ENGINEERED FOR LIFE

# Interconnect Solutions

---

ITT Corporation is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for industrial end-markets in energy infrastructure, electronics, aerospace and transportation. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 30 countries and sales from a total of 125 countries which generated a 2011 revenue of \$2.1 billion.

Our award-winning connector portfolio continues to be an industry innovator, offering a reliable and cost effective range of interconnect solutions with the brands of Cannon, VEAM and BIW Connector Systems. Continuous investment in technology and research & development have enabled ITT to provide new, innovative products and solutions to markets including:

- Automotive
- Computer & Consumer Electronics
- Industrial/Instrumentation
- Military & Aerospace
- Oil & Gas
- Telecommunications/Wireless Handheld Devices
- Transportation

When you specify a Cannon, VEAM or BIW Connector Systems connector, you can rely on products that are designed, developed, and manufactured to the highest quality and reliability standards. This tradition of excellence is based on ITT's corporate culture of operating its businesses under the principles of Six Sigma. At ITT, Six Sigma is not just a quality philosophy but a complete corporate culture that drives the entire business. Our Value Based Management and Value Based Product Development systems are two cornerstones that allow for the development of both leadership and product engineering principles, ensuring our industry leading products are developed to the accepted market driven lead times. These principles have allowed ITT to become the market leader in all of our business portfolios.

## Six Sigma Manufacturing

ITT operates manufacturing facilities in the United States, Germany, Italy, Mexico, China, Japan and the UK, all of which have particular product area strengths allowing ITT to offer a truly global footprint to our customers. Our facilities are world

class and accommodate full vertical integration utilizing the latest manufacturing technologies including: manufacturing cells, Kanban pull systems, and automated electrical, mechanical, and optical test and inspection equipment. The combination of our manufacturing strength and our advanced manufacturing facilities allows ITT to offer products at market driven prices. Our capabilities, especially in robotics, computerized precision tooling,

Kaizen Project Management, Six Sigma tools, and testing, give ITT the most optimized global manufacturing footprint in the interconnect industry.

## The Custom Difference

As the industry leader in harsh environment interconnect applications, ITT's world class engineering teams will work directly with our customers to design and develop cost effective solutions for their applications. In many cases we may modify one of our standard designs to ensure a highly reliable solution where timing is critical. Yet, in those cases where a complete custom interconnect solution is required, ITT will work with our customer's Engineers to design an interconnect solution which will be cost effective yet highly reliable. Our Engineering teams will provide a thorough systems and mechanical analysis of any proposed solution. These analyses provide our customers with sophisticated electrical signal and mechanical characterizations to determine the best solution for their application.

## RoHS Compliance Information

ITT has implemented a strict parts control plan for all ITT electronics plants worldwide that allows the Cannon, VEAM, and BIW Connector Systems product portfolios to meet the requirements of the European Union Directive 2002/95/EC better known as the Reduction of Hazardous Substances initiative. As appropriate, specific Cannon, VEAM, and BIW Connector Systems products may be ordered with an R prefix number which insures our customers will receive RoHS compliant parts for their commercial electronics applications and equipment. Since most RoHS hazardous substances center around specific metal plating and lead solder coatings, ITT's products for RoHS compliance are available in the following plating finishes: electroless nickel, stainless steel, anodize over aluminum and gold plating. It should be noted that gold plating would be recommended as the replacement for tin-lead solder when ordering board mount connectors.

Consult factory for specific information on the latest design specifications.

# Interconnect Solutions for Transportation

Offering the broadest selection of transportation interconnect solutions, ITT is the one stop source for design, development, manufacturing, and testing.

ITT offers Cannon, VEAM, and BIW Connector Systems product lines designed specifically for transit applications. These product lines come in a large style of shell sizes and contact arrangements to meet the most demanding applications, both electrical and optical. Inserts to meet low smoke/zero halogen and RoHS requirements are also available. ITT provides complete harnessing solutions and junction boxes.

As the industry leader in harsh environment interconnect applications, ITT's world class engineering teams will work directly with our customers to design and develop cost effective solutions for their applications. In many cases we may modify one of our standard designs to ensure a reliable solution where timing is critical. Yet, in those cases where a complete custom interconnect solution is required, ITT will work with our customer's Engineers to design an interconnect solution which will be cost effective yet highly reliable.

### **VEAM VBN**

Circular connectors with rigid insert according to NF F 61030 regulations. Field configurable, allows easy and quick harnessing. Suitable both for signal and power.

### **VEAM CIR High Temperature Connector**

The new European standards series CEN/TS 45545 for fire rail safety regulations requires a connector able to withstand for 15 minutes when exposed to the ISO 834-1 heating curve (max Temperature 800°C). The VEAM CIR High Temp connector meets this standard.

### **Applications**

- Critical control signals
- Fire resistant applications

### **Cannon CA Bayonet**

VG/CA-Bayonet signal and power connectors provide superior performance in extreme environmental conditions. They offer exceptional sealing against the ingress of fluids and will withstand the effects of high vibration. In accordance to VG95234.

### **Applications**

- Control panel connections
- Intervehicle applications
- Communications equipment
- CCTV equipment

**VEAM CIR and FRCIR Standard**

Multipurpose bayonet circular connectors. 1 up to 159 solder or crimp contacts. Both for signal and power. In accordance to VG95234.

**Applications**

- Control switchboard connections
- Control panel connections

**VEAM FRMGCIR**

Multipurpose bayonet circular connectors, completely covered with fire-resistant rubber.

**Applications**

- Power connections
- Signal connections
- Intervehicle applications

**VEAM FRCIR-WCML Series**

Multipole connector with group shielding contact for several cables. IP67, waterproof.

**Applications**

- Intervehicle connections
- Power and signal connections

**VEAM FRCIR for databus and power**

FRCIR for databus and power applications.

**Applications**

- Intervehicle applications
- Databus applications

**VEAM FRCIR/VBN connector series with grounding system**

Grounding system to ground the connector shell.

**Applications**

- Air conditioning
- Lighting
- Converters

**Optical Products**

**Multi-channel Fiber Optic Connectors**

Typical applications in automation and control systems.

**Applications**

- Intervehicle applications
- CCTV equipment
- Entertainment

**VEAM PCB Optical Connections**

PCB version optical connection system according to DIN41612 STYLE E, 16 channels. Active contacts are removable for quick and easy repair.

