time and increases safety

6. CUT CAPACITY OF 1.19 mm

For sheet metal and 0.84mm stainless steel

In 1933, a young man by the name of Hans Schroder set up as a wholesaler in Copenhagen, Denmark. During the first few years he kept his focus on selling general hand tools, but in 1938 he started to also manufacture saws. Amongst his friends and business associates Hans Schroder was known simply as Jack, and before long, the "Jack" name had become synonymous with the production of high quality saws.

IRWIN® Jack® has been at the forefront of many advancements with the development of the market leading Jack® 880 now with upgraded ProTouch™ handle to compliment the recently upgraded universal triple ground tooth technology.

Marples®

At the heart of quality craftsmanship lies the rich heritage of Marples® woodworking tools. Originating in 1828 in Sheffield, England, the Marples® brand has consistently stood for superior performance and ultimate precision in fine woodworking.

Founder William Marples came from a long lineage of master craftsmen in the joinery and edge tool trades, and after serving as an apprentice to his father he established William Marples and Sons Limited. Using only the finest materials Marples® had his name stamped into every product as a sign of his confidence in the quality and craftsmanship of each tool.

PLUS 880 UNIVERSAL HANDSAW

A JACK FOR ALL TRADES

The IRWIN® Jack® PLUS range provides best-in-class handsaws for today's trade professional. With advanced tooth technology and an ergonomic ProTouch™ grip, the PLUS range handsaws are number one for speed and ease and quality of cut. Along with these industry-leading features, the full range utilises a system of colour coded handles for easy selection.

- 1. UNIVERSAL TRIPLE GROUND TEETH**
Patented tooth grind designed to cut 25% faster
Versatile, universal teeth cut most building materials
- 2. STRONG BLADE**
High quality C75 steel is stable and ensures maximum power transfer with every stroke
- 3. PROTOUCH™ GRIP WITH FINGER REST**
With three times more elastomer for maximum soft-feel and control
- 4. OPTIMISED HAND CAPACITY**
Increased space for use with gloves and improved functionality
- 5. INCREASED GRIP CIRCUMFERENCE**
For a sturdy and robust feel
- 6. 90° & 45° ANGLES**
Integrated into handle for easy marking out

EVO HANDSAWS

The unique handle-to-blade relationship of the EVO handsaw overcomes traditional design limitations and maximises how the user interacts with the handsaw. With an innovative tooth design and superior ergonomics, the holistic product design optimises handle position (height and angle) against the tooth line. EVO covers virtually all user needs.

- HIGH ANGLED NOSE** increases blade stability
- HARD POINT TEETH (HP)** stay sharp 6-8 times longer than non-hardened teeth
- OPTIMISED TOOTH DESIGN & SET** provides maximum versatility, Speed of cut & quality of cut
- HIGH QUALITY C75 STEEL BLADE** ensures maximum stability and power transfer
- OPTIMISED PRODUCT DESIGN** for universal usage and highest versatility
- MAXIMUM BLADE USAGE** allows up to 100% blade usage
- FLUSH CUTTING** to cut off at surface level
- COMFORT GRIP** light and strong ultrasonic welded soft-grip handle for maximum grip and comfort
- 90° & 45°** for marking out
- FINGER-REST** for maximum control

PLANES & PLANE CUTTERS

IRWIN® Record® bring decades of experience, well proven design and advanced production techniques to produce this fine range of woodworking planes and cutters.

BENCH PLANES

Smoothing Plane used for smoothing and final finishing. Jack planes are used for the preliminary squaring of rough timber, and are the general workhorses for stock removal. Fore or jointer planes are used for removing the roughness and unevenness on long surfaces prior to smoothing.

1. HIGH-QUALITY

Cast grey iron body with precision machined base

2. RAZOR SHARP

Carbon steel cutting iron

3. ROBUST LEVER CAP

Has three pressure points and brass locking nut for secure location of the cutting iron

4. FINE ADJUSTMENT

Is controlled by a brass adjusting nut and lateral adjusting lever

ITEM NO.	DESCRIPTION	EAN	MASTER PACK	SHELF PACK

QUICK-GRIP®

In 1986 Joe Sorensen, an air boat builder in Nebraska, USA was looking for a better way to hold down his steel panels as the clamps he was using twisted the thin steel as he worked.

With a good idea for a new style of clamping, the concept for a pistol grip one-handed bar clamp was born. This revolutionary tool was quickly patented and brought to market in 1989 with a full line of clamps under the QUICK-GRIP® brand name. The line was later extended from the Original clamp to the Micro, Mini, Handi, Quick-Change, and more recently the XP clamp.

Since the launch, IRWIN® Quick-Grip® has become the world leader in one-handed bar clamps and is the industry standard which has changed the way tradespeople do their jobs, greatly improving their ability and efficiency on the job.

Record®

Originally established in 1898 in the South Yorkshire city of Sheffield in the UK. The Record Tools Factory was swiftly able to make a long lasting contribution to the worldwide reputation of the region for the manufacture of high quality steel and castings.

The Record® brand name was introduced in 1909 and by the 1920's the product range had expanded into Vices, Planes, Clamps and Pipe Wrenches enabling the business to grow rapidly in the UK and many overseas markets.

Today, IRWIN® Record® continues excelling by sticking to the traditional values set by its founders, producing tools that are highly valued amongst professional users for quality and durability that remains strong today.

INTRODUCING THE NEXT GENERATION IN CLAMPING TOOLS

The new IRWIN® QUICK-GRIP® One-Handed Bar Clamp range allows end-users to be even more productive on the job. The new heavy-duty and medium-duty clamps feature a Quick-Change™ button for fast conversion to a spreader and for ease-of-use with a new line of One-Handed Bar Clamp Accessories.

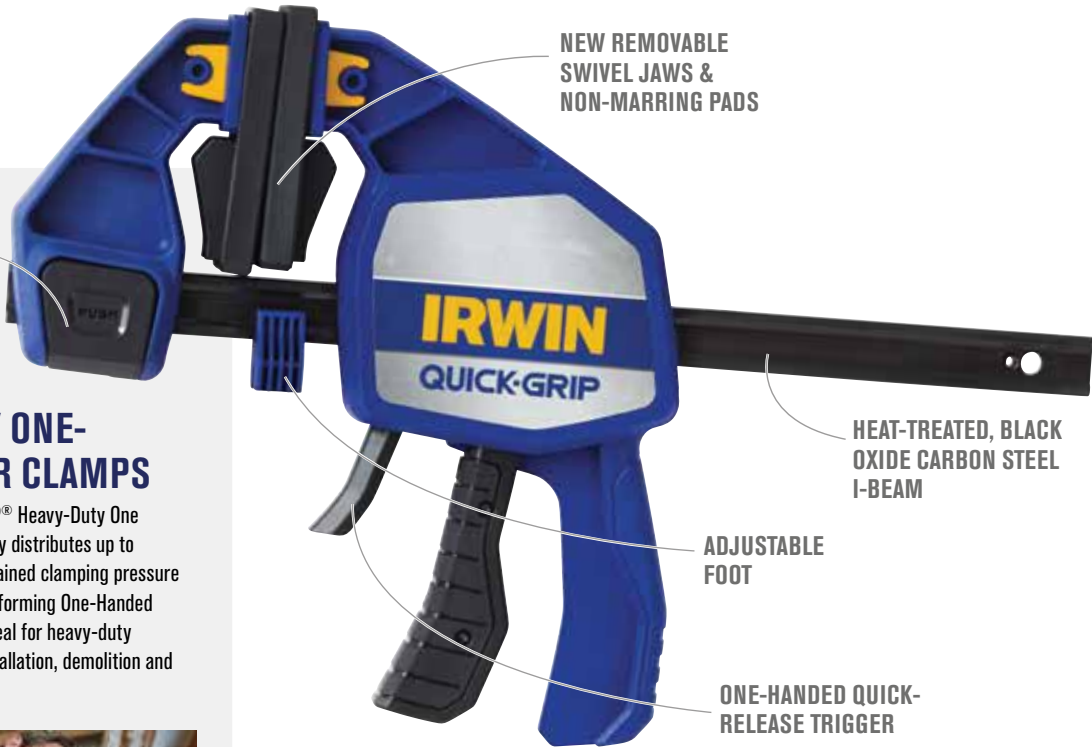

These new IRWIN® QUICK-GRIP® One-Handed Bar Clamp Accessories provide added versatility and functionality to one-handed bar clamps—allowing users to DO MORE WITH QUICK-GRIP™.

