The Double Density D is a rectangular connector in the popular D Subminiature shell configuration featuring double the contact density in the same insert area. The Double Density D connector can thus accommodate up to 100 contacts instead of 50.

This double contact density is achieved by using field-proven, highly reliable Centipin™/Centisocket™ contacts on .075 (1.91) centers, in the positive contact alignment design. In this design contact

tacts are recessed in the insulator and the more Contacts are crimp removable type. rugged Centisocket™ contacts are exposed. This The Double Density D connector is available in the reversal of positions, and the chamfered-entry of five popular shell and insert sizes accommodating the sockets, assures positive mating even under up to 100 contacts. These connnectors mate excluservere misalignment conditions. The contacts are sively with other Double Density D connectors. A retained in the monobloc insulator by a resilient wide range of accessories can be used, including internal shoulder that snaps into a locking groove in junction shells, potting cups, switching shells, guide the contact. The chamfered front of the contact will pin plates, and dust caps.

positions are reversed; the flexible Centipin™ con- not damage the internal shoulder in the insulartor.

1. STANDARD D HARDWARE-

Including full range of D Subminiature accessories

2. ONE PIECE TYPE INSULATOR-

glass-filled nylon material

3. CONTACT RETENTION-

thermoplastic internal shoulder snaps into a locking groove in the contact.

Retention Force: 8 lbs. min. initially, 4 lbs. min. after 10 cycle.

4. TWIST PIN CONTACTS-

seven outer wiping surfaces assure electrical continuity even under severe shock and vibration

5. POSTIVE CONTACT ALIGNMENT-

flexible pin is recessed in insulator cavity and rugged socket is exposed

6. GUIDE-IN KEYS AND KEYWAYS-

assure alignment during mating and prevent scooping

How to Order

SHELL SIZE

E, A, B, C and D

Omit if not required

Contacts Copper alloy, gold plate Alternate finish. - A106 Gold over brass Modification Code A156 Gold over brass A197 Tin/Lead over steel

MECHANICAL FEATURES

Sizes	- Five shell sizes: E, A, B, C, and D				
Coupling	- Friction or jackscrew				
Polarization	- Keystone-shaped shells				
Contact Spacing	075 (1.91)				
Contact Termination	- Crimp snap-in				

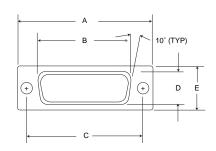

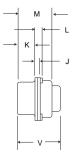

^{*} Accommodates AWG #26 thru #22

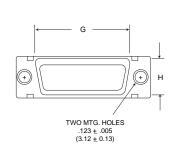

^{*}Brass non-magnetic also available