**Applications**

- Power conversion control panel

---

## Rack and Panel

---

### ***Cannon Trident Multiway***

The Multiway range is an extremely reliable and robust series of rack and panel connectors. The design is based on the requirements of MIL-C-28748 and will accept any of the Trident signal or coax contacts. It is available in 6 arrangements ranging from 14 to 75 ways, together with a wide range of accessories and mounting hardware.

### ***Applications***

- Trackside signalling
- Test equipment

### ***VEAM Rack and Panel connector***

Push pull connector for power and signal applications. Typical applications in power conversion panels.

### ***Applications***

- Power conversion
- Power connections

---

## Junction Boxes

---

### ***Junction Box***

Junction box with CIR Connectors.

### ***Applications***

- Controls
- Tilting systems
- CCTV equipment

### ***Junction Boxes for Optical Connections***

### ***Applications***

- Controls
- Tilting systems
- CCTV equipment

---

## Signal Connectors

---

### ***VEAM FRCIR M12***

4 ethernet lines connector M12 type for harsh applications used in signal networks.

### ***Applications***

- Intervehicle connections
- Databus applications

### ***VEAM FRCIR for MVB lines***

FRCIR for MVB databus with shielding.

### ***Applications***

- Intervehicle connections
- Databus applications

### **VEAM FRCIR RJ45**

FRCIR with 2 RJ45 connector for ethernet applications.

### **Applications**

- Intervehicle connections
- Databus applications

### **VEAM D Sub WCML Series Backshell**

Backshell to connect the shield in D Sub series.

### **Applications**

- Internal signal lines
- Databus applications

### **Cannon Combo D Sub**

Combo D, D\*M connector series offers the advantages of an industry standard shield I/O interconnect, with the flexibility of a customized special, designed for any application.

### **Applications**

- Control systems
- Trackside signalling
- Communications equipment

### **Hermetic Connector**

High performance through-wall hermetic connector (vacuum: 6x10 x -3 bar Max. Ermeticity: <10 x-7 m bar l/sec. temperature range: -40°C +90° C)

### **Applications**

- GTO Control
- Power Conversion

---

## **Power Connectors**

---

### **VEAM FRCIR 290**

Circular bayonet connector for both power and data connections. IP67, waterproof.

### **Applications**

- Intervehicle power connections
- Motor supply

### **VEAM VPLABB Series**

Single pole power connector up to 660A for traction applications.

### **Applications**

- High current connections
- Power conversion

## Introducing the most versatile multipin connector in the world...

The **VEAM CIR Series** is the most versatile electrical, optical and pneumatic multipin connector available today. Designed originally for the hostile environment of Transit applications, CIR has earned acceptance in Military, Commercial, Medical, Geophysical, Entertainment, Nuclear, Aerospace. Ground support and comparable areas requiring nearly non-destructible cable or wire terminations.

The electrical design parameters of CIR were based on MIL-DTL-5015. However, its unique positive lock, quick disconnect coupling surpasses the environmental requirements of this military specification. To enhance service life, CIR connectors feature stainless steel anti-wear rings at the critical point of the receptacle coupling ramps. The CIR design has been adopted by NATO as the "standard connector for Ground Fighting Vehicles" and is used extensively in U.S. and European military programs: Based on standard VG 95234.

### **COAXIAL CIR**

Coaxial contacts for CIR arrangements accept most popular RG cables.

### **FIBEROPTIC CIR**

CIR connectors are available with single or multiple fiber termini.

### **FUEL RESISTANT CIR**

CIR inserts/grommets can be molded in Fluoroelastomer (Viton\*) for superior resistance to fuel oils, solvents and elevated temperatures.

### **HERMETIC CIR**

CIR connectors can be supplied with glass to metal seals in lieu of elastomeric inserts. A wide choice of wire terminations are available.

### **HIGH VOLTAGE**

High Voltage CIR connectors are available. For voltage ratings consult factory.

### **TWINAXIAL, TRIAXIAL CIR**

Size 4 or 8 contact cavities will accept these versatile contacts.

### **RFI/EMI CIR**

Unique grounding fingers on plug connectors provide superior plug to receptacle (360°) shield integrity.

### **THERMOCOUPLE CIR**

CIR connectors are available with various thermocouple material contacts including; chromel, alumel, copper, constantan and iron.

### **PNEUMATIC CIR**

Various insert arrangements with size 4, 8, or 12 cavities will accept pneumatic contacts to pass liquid or air - at pressures up to 110 PSI. Flow valves available.

### **FILTERED CIR**

Available with Tubular or Planar filter networks.