NEW QUICK-CHANGE™ BUTTON

HEAVY-DUTY ONE-HANDED BAR CLAMPS

The IRWIN® QUICK-GRIP® Heavy-Duty One Handed Bar Clamp evenly distributes up to 272kg (600 lbs.) of sustained clamping pressure and is one of the top performing One-Handed Bar Clamps available. Ideal for heavy-duty applications such as installation, demolition and rough glue-up.

NEW REMOVABLE SWIVEL JAWS & NON-MARRING PADS

HEAT-TREATED, BLACK OXIDE CARBON STEEL I-BEAM

ADJUSTABLE FOOT

ONE-HANDED QUICK-RELEASE TRIGGER

- 1. NEW QUICK-CHANGE™ BUTTON**
Provides easy removal of jaws for accessory installation or conversion to a spreader
- 2. NEW REMOVABLE SWIVEL JAWS & NON-MARRING PADS**
Full-faced pads deliver even distribution of clamping force
- 3. ONE-HANDED QUICK-RELEASE TRIGGER**
New grip and trigger design provides simple, one-handed operation
- 4. HEAT-TREATED, BLACK OXIDE CARBON STEEL I-BEAM**
Support added pressure with less bend and flex for superior durability
- 5. ADJUSTABLE FOOT**
Provides added support allowing clamp to sit upright on table or work surface

272 kg

Record®

HEAVY-DUTY CLAMPING

IRWIN® Record® range of PRO clamps deliver the right fit, features and pressure for heavy-duty clamping jobs. Professionals will get the clamping performance they need to get the job done right.

IRWIN® RECORD® PRO CLAMP

THERMOPLASTIC ELASTOMERS (TPE) PADS

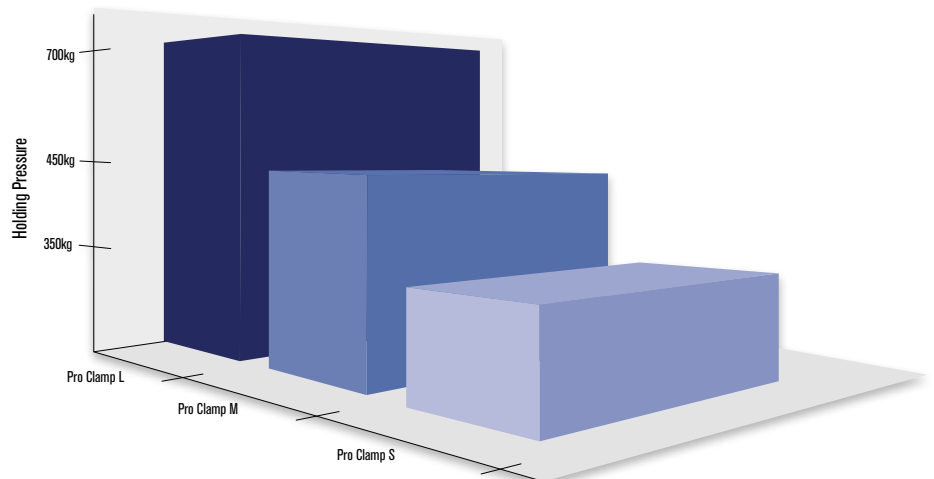

3-COMPONENT HANDLE

ZINC PLATED I-BEAM

ENHANCED PERFORMANCE

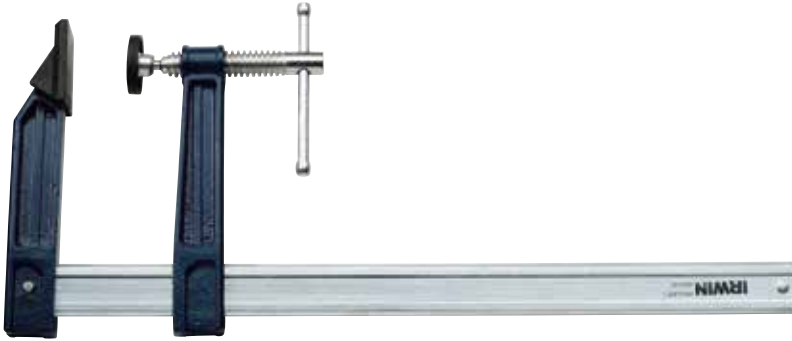

- 1. THERMOPLASTIC ELASTOMERS (TPE) PADS**
Pads snap fit to prevent loss and provide excellent friction to work surface while reducing marking
- 2. 3-COMPONENT HANDLE**
For higher torque transfer than wood, plus added comfort (L range has tommy bar)
- 3. ENHANCED PERFORMANCE**
Updated Rib location improves strength at less weight and allows the clamp to stand horizontally or vertically
- 4. ZINC PLATED I-BEAM**
Provides higher mechanical strength, less torsion and rust prevention

Record®

T-BAR CLAMPS 136 SERIES AND SPARE PARTS

These clamps resist twisting and distortion under clamping pressures. Both the head and slide are guaranteed unbreakable. The slide is secured by a solid steel pin passing through one of the locating holes spaced along the steel bar. The steel mainscrew applies pressure quickly and smoothly through a fast acting, hard wearing rolled thread. Slides and heads are flat bottomed so that the clamp will stand without support.

1000 kg

CLAMP HEADS

Low cost alternative to full size bar clamps, the grey cast iron head and slide with steel mainscrew can be fitted to a wooden batten 25mm (1") thick by 38mm (1-1/2") wide and any length.

ITEM NO.	DESCRIPTION	EAN	MASTER PACK	SHELF PACK
TM130	Clamp Head, 1" x 1-1/2" / 25 x 38mm	0734442348078	-	6

MITRE CUTTING CORNER CLAMPS

Accurate mitre clamping is provided by IRWIN® Record® Corner Clamps. The clamps have two countersunk holes for fixing to a wooden block, which can then be secured between the jaws of a bench vice. Thanks to the precision machined clamping surfaces and open design, these clamps are straight forward to operate and provide easy access for glueing and nailing.

ITEM NO.	DESCRIPTION	CLAMP CAPACITY	EAN	MASTER PACK	SHELF PACK

G-CLAMPS

IRWIN® Record® G-Clamps have an I-Braced design. They feature an adjustable steel swivel shoe to help clamp uneven surfaces and operation is fast and smooth due to the twin-start Acme cold rolled thread.

HEAVY-DUTY G-CLAMPS 121 SERIES - THE STRONGEST G-CLAMP

HEAVY-DUTY G-CLAMPS 121 SERIES

IRWIN® Record® Heavy-Duty G-Clamps are recommended particularly for metalworking and fabrication work where a very high clamping force is demanded.

- 1. DROP-FORGED STEEL FRAME**
For strength and durability. Recommended for heavy-duty metal and fabrication work
- 2. SWIVEL SHOE**
Helps clamping on uneven surfaces
- 3. TWIN-START ACME COLD ROLLED THREAD**
For faster and smoother operation
- 4. FUSED STEEL HANDLE**
Will bend before the clamp can be overstressed

ITEM NO.	DESCRIPTION	CLAMP CAPACITY	PROOF LOAD	EAN	MASTER PACK	SHELF PACK

Record®

VICES AND ACCESSORIES

IRWIN® Record® Vices have become the benchmark by which all other vices are measured. Design, choice of materials and manufacturing disciplines each set very high standards which, for the end user, translate into safety, reliability and excellent value.

ENGINEERS' VICE - LIFETIME VICE RANGE

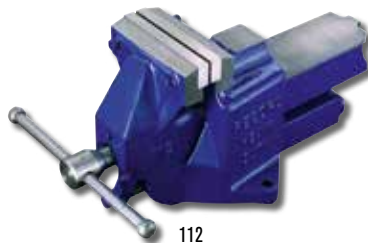

ENGINEERS' AND FITTERS' VICES

Designed for heavy-duty work, these vices are made from S.G. Ductile Iron with an integrated anvil for shaping and beating, together with a quick-release mechanism for rapid slide adjustment. The reinforced body, slide and large diameter main screw contribute to the working strength and resilience, and the vices withstand the most demanding work. Fitters' vices are similar in design to Engineers' vices however are made of close grained gray iron instead of S.G. Ductile Iron. They also have a full line of replacement parts available.

- 1. S.G. DUCTILE IRON**
Material with high-impact resistance guarantees strength and long life (Engineers' vices only)
- 2. SAFETY STOP**
Prevents the slide from being separated from the body
- 3. FULLY MACHINED**
On all load-bearing surfaces for smooth and trouble-free operation
- 4. FUSED STEEL HANDLE**
Will bend before the vice can be overstressed
- 5. QUICK-RELEASE MECHANISM**
Disengages the main screw, allowing rapid movement of the slide
- 6. UNBREAKABLE S.G. IRON NUT**
Can be replaced when worn
- 7. INTEGRATED ANVIL**
For efficient striking of workpieces when required

** S.G. Ductile Iron is strong and flexible with similar characteristics to steel and is virtually unbreakable. Heavy duty vices manufactured from this material are designed to take much more punishing workloads than normal vices.