\*Trademark-DuPont

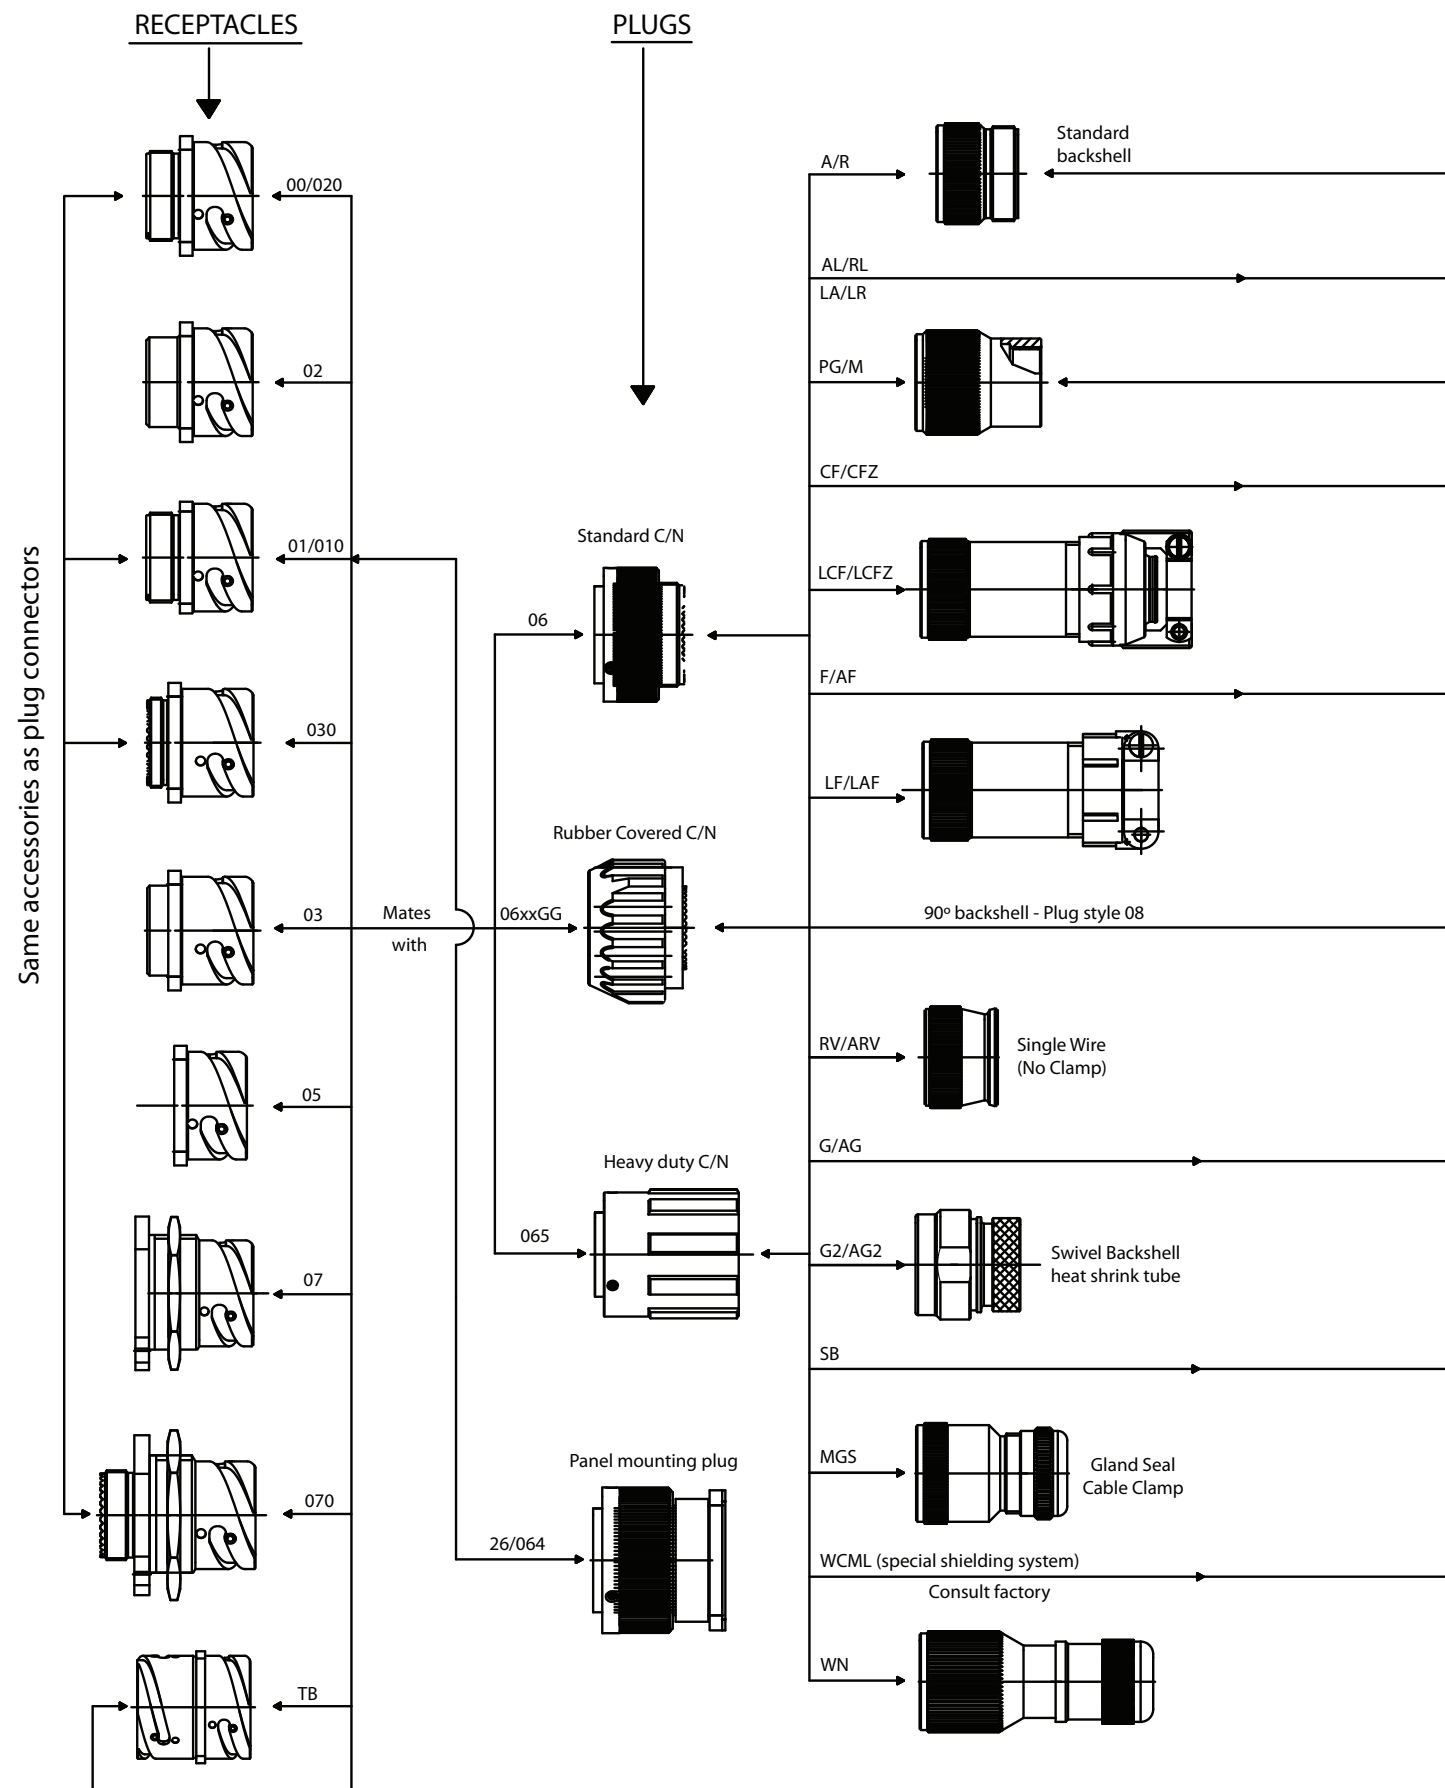

1. Quick coupling and uncoupling 120° coupling nut rotation.
2. High shock 50 g's and vibration resistance 20 g's - Lockwires not required.
3. No coupling threads to gall or bind due to wear or contamination
4. Audible, Visual, and Tactile indication of full coupling.
5. **Waterproof to 10 meters** (33 ft.)  
12 Hours (14.7 PSI)
6. **2,000 couplings min.**
7. Elastomer temperature ranges:
  - 55° C. to + 125° C. Neoprene
  - 55° C. to + 200° C. Silicone
  - 25° C. to + 200° C. Viton\*
  - 40° C. to + 125° C. FR (flame retardant)