Record®

QUICK-ADJUSTING VICE GENERAL PURPOSE / MEDIUM-DUTY

IRWIN® RECORD® QUICK-ADJUSTING VICE

The NEW Quick-Adjusting Vice features a fast release lever to quickly loosen the jaws of the vice and return it to the locked position, greatly reducing the time necessary to adjust the vice. This vice with integrated anvil is designed for general purpose clamping and medium-duty applications and for applications requiring frequent clamping and changing of multiple materials.

1. QUICK-RELEASE FUNCTIONALITY

Fast-release lever for quick adjustments to increase productivity

2. S.G. DUCTILE IRON BODY

Guaranteeing strength and long life

3. SWIVEL BASE

Three mounting points and a 120° rotation for more flexible positioning of workpieces

4. FUSED STEEL HANDLE

Will bend before the vice can be overstressed

5. INTEGRATED ANVIL

For hammering and beating workpieces

6. SAFETY STOP

Prevents slide separating from body

IRWIN® RECORD® MECHANICS' VICE

Rigid and robust, the body and sliding jaw are cast from close grained grey iron which is machined on all friction surfaces for a smooth, reliable action.

The jaws, handle and main screw are steel, the latter having a two-start rolled acme thread to speed the jaws from fully closed to fully open with a minimum of winding. The Mechanics' vice is the most commonly used vice in the IRWIN® Record® range. A full line of replacement parts are available.

WORKSHOP VICE - MEDIUM DUTY

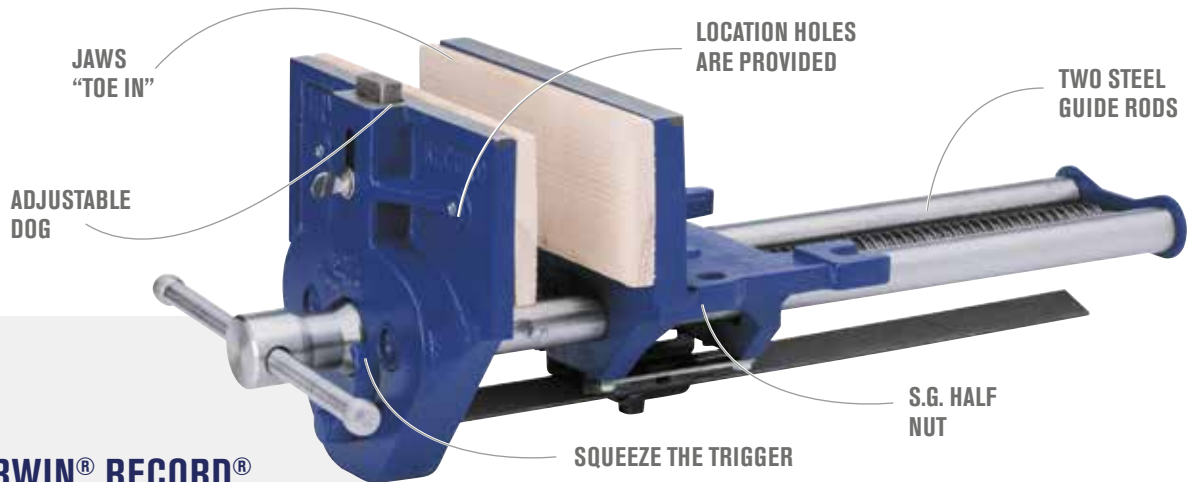

Strong and durable, the body and sliding jaw are cast from close-grained grey iron which is machined on all friction surfaces for a smooth reliable action. The jaws, handle and main screw are steel, the latter having a two-start rolled acme thread to speed the jaws from fully closed to fully open with a minimum of winding. This compact bench vice with anvil is specifically designed for medium-duty workshop applications for both the professional craftsman and the DIY enthusiast who expect a compact vice with superior clamping force, safety features and excellent finish.

Record®

PROFESSIONAL QUICK-RELEASE WOODWORKING VICE

IRWIN® RECORD® QUICK-RELEASE VICE

Squeeze the trigger and a quick-release vice can be opened and closed without using the mainscrew. Large and small work pieces can be quickly interchanged, while releasing the trigger returns the mechanism to normal for fine adjustment. An ideal addition to the engineering workshop or tool room. For clamping and holding wood work pieces.

- TWO STEEL GUIDE RODS**
To reduce wear and ensure a smooth parallel action
- JAWS "TOE IN"**
When pressure is applied they give an even clamping over the whole depth of the work-piece
- ADJUSTABLE DOG**
Used in conjunction with bench stops fitted into the bench top
- LOCATION HOLES ARE PROVIDED**
So you can fit your own choice of wooden checks to protect the work-piece
- SQUEEZE THE TRIGGER**
A quick release vice can be opened and closed without using the mainscrew. Large and small work-pieces can be quickly interchanged
- S.G. HALF NUT**
For longevity and durability replaceable when worn

CHAIN PIPE VICES

The chain pipe vice generates a powerful grip due to its sturdy construction. The drop-forged, heat-treated steel jaws and high-tensile steel chain are mounted on a body cast from ductile iron that is guaranteed unbreakable. The flexible chain means the vice is compact and easy to store when not in use.

SCREWDRIVERS, MULTI-BIT TOOLS & HEX KEYS

INNOVATIVE MULTI-TOOLS DESIGNED TO DELIVER EASE & DURABILITY TO TACKLE ANY JOB

The innovative lineup of IRWIN® Multi-Bit Drive Tools has been designed to address a variety of challenges professionals face on the job. The Extending Multi-Bit Screwdriver adjusts from 125mm to 280mm to get into hard-to-reach spaces, while the 6-in-1 Nut Driver increases efficiency with convenient on-board storage. The Guide Sleeve and Magnetic Multi-Bit Screwdrivers are both compatible with any fastener drive bit and help hold fasteners securely in place for easy driving. Plus, all drivers feature unique handle designs to improve comfort and torque.

3-zone Comfort Grip increases comfort in high and low applications

TorqueZone™ design for optimal comfort and torque

Available on: IRWIN® 6-in-1 Nut Driver, IRWIN® 5-in-1 Extending Multi-Bit Screwdriver and IRWIN® 5-in-1 Guide Sleeve Multi-Bit Screwdriver

BI-METAL UTILITY BLADES

SHATTERPROOF

TRAPEZOID BLADES
FIT MOST KNIVES

LAST 3 TIMES
LONGER*

BI-METAL BLUE BLADES

Bi-Metal is formed by welding high-speed steel edge and spring steel, having the benefit of both types: **Safety & Longer Life.**

IRWIN® Bi-metal Blue Blades are safer since they will not break under normal working conditions, and they help reduce the risk of injury from breaking or shattering blades. And, with the blades lasting longer than traditional carbon blades, they result in fewer blade changes which means fewer accidental cuts.

SNAP-OFF BLADES
SOFT SNAP
TECHNOLOGY

1. SHATTERPROOF

Spring steel allows the blade to bend without accidentally breaking

2. LAST 3 TIMES LONGER*

High speed steel hardened cutting edge stays sharp 3X longer than traditional carbon blades which means more cuts for the money

3. TRAPEZOID BLADES FIT MOST KNIVES

Two-notch blade design fits most utility knives

4. SNAP-OFF BLADES SOFT SNAP TECHNOLOGY

For breaking a new edge confidently

3X LONGER LIFE*
*vs. traditional carbon blades

*vs IRWIN® carbon blades 10504245 / 10504561

CARBON STEEL UTILITY BLADES

CARBON STEEL 4-POINT TRAPEZOID BLADES

This IRWIN® innovation combines the toughness of a traditional trapezoid blade with the increased blade tip life of a snap-off blade. Scored edges give the user 4 sharp points (vs. 2 points on a standard trapezoid blade) which doubles the life of the blade. The 4 notches enable the blade to be extended to maintain blade length after snapping off sections of the blade.

2X LONGER LIFE*
*vs. traditional carbon blades

FK SERIES FOLDING UTILITY KNIVES

The IRWIN® Folding Utility Knives range features a new collection of best-in-class knives developed from intensive research on the needs of professional users. This innovative range meets the high standards required by today's professional users – where safety, durability, convenience and comfort are the most important factors.