### General Specifications

<b>Shell</b>	<b>Material:</b> Aluminum alloy. Options include stainless steel, bronze and plastic composite.
	<b>Finish:</b> Hard Black Anodize (T89), Non-cadmium (Green-T100), (Black-T108) Electroless Nickel (T29), Cadmium-olive drab (T3), Epoxyurethane Varnish (T39).
	<b>For other</b> materials and finishes, consult our Customer Service Department.
<b>Insert</b>	<b>Material:</b> Polychloroprene (Neoprene). Options include silicone, fluorocarbon (Viton*) and FR (Flame Retardant) rubber.
<b>Contacts</b>	<b>Material:</b> Copper alloy or thermocouple alloys.
	<b>Finish:</b> Silver (T9), gold (standard - T12, heavy -T112) and Rhodium plating.
<p><b>VEAM CIR Series Connectors</b> are produced in accordance with NATO Standard VG95234, which is based on MIL-DTL-5015 for physical size, layout and environmental requirements.</p>	
<p>* <i>Trademark-Dupont</i></p>	

Note: CIR connectors are available with cadmium free and lead free materials.

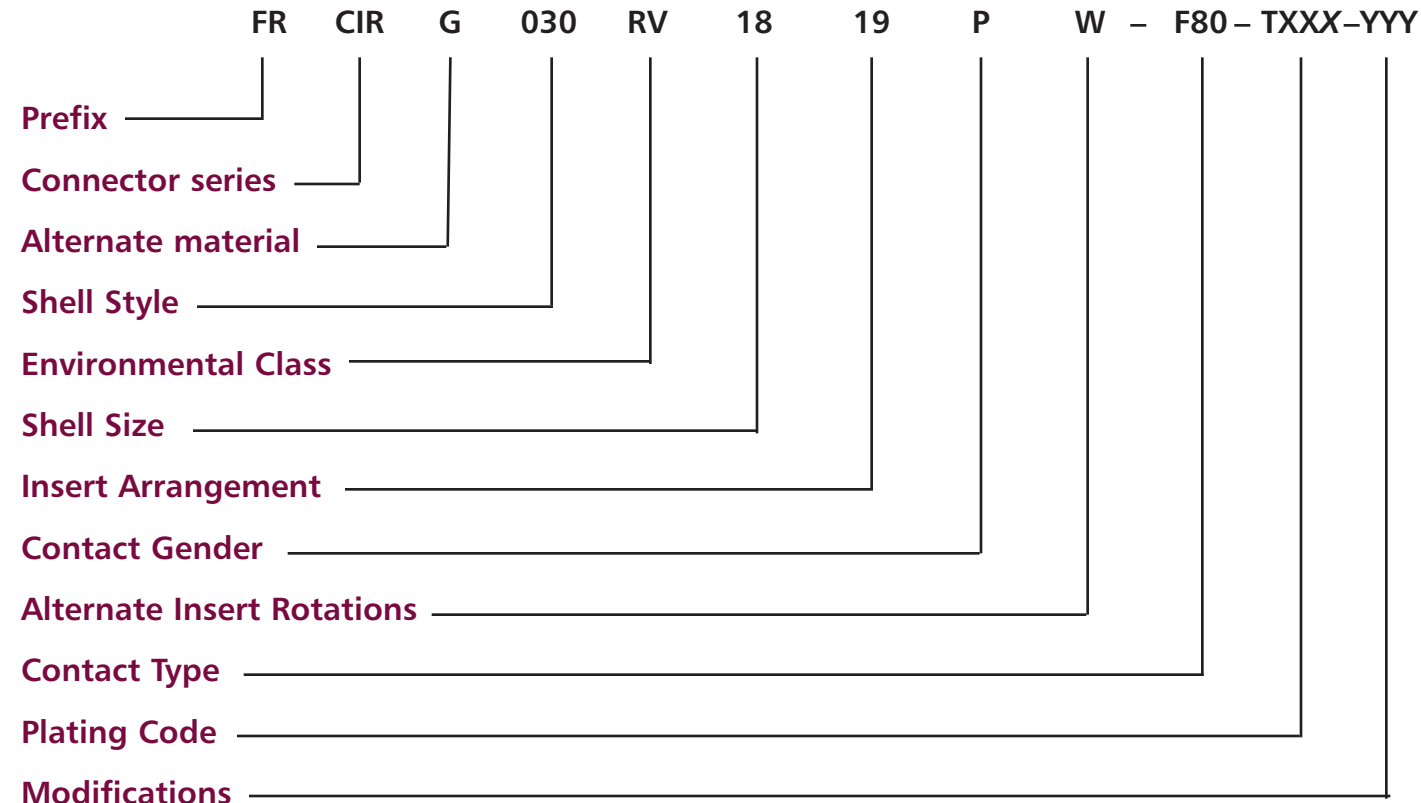

BACKSHELL AND ACCESSORIES

ADAPTERS AND CABLE CLAMPS

Standard Part Number Generation - Line Configurator

**PREFIX**

FR.....Flame retardant materials

## Connector and Contact Ratings

### Insert Arrangement Service Rating

Service Rating	Operating Voltage DC (at sea level)	Operating Voltage AC (at sea level)
I	250 V	200 V
A	700 V	500 V
D	1250 V	900 V
E	1750 V	1250 V
B	2450 V	1750 V
C	4200 V	3000 V

### Contact Rating

Contact Size		Maximum Current	Rated and Test Current	Potential Drop Millivolts Maximum
F80-CR1	CR	•		*
20	10	7.5 A	7.5 A	83 mV
18	-	10 A	7.5 A	83 mV
16-16S	15-15S	22 A	13 A	74 mV
12	25	41 A	23 A	63 mV
8	60-100	73 A	46 A	65 mV
4	160	135 A	80 A	58 mV
0	500	245 A	150 A	53 mV
4/0		350 A	225 A	53 mV

\* Applicable for short time

\* According to MIL-C-39029 D. Test with nickel-plated wire.