FK SERIES FOLDING KNIFE

Included:

Fold-out Screwdriver and additional bit storage

1. PATENTED BLADELOK TECHNOLOGY

Keeps blade locked in place

2. LINER LOCK

For safe, one-handed operation

3. 16° CUTTING ANGLE AND CAST FINGER GROOVES

For ultimate comfort and control

4. WIRE STRIPPER & BELT CLIP

For built-in convenience

5. BUILT-IN BLADE STORAGE

Holds up to two additional blades (not available on FK100)

6. ALL METAL BODY

Design provides added durability (excluding FK150)

7. FK250 FOLD-OUT SCREWDRIVER & BIT STORAGE

Fits 1" insert bits for quick fixes and provides additional tool versatility (PH2 and SQ2 included)

CHALK REELS

IRWIN® STRAIT-LINE® has manufactured chalk reels designed with the end-user in mind for more than 50 years. The new chalk reel range features larger chalk fill openings designed for ease and speed and delivers best-in-class line strength and reel durability to hold up to jobsite wear and tear.

MACH6™ CHALK REEL

NEW

MACH6™ CHALK REEL

6X FASTER*

*as compared to traditional chalk reels

- 1. EASY FILL & LOCK TOP**
Large, 90°-turn locking top for quick chalk fill and easy access to reel internals
- 2. 6:1 GEAR RATIO**
Rewinds the line 6X faster than traditional chalk reels
- 3. 2.5X STRONGER HI-TENSILE LINE**
For fewer breaks and for use on rough, abrasive surfaces
- 4. OPEN ACCESS BACK PANEL**
Allows for quick line change and cleaning
- 5. METAL DRIVE GEAR**
Resists gear failure under heavy load
- 6. ROBUST STEEL HANDLE & LARGE ERGONOMIC CLUTCH**
For increased durability and torque plus easy line release
- 7. WIDE-PRONG HOOK**
For secure anchoring
- 8. DURABLE ALUMINIUM HOUSING**
Provides impact resistance

MARKING CHALK

IRWIN® STRAIT-LINE® marking chalks have an innovative flip-top cap that keeps the chalk in the bottle where you want it. The flip-top cap seals the chalk in an airtight chamber, keeping out moisture and reducing the risk of clumping.

Marking Chalk Colour Permanence & Application Guide

Blue Chalk - Standard indoor/outdoor (1 week) Red Chalk - Outdoor permanent (up to 2 months).

SOFT-SIDED TOOL STORAGE SOLUTIONS: ORGANISE, TRANSPORT AND PROTECT

IRWIN® provides a selection of tool storage in popular formats to fit the needs of tradesmen. Every day on the jobsite, these products deliver an easy, organised and efficient way to carry key tools and hardware while providing protection from the rigours of the trade.

SOFT-SIDED TOOL STORAGE RANGE

	TECH CENTRE	BAGS	TOTES	BACKPACKS	ORGANISERS
COMMANDER SERIES 					
DEFENDER SERIES 		 	 		  
FOUNDATION SERIES			 		

FOUNDATION SERIES

This line sets the foundation for tool storage with:

- Protective rubber feet
- Rugged double-wall 600 denier construction
- Padded grips and straps for comfort
- Metal hardware for strength

DEFENDER SERIES

This tool storage is constructed to last and includes:

- Durable 1680 denier fabric
- Reinforced construction in high stress areas
- Protective integrated moulded or rubber feet
- Improved tool storage options and accessibility
- Enhanced portability with comfort grips and straps

COMMANDER SERIES

This tool bag delivers ultimate tool protection from the elements and environment featuring:

- Waterproof and impact-resistant moulded base
- Durable 1680 denier fabric
- Reinforced construction in high stress areas
- Take-command storage solutions and organisers
- Enhanced portability with comfort grips and straps

PIPE AND TUBE BENDERS

With the IRWIN® range of tube benders, you can be ready to tackle any job with ease. All machines feature precision tooling to give a smooth, accurate bend every time across a large range of sizes.

GLM HAND BENDING MACHINE

GLM HAND BENDING MACHINE

- FORMERS SUPPORTED ON BOTH SIDES**
Prevents twisting under heavy loading
- DURABLE, HARD-WEARING STEEL ROLLERS**
Last much longer than aluminium
- SOLID LUG**
Allows the pipe bender to be held firmly between vice jaws
- HEAVY-GAUGE FORMERS (15mm & 22mm)**
Won't lose their shape and include degree marks on the casting for 'at-a-glance' accuracy
- FLAT EDGES TO THE BRACKET ARM**
Allow the GLM to be used in workshop vice for convenient bending
- HANDLE END STOPS WITH STEEL INSERTS**
Protect user hands during bending, eliminate piercing and increase durability

PLASTIC PIPE CUTTERS

The T850026 pipe cutter features a "V" shaped blade which allows for off-centre motion reducing tube deformation. The specially hardened steel blade also gives greater cutting pressure with less effort making it easier to use. The IRWIN® PVC cutter has a simple one-handed ratcheting operation that provides smooth cutting and clean pipe ends. Plus, the rubberised grips provide confident, safe handling.

IRWIN® Drill Bits are available in sets. Please see product pages for more details.

The origins of Joran® go back to May 1944 at which time, good friends Paul Jensen and Herman Reinholdt formed the company Jensen and Reinholdt in Hvidovre, Denmark. They initially began producing masonry drill bits and later in 1955 expanded the production line to hammer drill bits.

Both product lines were characterised by uncompromising quality and were mainly offered to the building and construction industry. IRWIN® is committed to continue the original values of these products by delivering state of the art of Power Tool Accessories. The masonry drill bits range is no exception to this, and continues to fulfill the highest industry standards.

The Joran SPEEDHAMMER™ Plus and SPEEDHAMMER™ Quad have the certification of "Prüfgemeinschaft Mauerbohrer" e.V. (PGM®), which is the official and independent marking validating the standards of masonry drill bits. The mark is granted only to manufacturers fulfilling the following:

- state-of-the-art manufacturing under use of a quality assurance system
- yearly inspections of the produced drill bits by independent institutes

The inspection requirements are developed by the national approval bodies for anchors in co-operation with leading manufacturers of masonry drill bits and anchors. The Steering Committee of PGM® also carries out appropriate investigations in order to assure the suitability of masonry drill bits for anchor fixings.

New types of drills bits get the inspection mark only after extensive testing has been carried out, ensuring the required suitability and performance.

SPEEDHAMMER™ QUAD

SPECIALIST CONCRETE IRWIN® HAMMER DRILL BIT

The range of SPEEDHAMMER™ Quad SDS-plus drill bits is the most powerful masonry bit available from IRWIN®. The unique solid carbide tip* is optimised for fast, continuous drilling, even through reinforced concrete, delivering superior performance and longer life†. The SPEEDHAMMER™ Quad bit has a high performance solid carbide tip that's manufactured from European carbide to a unique IRWIN® design. It easily powers through more concrete and rebar than traditional masonry bits. When long life and durability are crucial, depend on the IRWIN® SPEEDHAMMER™ Quad Bit.

* Except 16mm bit

SPEEDHAMMER™ QUAD DRILL BIT

LONGER LIFE†

- 1. CARBIDE TIP**
For longer drilling life and improved durability even through rebar
- 2. SOLID 4-CUTTER TIP**
Reduces vibration and prevents jamming in rebar
- 3. STRONG DURABLE BOND**
The carbide tip and body are brazed together to deliver a strong and durable bond
- 4. MAXIMISED FLUTE**
4 flute spirals aid consistent and efficient dust and debris removal
- 5. PREMIUM STEEL & GERMAN MANUFACTURE**
Provides improved core strength for maximum durability and extended life

MADE IN GERMANY

APPLICATION:

Compatible with all hammer drilling machines with SDS-plus fitment. Optimised for fast, continuous drilling, even through reinforced concrete, delivering superior performance and longer life†.

PGM® AND SDS-PLUS ACCREDITED

The IRWIN® German manufacturing facility is a licensed manufacturer of SDS-plus bits and this along with PGM® accreditation gives users confidence in quality of manufacture and the resultant hole for professional anchor fixing.

SPEEDHAMMER™ Quad drill bits have the certification of Prüfgemeinschaft Mauerbohrer e.V. (PGM®).

BENEFITS OF PGM® MARKED DRILL BITS:

- Strict tolerance limits for the diameter and the symmetry of the carbide tip ensuring the exactness of the drill hole.
- Secure anchoring and fixing.
- Constant quality assurance.
- Safety and confidence in the product.

Adherence to these criteria is constantly controlled by PGM®, making the tool safe and trustworthy for the end user as well as the distributor.

SPEEDHAMMER™ PLUS

THE IRWIN® HAMMER DRILL BIT DEDICATED TO SPEED

The innovative design goes straight in and straight out. It removes dust and debris really fast. It's also particularly effective in uncured concrete due to clog-free performance.

INNOVATIVE HEAD AND TIP GEOMETRY

FULLY HARDENED CHROME-VANADIUM STEEL BODY

UNIQUE FLUTE DESIGN

SPEEDHAMMER™ PLUS DRILL BIT

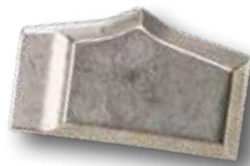

20% FASTER*

- 1. INNOVATIVE HEAD AND TIP GEOMETRY**
Thicker carbide tip improves strength and durability. Aggressive concave cutting angles increase drilling speed by up to 20%. Extra short drill bit head clears drilling dust directly into the flute, reducing the risk of clogging. Self-centering point prevents walking
- 2. UNIQUE FLUTE DESIGN**

New extra deep, asymmetrical flute design provides faster dust removal and increases drilling speed

- 3. FULLY HARDENED CHROME-VANADIUM STEEL BODY**
Resulting in maximum rupture strength and longer life

2-Cutter Head

APPLICATION:

Compatible with all hammer drilling machines with SDS-plus fitment. Designed for drilling in concrete, masonry, brick, block, and granite.

DRILLING RECOMMENDATION:

When using drill bits with length over 400mm, pre-drill at least 150mm deep with a shorter drill bit of the same diameter.

SPEEDHAMMER™ Plus drill bits have the certification of Prüfgemeinschaft Mauerbohrer e.V. (PGM®).

BENEFITS OF PGM® MARKED DRILL BITS:

- Strict tolerance limits for the diameter and the symmetry of the carbide tip ensuring the exactness of the drill hole.
- Secure anchoring and fixing.
- Constant quality assurance.
- Safety and confidence in the product.

Adherence to these criteria is constantly controlled by PGM®, making the tool safe and trustworthy for the end user as well as the distributor.

* Up to 20% faster drilling vs. competitor products due to tip geometry and innovative flute design.

SPEEDHAMMER™ MAX

SDS-MAX DRILL BITS - DESIGNED FOR TOUGHER TASKS

CARBIDE TIP

SPEED

STRONG AND DURABLE

OPTIMUM IMPACT TRANSMISSION

PREMIUM STEEL & GERMAN MANUFACTURE

1. CARBIDE TIP
Solid 2 cutter head plus 2 individual cutting teeth

2. SPEED
4 flute helix for fast debris removal

3. STRONG AND DURABLE
The carbide tip and body are brazed together to deliver a strong and durable bond

4. OPTIMUM IMPACT TRANSMISSION
Strong central core for improved durability and energy transmission

5. PREMIUM STEEL & GERMAN MANUFACTURE
Provides improved core strength for maximum durability and extended life

MADE IN GERMANY

SPEEDHAMMER™ MAX DRILL BIT

APPLICATION:

Compatible with all hammer drilling machines with **SDS-max fitment**. Optimised for fast and efficient drilling, even through reinforced concrete.

PGM® AND SDS-MAX ACCREDITED

The IRWIN® German manufacturing facility is a licensed manufacturer of SDS-max bits and this along with PGM® accreditation gives users confidence in quality of manufacture and the resultant hole for professional anchor fixing.

SPEEDHAMMER™ Max drill bits have the certification of Prüfgemeinschaft Mauerbohrer e.V. (PGM®).

BENEFITS OF PGM® MARKED DRILL BITS:

- Strict tolerance limits for the diameter and the symmetry of the carbide tip ensuring the exactness of the drill hole.
- Secure anchoring and fixing.
- Constant quality assurance.
- Safety and confidence in the product.

Adherence to these criteria is constantly controlled by PGM®, making the tool safe and trustworthy for the end user as well as the distributor.

DEMOLITION CHISELS

POINTED CHISEL

For general chiselling and breaking work in brick, concrete and loose stone (eg: when laying cables)

FLAT CHISEL

For general chiselling and breaking work in brick, concrete and loose stone (eg: when laying cables)

SPADE CHISEL

For removing large quantities of material

GOUGE CHISEL

For cutting narrow channels into concrete

TCT POINTING CHISEL

For the removal of pointing in brickwork

CRANKED TILE CHISEL

For easy removal of tiles

CORDLESS MULTI DRILL BITS

ONE DRILL BIT FOR EVERY MATERIAL

The IRWIN® Cordless Multi drill bit is the most versatile drill bit. It is designed to drill in multiple materials including brick, light concrete, dry wall, ceramic tiles, sheet metal, wood, plastic and marble. In addition to the multipurpose function, the IRWIN® Cordless Multi is the problem solver for drilling into ceramic tiles up to a hardness grade of 9.

HIGHEST CARBIDE GRADE

SINGLE FLUTE DESIGN

UNIQUE TIP GRINDING

CORDLESS MULTI

- 1. HIGHEST CARBIDE GRADE**
For fast drilling into most common materials and hardest tiles (scratch hardness 9)
- 2. SINGLE FLUTE DESIGN**
Giving maximum space for dust removal. Up to 15% Speed advantage over competition. 10% more holes per battery charge
- 3. UNIQUE TIP GRINDING**
Brazed carbide tip has a unique diamond ground 4-face design for excellent centering and perfect hole quality

USEFUL TIPS:

1. Drill with low RPM
2. High pressure
3. No hammer action

IMPROVED CARBIDE TIP DESIGN ensures for durability and fast drilling in all masonry materials
AGGRESSIVE HEAD DESIGN for up to 15% speed advantage over competition
UNIQUE BRAZING PROCESS ensures a perfect bond between tip and body
SINGLE FLUTE DESIGN gives maximum space for dust removal and provides a 60% faster dust removal

20% LONGER LIFE*

GRANITE DRILL BITS

DESIGNED FOR PERCUSSION DRILLING IN VERY HARD MATERIALS

GRANITE

FOR PERCUSSION DRILLING in very hard materials such as granite

EXTREMELY HARD AND WEAR RESISTANT

CARBIDE guarantees up to 40% more holes compared to conventional masonry drill bits

STONE MASONS favour this product for impact drilling of natural stone like granite

SPECIAL SHAPED CUTTING EDGES mean higher durability resulting in 50% more accurately sized holes per drill bit

10501901

10507898	Diamond Drill BIT 14mm	5706915078985	60	1

DIAMOND

10507896

USEFUL TIPS:

1. Drilling with water increases the lifespan of the tool.
2. Do not press strongly on the tool, let it work.
3. Make a swinging movement to allow dust evacuation.
4. Cutting speed: 2700 RPM.
5. No hammer action.

The drill needs to run before hitting the surface. To avoid sliding of the drill, start with an angle of 45°.

Once the hole has started, raise the drill gradually up to the vertical line.

Make an oscillating movement while drilling.

Masonry Drilling

MORTAR RAKES

The Mortar Rake is designed to replace traditional methods of mortar removal such as powered mortar chisels and cutting discs. The rake is faster and less intrusive to surrounding brickwork and, unlike other methods, it is just as efficient for both horizontal and vertical joint clearing.

Please note that the cutters must be used together with an adaptor (10507234) and angle grinder.

ITEM NO.	DESCRIPTION	EAN	MASTER PACK	SHELF PACK

M-SYSTEM

HOW IT WORKS

1. Push the body backwards and start drilling.
New IRWIN® Carbide Tip Design ensures an easy start on fibre cement.
2. After drilling the hole pull back the pilot drill and fix the hexagon-screw with the same tool.
3. Special spring to keep the screw in place before fixing.
No more adapters or additional power tools required for roofing applications.
For more convenient and safer work.

ITEM NO.	DESCRIPTION	EAN	MASTER PACK	SHELF PACK
10507590	M-System 8 mm	5706915075908	30	5
10502865	M-System 11 mm	5709131054276	15	1
10503476	8 mm Drill Bit for M-System	5709131054290	200	10
10507937	11 mm Drill Bit for M-System	5706915079371	200	10

2-IN-1 TOOL DESIGN for easy and fast fixing of fibre cement and similar roofing/panelling materials
IMPROVED CARBIDE TIP ensures easy starts
SPECIAL SPRING keeps the screw in place before fixing

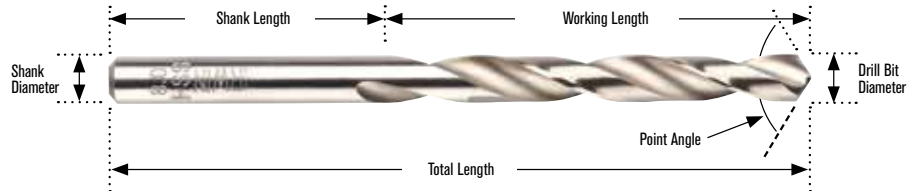

METAL DRILLING

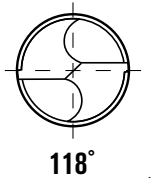

ENGINEERED FOR CONTROLLED PRECISION AND SPEED

The IRWIN® line of metal drill bits offers a solution for every professional application. Each metal drill bit is made of high speed steel with high precision-cut point and spiral, ensuring durability and quality.