### Dielectric Strength (Standard at Sea Level Conditions)

Service Rating	Minimum Flashover ac rms	Test Voltage ac rms *
I	1.400 V	1.000 V
A	2.800 V	2.000 V
D	3.600 V	2.800 V
E	4.500 V	3.500 V
B	5.700 V	4.500 V
C	8.500 V	7.000 V

\* According to MIL-DTL-5015 the connectors do not show any signs of breakdown when the test voltage indicated in the table is applied for one minute between the two closest contacts and between the shell and any of the contacts to the shells

Shielding Characteristics

Recommended Current According to the Temperature

- 0 Contact size 0
- 4 Contact size 4
- 8 Contact size 8
- 12 Contact size 12
- 16S; 16 Contact size 16S; 16
- 20 Contact size 20
- Rated current with one contact loaded in a contact arrangement

**Backshell / Clamp Torque Forces**

Recommended Torque Forces Connector Backshells/Clamps			
Size	In. lb Min/Max	Size	In. lb Min/Max
10SL	26/31	22	87/104
14S	44/49	24	96/130
16	57/66	28	121/165
16S	57/66	32	130/182
18	61/69	36	165/235
20	69/87	40	182/347

**Contact Disengaging Force Meets  
or Exceeds MIL-C-39029**

Contact Size F80	Ounces	Newtons
18-20	.7	.19
16-16S	2.0	.56
12	3.0	.83
8	5.0	1.39
4	10.0	2.78
0	15.0	4.17
4/0*	15.0	4.17

\*Not included in MIL-Spec

Contact Size		Min. Disengaging Force
CR	CR1 and F80	N (Newton)
10	20	0,3
15-15S	16-16S	1
25	12	1,5
60-100	8	3
160	4	4
500	0	8,5

Separating force per contact  
The corresponding separating force has to be measured according to  
VG95319, part 2, test no. 5.7 using the required test gauge.

**CIR Coupling - Torque Values per VG95234**

The allowable coupling torques have to be tested under full bundle  
conditions of the connectors to VG95319, part 2 test no. 5.8.2

Shell Size	Allowable coupling torque closing and opening Nm max.	Opening Nm min.
10SL	1,7	0,15

\* Contact Customer Service Department if used with inserts 32A-1 or 36A-1.

### Male - Female Coaxial Contact used with F80 Inserts

Male - female coaxial contacts can be used on the CIR-TB connectors with inserts having size "8" contact cavities. Inserts are F80 type. To be mated with all "C8" types that are independent from the cable used.  
P/N - C8 - 142 PS.

### Coaxial Contacts Used With F80 Inserts

Coaxial contact in the table below are used in Size "12" contact cavities of F80 inserts. For electrical characteristics please consult factory.

Contact Type	Used with Cable	Ø A	Ø B	Ø C

### Classes For Terminating Individual Wires

**Mounting Hole Options** (refer to pages 173 & 174)

- FP Suffix**     Applicable for rear mount only.  
 Can be added to any class where the application requires the flange with thru mounting holes.  
 Example: CIR030RVFP-20-4P-F80 TABLE 1 (Refer to page 174)  
Note: If FP is not listed, the mounting holes are threaded (metric thread).
- UN Suffix**     Applicable for rear mount only.  
 Can be added to any class where application requires the flange with threaded holes.  
 Example: CIR030RVUN-20-4P-F80 TABLE 2 (Refer to page 174)

NOTE: Mounting holes are threaded (UN thread)
- FF Suffix**     Applicable for front mount only. Can be added to any class where application requires flange with threaded hole (metric thread).
- FS Suffix**     Applicable for front mount only. Can be added to any class where application requires the 90° chamfered mounting holes to prevent screws from interfering with the rubber covered coupling nut during the mating process. Used with metric screws.  
 Example: CIR00RVFS-20-4P-F80 TABLE 3 (Refer to page 174)
- FSM Suffix**    Applicable for front mount only. Can be added to any class where application requires the 82° chamfered mounting holes to prevent screws from interfering with the rubber covered coupling nut during the mating process. Used with UN screws.  
 Example: CIR00RVFSM-20-4P-F80 TABLE 3 (Refer to page 174)

	ARV CLASS.....Short backshell without grommet or provision for accessories	Non-environment proof.
	RV CLASS..... Short backshell with wire sealing grommet and compression ring. Refer to page 104 for dimensions	Environment proof.
	A CLASS..... Short backshell, no other accessories. R CLASS..... Same as A but includes wire sealing grommet and compression ring.	Non-environment proof. Environment proof.
	EXCEPTION: CIR020R, CIR07R includes shell, insert and contacts only (backshell hardware is not included). Refer to page 97 for dimensions.	
	AL/LA CLASS.....Long backshell, no other accessories. RL/LR CLASS.....Same as AL/LA but includes wire sealing grommet and compression ring. Refer to page 71 for dimensions.	Non-environment proof. Environment proof.

## Classes For Terminating Individual Wires

AF CLASS..... Short backshell, with A style clamp and bushing. Non-environment proof.  
 F CLASS..... Same as AF but includes wire sealing grommet. Environment proof.  
 and compression ring.  
 Refer to page 97 for dimensions.

LAF CLASS..... Long backshell with A style clamp and bushing. Non-environment proof.  
 LF CLASS..... Same as LAF but includes wire sealing grommet. Environment proof.  
 and compression ring.  
 Refer to page 78 for dimensions.

AG CLASS..... Includes the backshell suitable for heat shrink. Non-environment proof.  
 tubing.  
 G CLASS..... Same as AG but includes wire sealing grommet. Environment proof.  
 and compression ring.  
 Refer to page 98 for dimensions.

AG2 CLASS..... Includes the swivel backshell suitable for heat. Non-environment proof.  
 shrink tubing.  
 G2 CLASS..... Same as AG2 but includes wire sealing grommet. Environment proof.  
 Refer to page 99 for dimensions.

CIR06... CLASS.....	Short backshell without wire sealing grommet.	Non-environment proof.
ARV CLASS.....	Same as ARV but with rubber covered coupling nut.	Non-environment proof.
RV CLASS.....	Short backshell with wire sealing grommet and compression ring.	Environment proof.
RVGG CLASS.....	Same as RV but with rubber covered coupling nut. Refer to page 149 for dimensions.	Environment proof.

CIR06..straight CLASS.....	Straight short or 90° backshell, no other accessories.	Non-environment proof.
AGG CLASS.....	Same as A but with rubber covered coupling nut.	Non-environment proof.
R CLASS.....	Same as A but includes wire sealing grommet and compression ring.	Environment proof.
RGG CLASS.....	Same as R but with rubber covered coupling nut. Refer to page 144 for dimensions.	Environment proof.

AL/LA CLASS.....	Long backshell, no other accessories.	Non-environment proof.
ALGG/LAGG CLASS.....	Same as AL/LA but with rubber covered coupling nut.	Non-environment proof.
RL/LR CLASS.....	Same as AL/LA but includes wire sealing grommet and compression ring.	Environment proof.
RLGG/LRGG CLASS.....	Same as RL/LR but with rubber covered coupling nut. Refer to page 147 for dimensions.	Environment proof.

CIR06..straight CLASS.....	Straight short or 90° backshell with A style clamp and bushing.	Non-environment proof.
AFGG CLASS.....	Same as AF but with rubber covered coupling nut.	Non-environment proof.
F CLASS.....	Same as AF but includes wire sealing grommet and compression ring.	Environment proof.
FGG CLASS.....	Same as F but with rubber covered coupling nut. Refer to page 129 for dimensions.	Environment proof.

LAF CLASS.....	Long backshell with A style clamp and bushing.	Non-environment proof.
LAFGG CLASS.....	Same as LAF but with rubber covered coupling nut.	Non-environment proof.
LF CLASS.....	Same as LAF but includes wire sealing grommet and compression ring.	Environment proof.
LFGG CLASS.....	Same as LF but with rubber covered coupling nut. Refer to page 138 for dimensions.	Environment proof.

## Classes For Terminating Individual Wires

CIR06..straight CIR08...90°

- AG CLASS..... Includes a backshell that is suitable for heat shrink tubing. Non-environment proof.
- AGGG CLASS..... Same as AG but with rubber covered coupling nut. Non-environment proof.
- G CLASS..... Same as AG but includes wire sealing grommet and compression ring. Environment proof.
- GGG..... Same as G but with rubber covered coupling nut. Environment proof.  
Refer to page 135 for dimensions.

CIR06..straight CIR08...90°

- AG2 CLASS..... Includes positively locked backshells with the swivel coupling nut and for use with heat shrink tubing. Non-environment proof.
- AG2GG CLASS..... Same as AG2 but with rubber covered coupling nut. Non-environment proof.
- G2 CLASS..... Same as AG2 but includes wire sealing grommet. Environment proof.
- G2GG CLASS..... Same as G2 but with rubber covered coupling nut. Environment proof.  
Refer to page 131 for dimensions.

CIR064PP/CIR26

- PP CLASS..... Plug that includes a square flange for panel mount. Environment proof if used with panel sealing gasket.  
No rear threads for accessories.  
Refer to page 175 for dimensions.

Classes For Terminating Jacketed Cable

Mounting Hole Options (refer to pages 179 & 180)

FP Suffix	<p><u>Applicable for rear mount only.</u>                  Can be added to any class where the application requires the flange with thru mounting holes.                  Example: CIR030RVFP-20-4P-F80 TABLE 1 (Refer to page 180)                  Note: If FP is not listed, the mounting holes are threaded (metric thread).TABLE 2 (Refer to page 180)</p>
UN Suffix	<p><u>Applicable for rear mounting only.</u>                  Can be added to any class where application requires the flange with threaded holes.                  Example: CIR030RVUN-20-4P-F80 TABLE 2 (Refer to page 180)                  NOTE: Mounting holes are threaded (UN thread)</p>
FF Suffix	<p><u>Applicable for front mounting only.</u> Can be added to any class where application requires flange with threaded holes (metric thread).</p>
FS Suffix	<p><u>Applicable for front mount only.</u> Can be added to any class where application requires the 90° chamfered mounting holes to prevent screws from interfering with the rubber covered coupling nut during the mating process. Used with metric screws.                  Example: CIR00RVFS-20-4P-F80 TABLE 3 (Refer to page 180)</p>
FSM Suffix	<p><u>Applicable for front mount only.</u> Can be added to any class where application requires the 82° chamfered mounting holes to prevent screws from interfering with the rubber covered coupling nut during the mating process. Used with UN screws.                  Example: CIR00RVFSM-20-4P-F80 TABLE 3 (Refer to page 180)</p>

CF CLASS.....	Straight short backshell with C style clamp.	Environment proof.
CFZ CLASS.....	Same as CF but includes wire sealing grommet and compression ring.	Environment proof.

LCF CLASS.....	Long backshell with C style clamp.	Environment proof.
LCFZ CLASS. ....	Same as LCF but includes wire sealing grommet and compression ring.	Environment proof.

## Classes For Terminating Jacketed Cable

SL

- SL CLASS..... Long metal backshell with non-metallic fitting with PG thread. Environment proof.
- SL1 CLASS..... Same as SL but includes wire sealing grommet and compression ring. Environment proof.

SLX

- SLX CLASS..... Same as SL but with non-metallic spiral fitting with PG thread (to prevent sharp angle bending). Environment proof.

- LC CLASS..... Long LC backshell with internal adapter suitable for various sizes of cable, grommet, compression ring and cord grip included. Environment proof.
- LC3 CLASS..... Same as LC but with rubber covered coupling nut. Environment proof.
- LCG CLASS..... Same as LC but without the wire sealing grommet and compression ring. Environment proof.

- WN/WK CLASS..... Long WK backshell and backnut assembly suitable to seal and grip on the jacket of the cable. Environment proof.
- WN/WKG CLASS..... Same as WK but with wire sealing grommet and compression ring. Environment proof.

### Classes For Terminating Jacketed Cable

CF CLASS.....	Straight short or 90° backshell with C style clamp.	Environment proof.
CFGG CLASS.....	Same as CF but with rubber covered coupling nut.	Environment proof.
CFZ CLASS.....	Same as CF but includes wire sealing grommet and compression ring.	Environment proof.
CFZGG CLASS.....	Same as CFZ but with rubber covered coupling nut.	Environment proof.

LCF CLASS.....	Long backshell with C style clamp.	Environment proof.
LCFGG CLASS.....	Same as LCF but with rubber covered coupling nut.	Environment proof.
LCFZ CLASS.....	Same as LCF but includes wire sealing grommet and compression ring.	Environment proof.
LCFZGG CLASS...	Same as LCFZ but with rubber covered coupling nut.	Environment proof.