- TOTAL LENGTH:** The length from the point to the end of the drill bit
- POINT ANGLE:** The angle of the cutting edges
- DRILL DIAMETER:** The cutting diameter of the drill bit
- SHANK LENGTH:** The length of the drill bit that is secured by the drill
- WORKING LENGTH:** The length from the point to the end of the flutes

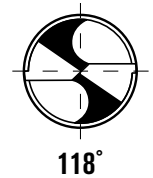

TIP GEOMETRY

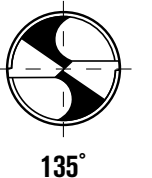

118° STANDARD POINT

- For drilling in alloyed and non-alloyed steels, non-ferrous metals, cast iron and hard plastics
- Can be easily resharpened
- Requires higher feed pressure
- Best for stationary drills

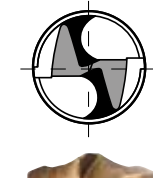

118° SPLIT POINT

- For drilling in alloyed and non-alloyed steels, non-ferrous metals, cast iron and hard plastics
- Very good centering
- Requires less effort / feed pressure

135° SPLIT POINT

- For drilling in high strength steel and high-alloy steels
- Very good centering
- Requires less effort / feed pressure

TURBOMAX® JET POINT

- Specially designed for portable drills
- Excellent centering, will not walk on any surface
- Precision-ground to stay sharp longer and drill faster

TURBOMAX™ HSS

DESIGNED FOR HIGH PERFORMANCE DRILLING

Turbomax™ is designed primarily for high performance drilling in sheet metal, however, also performs well in all types of wood and plastic. Suitable for drilling stainless steel however, HSS Cobalt products (p.114) are designed specifically for this purpose. Remember to always use a coolant when drilling stainless steel.

1. 100° TIP FOR FASTEST START

Most precise centering and guidance
No walking, including curved surfaces
No centre punch necessary

2. 140° CUTTING SHOULDER FOR SMOOTH FINISH

Drills perfectly round holes with clean exit holes
- minimised burrs
Will not bind in multiple layers of thin material

3. GROUND FLUTE

Ground from solid for high accuracy drilling and fast removal of chips

4. ROBUST REINFORCED WEB DESIGN

For added strength and durability - no breakage

5. W9 HIGH SPEED STEEL (HSS)

For sharper cutting lips and superb heat resistance

6. HARDENING

Superb wear resistance. Hardness of 63-66 HRC

7. 3-FLATTED SHANK

Prevents slipping in chuck
No damaging of the drill due to slipping
Safe and strong clamping, especially when using keyless chucks

JET POINT – REVOLUTIONARY TIP DESIGN

Self centering, will not walk on any surfaces

HSS COBALT

135° SPLIT POINT GRINDING

INDUSTRIAL QUALITY GROUND FLUTE

COBALT ALLOYED DRILL BIT BODY

GOLDEN TEMPERED SURFACE FINISH

DESIGNED FOR DRILLING STAINLESS STEEL

- 1. 135° SPLIT POINT GRINDING**
Ensures perfect centering and reduced drilling pressure
- 2. INDUSTRIAL QUALITY GROUND FLUTE**
For high accuracy drilling and fast removal of chips
- 3. COBALT ALLOYED DRILL BIT BODY**
Manufactured from high quality HSS steel containing 5% Cobalt (Co) – added 5% Cobalt improves the red hardness (heat resistance) and abrasion resistance of the drill bit and results in significantly extended life
- 4. GOLDEN TEMPERED SURFACE FINISH**
For increased durability

HSS TITANIUM

135° SPLIT POINT GRINDING

TITANIUM NITRIDE (TiN) COATED HIGH QUALITY STEEL BODY

LESS HEAT TiN

INDUSTRIAL GROUND FLUTE

SPEED AND FEED

FAST AND PRECISE

- 135° SPLIT POINT GRINDING**
Ensures perfect centering and reduced drilling pressure
- INDUSTRIAL GROUND FLUTE**
For high accuracy drilling and fast removal of chips
- TITANIUM NITRIDE (TiN) COATED HIGH QUALITY STEEL BODY**
Resists heat and friction, providing up to six times longer life than standard metal drill bits*
The TiN coating has a hardness of app. 80 HRC and is very resistant to wear
TiN has a low coefficient of friction. This results in less power being consumed and less heat generated during the drilling
- SPEED AND FEED**
Compared to traditional HSS Twist Drill Bits, speed can be increased by 40 -60% and feed by 10 -20% without reducing the life time of the drill bit significantly
- LESS HEAT**
TiN is also a poor conductor of heat, so the heat generated during the drilling process is diverted into the chips and coolant and less into the drill bit

*Up to 6X longer bit life than black oxide coated bits

HSS PRO

HSS PRO is an industrial quality twist drill with outstanding performance and long service life. It is designed for drilling steel and steel castings, alloyed and non-alloyed steel, cast iron, non-ferrous metals, plastics and other materials. The 118° split point shape provides an optimum centering when starting and a faster drilling rate. It requires lower feed pressure than standard HSS drill bits with a chisel edge.

118° SPLIT POINT GRINDING

HIGHLY ACCURATE

GREATEST TOUGHNESS

OPTIMUM DRILLING PERFORMANCE

HIGHEST STEEL GRADE

TOUGHNESS AND PRECISION FOR PROFESSIONAL USERS
Designed for drilling a wide selection of materials

- 1. 118° SPLIT POINT SHAPE**
With increased performance and very good centering
Precision starting, no need to pre-punch or pilot drill
Penetrates quickly
Requires less effort / feed pressure
- 2. GREATEST TOUGHNESS**
For low risk of breakage even when drilling with smaller diameters due to high elasticity
- 3. OPTIMUM DRILLING PERFORMANCE**
Even in unfavourable working conditions
- 4. HIGHLY ACCURATE**
Close tolerances and high concentricity for maximum precision
- 5. HIGHEST STEEL GRADE**
High-performance, High-Speed Steel

40% MORE HOLES*
*vs previous version

HSS PRO DRILL RANGE

The HSS PRO drill bits are available for a wide array of applications: DIN 338 jobber series, DIN 340 long series, double-ended stub series, DIN 345 Morse taper shank series.

DIN 338		DIN 338 series is suitable for many trade and industrial applications in alloyed and un-alloyed steel, non-ferrous metals, cast iron and plastics.
DIN 340		DIN 340 long series is most suitable for drilling deep holes or through hollow profiles.
Double-Ended		Double-ended series is especially designed for drilling thin materials like sheet metal, flat steel and profiles. Ideal for use with hand-held drills.

118° SPLIT POINT SHAPE for increased performance and very good centering
PARTICULARLY SUITED for drilling thin materials, especially for car body work and tubular rivet holes
DOUBLE LIFETIME versus a single end drill bit
ADAPTED DIAMETERS for most common blind rivets
SURFACE FINISH is polished silver
PACKAGED in Quadro Pack

STEP DRILLS

DESIGNED FOR PRECISE DRILLING IN THIN MATERIALS

- SELF-CENTERING POINT**
- DOUBLE-GROUND SINGLE-FLUTE CUTTING EDGE**
- CHROME-VANADIUM STEEL**
- LASER ETCHED SIZES**
- IDEAL FOR DRILLING HOLES IN THIN MATERIALS**
- FLATTED SHANK**

- 1. SELF CENTERING POINT**
Will not walk and eliminates the need for centre punching.
- 2. CHROME-VANADIUM STEEL**
Drill bit body is hardened to 56 HRC for durability.
- 3. DOUBLE-GROUND SINGLE-FLUTE CUTTING EDGE**
For extra chip capacity, drilling of true, round holes and provides maximum step control.
- 4. IDEAL FOR DRILLING HOLES IN THIN MATERIALS**
Including mild steel, copper, brass, aluminium, plexiglass, plastic, wood and laminates.
- 5. FLATTED SHANK**
Prevents the drill bit from slipping in the chuck.
- 6. LASER ETCHED SIZES**
Inside flute for easy and permanent hole size identification.

FOUR FACETED GROUND CARBIDE TIP for low drilling pressure and perfect centering
EXTRA DEEP GROUND DOUBLE FLUTES for extra chip capacity
REDUCED FLUTE for body clearance and less friction
CHROME-VANADIUM STEEL BODY is hardened to 56 HRC for durability.
ALWAYS USE COOLANT when drilling with TCT Twist Drill Bits to extend the life time of the drill bit. It is recommended to use a 3-6% emulsion.