SL CLASS.....	Long metal backshell with non-metallic fitting with PG thread.	Environment proof.
SLGG CLASS.....	Same as SL but with rubber covered coupling nut.	Environment proof.
SL1 CLASS.....	Same as SL but includes wire sealing grommet and compression ring.	Environment proof.

SLX CLASS.....	Same as SL but with non-metallic spiral fitting with PG thread (to prevent sharp angle bending).	Environment proof.

## Classes For Terminating Jacketed Cable

- |                  |                                                                                                                |                    |
|------------------|----------------------------------------------------------------------------------------------------------------|--------------------|
| LC CLASS.....    | Long LC backshell with internal adapter suitable for various sizes of cable, grommet and a cord grip included. | Environment proof. |
| LCGG CLASS.....  | Same as LC but with rubber covered coupling nut.                                                               | Environment proof. |
| LCG CLASS.....   | Same as LC but without the wire sealing grommet and compression ring.                                          | Environment proof. |
| LCGGG CLASS..... | Same as LCG but with rubber covered coupling nut.                                                              | Environment proof. |

- |                   |                                                                                              |                    |
|-------------------|----------------------------------------------------------------------------------------------|--------------------|
| WK CLASS.....     | Long WK backshell and backnut assembly suitable to seal and grip on the jacket of the cable. | Environment proof. |
| WN/WKG CLASS..... | Same as WK but with wire sealing grommet and compression ring.                               | Environment proof. |
| WK3 CLASS.....    | Same as WK but with rubber covered coupling nut.                                             | Environment proof. |

### Classes For Terminating Braided Shield

Receptacles

Plugs

**SB CLASS**..... Straight or 90° backshell with the swivel coupling nut and adapter suitable for use with heat shrink tubing or boot. The shield is terminated and secured with the wire prior to tightening the backnut. Wire sealing grommet is included. Recommended to use with RFI fingers in CIRG06SB/CIRG08SB. Environment proof.

**ASB CLASS**..... Same as SB but without the grommet . Environment proof.

**SBT CLASS**.... Similar to SB but the backshell includes a knurled extension for the shield termination via tincl lock ring (not supplied). Environment proof.

**ASBT CLASS**... Same as SBT but without the grommet . Refer to page 106 for receptacle dimensions. Refer to page 152 for plug dimensions. Environment proof.

**WCML**.....Consult Factory

**WK1 CLASS**... Long WK backshell, grommet and backnut assembly suitable for shield termination and strain relief of jacket. Environment proof. Refer to page 108 for receptacle dimensions. Refer to page 152 for plug dimensions.

Classes For Terminating Conduit

EF TYPE ANACONDA SEALTITE CONDUIT

- RK CLASS..... Straight long or 90° RK backshell with adapter and backnut assembly to seal and grip on the jacket of a steel core flexible EF type Anaconda sealTite conduit. Class includes a wire sealing grommet and compression ring. Environment proof.
- ARK CLASS..... Same as RK class but without the wire sealing grommet and compression ring. Environment proof.
- RKGG CLASS..... Same as RK but with rubber covered coupling nut (applicable for plugs only). Refer to page 103 for receptacle dimensions. Refer to page 142 for plug dimensions. Environment proof.

CNP TYPE ANACONDA SEALTITE CONDUIT

- NM CLASS..... Straight long or 90° NM backshell with adapter and backnut assembly to seal and grip on the jacket of a non-metallic flexible CNP type Anaconda sealTite conduit. Class includes a wire sealing grommet and compression ring. Environment proof.
- NMG CLASS..... Same as NM but without the wire sealing grommet and compression ring. Environment proof.
- NMGG CLASS.... Same as NM but with rubber covered coupling nut (applicable for plugs only). Refer to page 139 for plug dimensions. Environment proof.

## Classes For Terminating Conduit

**FLEXIBLE RUBBER HOSE**  
 BC CLASS..... Long metal backshell with the rear lip suitable for Flexible rubber conduit (hose) being secured to the backshell by a metal band or a hose clamp. Environment proof.  
 Refer to page 139 for plug dimensions.

**FLEXIBLE RUBBER HOSE**  
 LP CLASS..... Similar backshell to BC but with extended rear for the mechanical strain relief of individual wires within the conduit. Flexible rubber conduit (hose) is being secured to the backshell by a metal band or a hose clamp. Environment proof.  
 Refer to page 138 for plug dimensions.

**ELECTRI-FLEX CONDUIT**  
 CMEG CLASS..... Includes the backshell hardware suitable for flexible metal core Electri-flex conduit Class includes a wire sealing grommet and compression ring. Environment proof.  
 Refer to page 126 for plug dimensions.

**PMA CONDUIT**  
 PIRAG CLASS..... Suitable for PMA Conduit via BVIRA fitting. Environment proof.  
 PIRB CLASS..... Suitable for PMA Conduit via BVIRB fitting. Environment proof.  
 PIVG CLASS..... Suitable for PMA Conduit via BVIVG fitting. Environment proof.  
 PIJ CLASS..... Suitable for PMA Conduit via BFILJ fitting. Environment proof.  
 Refer to page 140 for plug dimensions

Receptacle with through mounting holes and backshell. For threaded and countersunk mounting holes type, see page 197.  
R type has individual wire sealing grommet.

Dimensions are mm. over inches

Receptacle with through mounting holes, individual wire sealing grommet, special backshell for shield braid termination (for shielding characteristics, see page 12). To be used with heat shrinkable tubing. For threaded and countersunk mounting holes, see page 197. ASB type has no wire sealing grommet.

\* Nominal dimension with tightened backshell  
Dimensions are mm. over inches

Inline receptacle for terminating jacketed cable. Long LC backshell with internal adapter suitable for various sizes of cable, grommet, compression ring and a cord grip included. LCG same as LC but without the wire sealing grommet and compression ring.

\*Dimension "L" will vary from the value indicated with escalating or de-escalating backshells and some special insert configurations. Verify with our Customer Service Department.

\* Nominal dimension with tightend backshell  
Dimensions are mm. over inches

Inline receptacle for terminating braided shield. Straight backshell with a swivel coupling nut and adapter suitable for use with heat shrink tubing or boot. The backshell includes a knurled extension for the shield termination via a tinell lock ring (not included). ASBT same as SBT but without a grommet.

Dimensions are mm. over inches

Inline receptacle for terminating braided shield. Long WK backshell, grommet, and backnut assembly suitable for shield termination and strain relief on the jacket of the cable.