10502671

SPEEDBOR™

IRWIN®

In 1885, Charles Irwin patented the Auger bit and, along with four business partners, formed the IRWIN® Auger Bit Company in Ohio, USA. Over 125 years later, IRWIN® is still the leading manufacturer of wood drilling bits and accessories. No matter what wood drilling project you face, IRWIN® Tools makes a drill bit that performs the job better. Our mark of quality is stamped right on the shank of our full range of bits. Whether the job requires quick, clean holes, or precise finish work, IRWIN® has a bit for every application and every need.

Professionals can now improve their productivity and accuracy with IRWIN® innovative ranges. IRWIN® Blue Groove 4X and Blue Groove 6X wood boring bits raise-the-bar on tool quality and performance. The cutting edge technology incorporates true “cutting edges” that glide through the wood versus scraping its way through. The latest generation Blue Groove Power is adding extreme durability thanks to Bi-Metal Technology.

TOUGHER THAN NAILS

THE LONGEST LASTING WOOD BORING BIT

- EXTREME DURABILITY**
HSS tip manufactured with Bi-Metal technology cutting edges provide long life in tough applications including nail-embedded wood
- FULL SCREW TIP**
For easy pull through and added accuracy
- TAPERED TRI-FLUTE DESIGN**
For faster chip ejection, less binding and ease of use
- COMPACT LENGTH**
Designed to fit between studs in most common applications
- QUICK-CHANGE SHANK**
1/4" Quick-Change shank on 14-16mm bits and 3/8" Quick-Change shank on 18-32mm bits

6X

*Up to 6 times faster vs. IRWIN® SPEEDBOR™ Classic flat bits

x50 LIFE

6 TIMES FASTER THAN SPEEDBOR™ CLASSIC FLAT BITS

*Up to 6 times faster vs. IRWIN® SPEEDBOR™ Classic flat bits

Quick Change Shank

Saves Battery Life

Wood

1. THREE CUTTING SPURS

For clean holes with minimal break out

2. FULL SCREW TIP

For easy pull through and added accuracy

3. TAPERED TRI-FLUTE DESIGN

For faster chip ejection, less binding and ease of use

4. FULL LENGTH HEAT TREATED

For extra durability

5. 1/4" / 6mm QUICK-CHANGE SHANK

Reduces slipping in standard chucks and is compatible with 1/4" / 6mm quick-change chucks

6. MULTIPLE LENGTHS AVAILABLE - 4", 6" & 16"

Short Length Bits for for drilling in tight spaces. Ideal for holes up to 2" (50mm) deep
Standard length bits ideal for holes up to 4" (100mm) deep
Extended length bits include hole in flute for easy wire pulling through walls, ceilings and floors

BRAD POINT

SOLID CENTRE AUGER WITH CUTTING SPUR

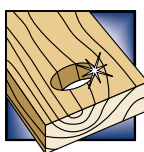

BRAD POINT TIP provides accurate positioning for starting the hole

BIT IS PRECISION GROUND for use in furniture making, doweling, cabinetry and other woodworking applications where an exact hole size is required

SPUR CUTTING EDGES reduce splintering and ensure a smooth, clean hole

WIDE FLUTES provide a fast, continuous flow of chips

Perfect for all types of wood
Creates perfect and straight holes

AUGER

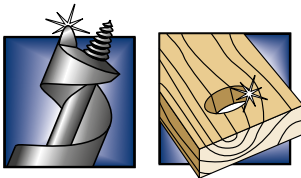

SOLID CENTRE AUGER WITH CUTTING SPUR

The Original
AUGER

AUGER DRILL BITS

- COARSE SCREW POINT** for faster drilling into all types of wood
- SINGLE SPUR DESIGN** for smoother hole finish
- EXTRA WIDE FLUTE** for faster chip removal
- FULLY HARDENED BODY** from tip to shank for extra durability
- HEX SHANK** prevents bit slipping in chuck

Perfect for all types of wood
Creates perfect and straight holes

FASTENER DRIVES & SCREWDRIVING

IRWIN® IMPACT PRO PERFORMANCE SERIES™

DRILLING BITS AND ACCESSORIES DESIGNED FOR IMPACT DRIVERS.

Designed for trade professionals who expect the highest performance, power and durability from their tools and accessories, IRWIN® has launched the IMPACT PRO PERFORMANCE SERIES: a new line-up of innovative, high-strength, magnetised* Impact Bits. Engineered for use with the most powerful impact drivers and drills for the completion of multiple metal and wood fastening applications, these robust and reliable impact bits can handle the most powerful turning force and torque requirements.

- 1. FULL FIT HEAD**
Eliminates wobble and screw head roundings
- 2. CONTOURED AREA**
The bit tip flexes with the torque of the impact driver
- 3. FLEX OPTIMISED**
To transfer maximum torque through the screw and maximise life
- 4. MANUFACTURED WITH HEAVY-DUTY HIGH-GRADE STEEL**
To withstand high torque output

IMPACT PRO PERFORMANCE SERIES

IMPACT PRO PERFORMANCE STORAGE SETS

Keep bits, adaptors and accessories close to hand with the new range of IRWIN® storage sets. Designed to withstand the rigours of daily use, the cases are available in three different sizes; each of which can connect together to provide a secure storage unit.

ROBUST, MODULAR, STORAGE THAT KEEPS BITS AND ACCESSORIES ORGANISED AND EASY TO FIND

- 1. EASY BIT REMOVAL**
Small cases include newly designed bit retainers for easy removal and replacement
- 2. ROBUST CASE**
Designed to hold up against the rigours of daily use
- 3. SECURE CLOSURE**
Easy-to-use flip-up latch design keeps cases securely closed when not in use and locks the cases together when stacked
- 4. CONNECTABLE CASES - FLEXIBLE STORAGE**
The connectable cases can be customised to create a single storage unit that is both secure and portable

SCREWDRIVING BITS

IRWIN® offers a full line of screwdriving bits designed for a number of applications. All bits are manufactured with industrial-grade S2 steel for long life and durability. Insert bits are engineered for use in hand-driving applications or with power tools when used with the IRWIN® insert bit holder. Power bits are specifically designed for the higher torque requirements of power tools. They are designed to provide more clearance between the power tool and the fastener.

POCKET CASES

PORTABLE, DURABLE CASE THAT KEEPS BITS ORGANISED

IRWIN® Pocket Cases feature a compact, portable design that makes it simple to take the bits you need to get the job done. The convenient moulded ABS resin cases hold up to anything the jobsite can throw at them and include easy-to-read size markings for simple identification of the set contents. Plus, the 10-piece pocket case features an easy-to-access bit holder storage compartment right on top.

- 1. COMPACT, PORTABLE DESIGN**
Compact, portable design allows for easy transport to and from the worksite, and ease-of-use while on the job
- 2. MOULDED ABS RESIN CASE**
Moulded ABS resin case holds up to rigors of daily use
- 3. EASY-TO-READ SIZE MARKINGS**
Easy-to-read size markings provide simple identification of set contents
- 4. CONVENIENT BIT HOLDER STORAGE COMPARTMENT**
Incorporated into top of case (insert bit cases only)

MAXIMUM GRIPPING POWER reverse spiral flutes are designed to bite down

HIGH CARBON STEEL is tougher than tool steel, ensuring longer life and greater durability

WORKS WITH MOST TOOLS with a 3/8" square drive for use with hand ratchets, impact wrenches & air ratchets; hexagonal flats for use with flat wrench, pliers, adjustable wrench, sockets or VISE-GRIP® locking pliers

UNIVERSAL LOBULAR DESIGN fits all types of fasteners

CIRCULAR SAW BLADES

IRWIN® now offers a comprehensive line-up of circular saw blades for professional tool users. From the jobsite, to the fine woodworking shop, IRWIN® offers a blade for every user need.

WELDTEC™

The WeldTec™ platform redefines excellence with a range of construction saw blades that combines various attributes to deliver long lasting performance.

WeldTec Technology is the welding of teeth to the circular saw blade as opposed to the traditional brazing method. This is ideal for handheld corded and cordless blades as the weld provides a stronger tooth bond in case of unexpected nail strikes or foreign objects embedded in wood.

BEST VALUE for an economy blade
PRECISION GROUND TEETH for smooth, accurate cuts
EXPANSION SLOTS for straighter cuts
CORROSION-RESISTANT COATING for longer, quality performance
ALTERNATE TOP BEVEL TOOTH CONFIGURATION (ATB) for cross cutting and ripping in all woods

1907700

WELDTEC CIRCULAR SAW BLADES

WELDTEC CIRCULAR SAW BLADES

WELDED CARBIDE TEETH

ULTRA-COMPACT (UC2) CARBIDE

INNOVATIVE HEAT VENTS & EXPANSION SLOTS

ALTERNATE TOP BEVEL (ATB) TOOTH CONFIGURATION

FULLY HARDENED PLATE & REINFORCED SHOULDER

1. WELDED CARBIDE TEETH

Up to 30% stronger tooth bond and for 50% longer life

2. ULTRA-COMPACT (UC2) CARBIDE

70% tougher than standard carbide for superior sharpness and cut quality

3. INNOVATIVE HEAT VENTS & EXPANSION SLOTS

For straighter cuts

4. FULLY HARDENED PLATE & REINFORCED SHOULDER

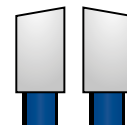

For blade durability and truer, longer running with more accuracy

5. ALTERNATE TOP BEVEL (ATB) TOOTH CONFIGURATION

For cross cutting and ripping in all woods

ATB ALTERNATE TOP BEVEL

FEATURES

- Teeth alternate between a right- and left-hand bevel to form a knife-like edge on either side for a cleaner cut.

HAND-HELD CONSTRUCTION

THIN KERF WITH EVO ALTERNATING GRIND for fast cutting speed

HEAT VENTS & EXPANSION SLOTS reduce heat build-up and warping

CONSTRUCTION GRADE TUNGSTEN CARBIDE TIPS

retain their edge and deliver longer life

CORROSION-RESISTANT COATING for longer, quality performance

ALTERNATE TOP BEVEL TOOTH CONFIGURATION (ATB) for cross cutting and ripping in all woods

SPECIALITY BLADES FOR NON-FERROUS METAL

EXPANSION SLOTS help keep the blade flat

TRIPLE CHIP GROUND TOOTH (TCG) for excellent finish of the cut

SPECIALLY DESIGNED for cutting all types of non-ferrous metals such as aluminium, copper, lead and plastics

1907778

BI-METAL HOLE SAWS

LONG ESTABLISHED MANUFACTURING EXCELLENCE LEADS TO PERFECTION

IRWIN® manufactures and distributes high quality cutting tools for trade professionals who demand superior performance and durability on the job. Our engineers have been working for almost over a century on constant product improvement, resulting in a state-of-the-art in-house electron beam welding process to create the highest quality bi-metal blades that out-perform the competition, stay sharper and last longer.

The WeldTec™ platform combines various attributes to deliver long lasting cutting performance. A revolutionary tooth geometry and an updated tooth set enables faster and smoother cuts, as well as improved longevity.

HOLE SAWS

RECIPROCATING BLADES

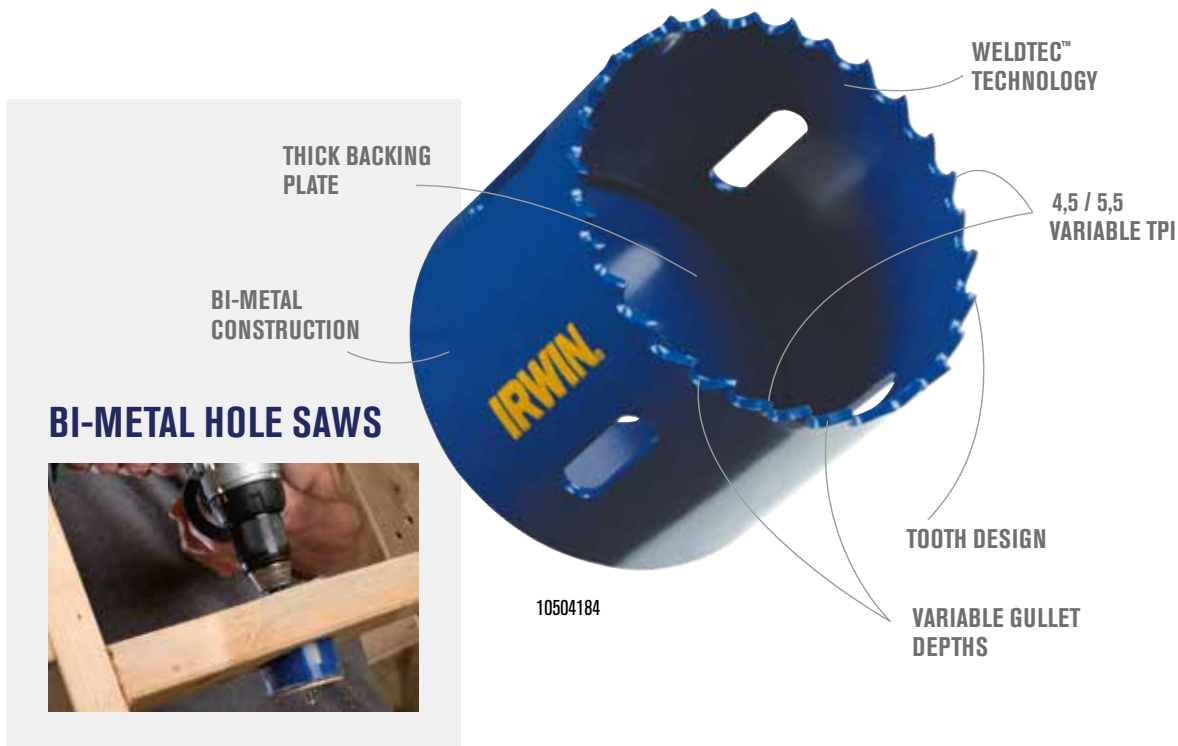

JIGSAW BLADES

BI-METAL HOLE SAWS

IRWIN® Bi-Metal Hole Saws cut through a variety of materials, including: Aluminium, Copper, Iron, Stainless Steel, Wood and Zinc.

The electron beam welded High Speed Steel (HSS) cutting edge ensures stronger, longer lasting teeth. Precision set teeth provide faster penetration and cutting. And, the bi-metal construction delivers toughness and long life.

BI-METAL HOLE SAWS

- 1. WELDTEC™ TECHNOLOGY**
Delivers enhanced durability and higher cutting speed
- 2. TOOTH DESIGN**
For up to 100% longer life and 50% faster cutting*
- 3. 4,5 / 5,5 VARIABLE TPI**
For faster cuts, less torque build-up and enhanced chip removal
- 4. VARIABLE GULLET DEPTHS**
For more efficient chip clearance
- 5. THICK BACKING PLATE**
Gives robustness for the toughest jobs
- 6. BI-METAL CONSTRUCTION**
For increased life and durability

BI-METAL RECIPROCATING BLADES

This comprehensive reciprocating saw blade offering has a blade for every application. IRWIN® blades offer superior construction and design making them faster cutting and longer lasting, therefore giving the user a superior cost-per-cut value.

BI-METAL RECIPROCATING SAW BLADES

- 1. INCREASED TANG ANGLE**
For up to 50% faster cuts vs. previous model
- 2. BI-METAL CONSTRUCTION**
For a faster cutting, longer lasting blade that can bend without breaking
- 3. WELDTEC™ TECHNOLOGY**
For stronger, longer lasting teeth
- 4. 8% COBALT**
Keeps teeth sharper, longer
- 5. IMPROVED TOOTH CONFIGURATION**
For up to 100% longer life and 50% faster cutting*

CUTS ALL METALS including non ferrous, pipe conduit, stainless & sheet metal

SUITABLE for use with materials 1.5 to 10mm (1/16" to 3/8") thick, dependent on the TPI of the blade

AVAILABLE IN 10, 14, 18 and 24TPI on metal cutting reciprocating saw blades

METAL & WOOD CUTTING BI-METAL RECIPROCATING BLADES

CUTS COMPOSITION MATERIALS such as plastic, wood, pipe, carbon steel & stainless steel

SUITABLE for use with materials 3.2mm (1/8") & thicker

AVAILABLE IN 10 TPI in 150, 200 & 300mm (6", 8" & 12") sizes

JIGSAW BLADES

This comprehensive jigsaw blade offering has a blade for every application. The range includes both T-shank and U-shank to fit all of today's most popular jigsaw machines.

IRWIN® Jigsaw Blades are manufactured from the following high quality materials:

HCS Carbon steel for use in softer materials such as wood, laminated chipboard, and plastics.

HSS Fully hardened high-speed steel for use in metal, aluminium, and non-ferrous metal.

WOOD CUTTING HCS JIGSAW BLADES - T-SHANK

3-SIDED, FLEAM GROUND TEETH for fast cut and clean finishes

FAST AND SMOOTH CUTS in all wood applications