\*Dimension "L" will vary from the values indicated with escalating or de-escalating backshells and some special insert configurations. Verify with our Customer Service Department.

Dimensions are mm. over inches

Receptacle with threaded mounting holes for terminating conduit. Straight long RK backshell with adapter and backnut assembly to seal and grip on the jacket of a steel core flexible EF type Anaconda sealtite conduit. A wire sealing grommet and compression ring is included. ARK same as RK but without a grommet or compression ring.

Note: Dimension "L" is dependent on conduit size used with each shell size. Please consult our Customer Service Department.

\* Nominal dimension with tightend backshell  
Dimensions are mm. over inches

Receptacle with threaded mounting holes for terminating braided shield. Straight backshell with a swivel coupling nut and adapter suitable for use with heat shrink tubing or boot. The backshell includes a knurled extension for the shield termination via a tinell lock ring (not included). ASBT same as SBT but without a grommet.

Dimensions are mm. over inches

Receptacle with threaded mounting holes for terminating jacketed cable. Long WK backshell and backnut assembly suitable to seal and grip on the jacket of the cable. WKG same as WK but includes a wire sealing grommet and compression ring.

\*Dimension "L" will vary from the values indicated with escalating or de-escalating backshells and some special insert configurations. Verify with our Customer Service Department.

\* Max permissible outside diameter of cable  
Dimensions are mm. over inches

Plug for terminating flexible rubber hose. Similar to the BC class but with an extended rear for the mechanical strain relief of the individual wires within the conduit. Flexible rubber conduit (hose) is being secured to the backshell by a metal band or hose clamp.

Note: Dimension "L" is dependent on conduit size used with each shell size. Please consult our Customer Service Department.

CIR064PP

Square flange mounting with four through holes. Environment proof with proper sealing gasket.

Type FR- Flame retardant: 55 shore. *Consult Factory*  
 Type N - Neoprene: 80 shore. *Consult Factory*  
 Type S - Silicone: 75 shore. *Consult Factory*  
 Type NS - Silicone Black Conductive. *Consult Factory*  
 Thickness - 0.5 ± 0.2

Type F - Viton\*: 80 shore. *Consult Factory*  
 Thickness - 0.8 ± 0.2 mm

Type SC - Silicone, black, conductive,  
 nickel graphite filler.  
 Tin plated for RFI shielding.  
 Thickness - 0.5 ± 0.2 mm.

Operating Temperature

- 55° C. to 125° C. - Neoprene
- 55° C. to 200° C. - Silicone
- 25° C. to 200° C. - Viton\*
- 40° C. to 125° C. - Flame Retardant.

Specifications and dimensions subject to change  
 Dimensions shown in mm.

**Cable Clamp  
MS 3057-XXA**

Concentric cable clamps. They insure strain relief and central location of the cable. Can be used with bushing MS 3420.

"A" Style Clamp With Bushing

**Bushing  
MS 3420 - XX**

Bushing of synthetic rubber to be used with cable clamps MS 3057 A for protection of the cable or wires. These bushings can be telescoped for smaller cable diameters.

Waterproof clamp for jacketed cables.  
Provides mechanical strain relief plus  
concentric clamping over a wide range  
of cable sizes.

A rubber gland seal ensures a  
waterproof seal on the cable jacket.

Note: Other materials available.

A43240 Removal Kit

Assembly manual available upon request.

**WARNING**

Tooling & Handling: Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

\*For solder contacts use TIP P/N SD46151-4T50 and SD46151-0T50.

Assembly manual available upon request.

**WARNING**

Tooling & Handling: Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

TENSILE STRENGTH AND MILLIVOLT DROP MEASUREMENTS MEET THE REQUIREMENTS OF MIL- C-39029, MIL-C-22520, MIL-T-7928 AS APPLICABLE.

### Pneumatic Power Crimping Tool

#### Model 400B HD

This lightweight (16 lbs.) crimping tool will crimp pin and socket contacts as well as solderless terminals. Non-adjustable dies are available to accommodate wires ranging from 16AWG through 4AWG. The four-indent crimp jaws provide a perfect gas tight crimp every time, maximizing wire-contact pull-out forces. Locators are available for every CIR series contact.

The Model 400B HD Power Crimp Tool is excellent for high production runs of small gauge contacts.

Operating Air pressure: 100-120 PS    Size: 4" O.D. x 12<sup>3/4</sup>" Long  
Bench mounting version is standard. Foot pedal # 104 available.  
For large contacts and terminals use our Model 500D Tool.

This tool is available from Pico Corporation

Phone: (805) 388-5510  
Fax: (805) 482-4038

### Pneumatic Power Crimping Tool

#### Model 500D

This power crimping tool will handle pin and socket contacts plus lug terminals (insulated or non-insulated) in all sizes ranging from 8AWG to 250 MCM. Bench mounting version is standard. Foot pedal #105 available.

Consult our factory for foot pedal accessories.

Shipping weight: 45 lbs. approximate.

Operating Air pressure: 100-120 PSI.

This tool is available from Pico Corporation

Phone: (805) 388-5510  
Fax: (805) 482-4038

## TOOL KITS FOR CONNECTOR ASSEMBLY

## Deluxe Model Assembly Kit

The VEAM Model DMC 292 M is housed in a case with die cut poly-foam compartments to nest each tool. A complete set of connector assembly instructions is laminated in plastic and stored within the tool case for easy access.

Description

- |                    |
|--------------------|
| Crimp Tool Frame   |
| Turret             |
| Inspection Gauge   |
| Wrench             |
| Insertion Tool     |
| Insertion Tool     |
| Removal Tool Kit   |
| Wire Cutter        |
| Wire Stripper      |
| Mini Strap Wrench  |
| Assembly Manual CD |
| Guide Pin Size 16  |
| Guide Pin Size 12  |
| Carrying Case      |

**▲ WARNING**

Tooling & Handling: Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

### DSR Series

Double start, ratcheted coupling, electrical connectors with durable hard anodized finish. Utilizes same insert arrangements and accessories as the CIR Series.

### CIR 290 Series

A circular bayonet connector for railroad applications. Power contacts, data bus communications, waterproof. IP 67

### CIR 295 Series

A bayonet circular connector for railroad applications. Rigid insulator, contacts with retention clips.

### VPT Series per MIL-C-26482

Miniature bayonet connectors with 1 to 61 solder or crimp contacts. Available in different classes, for numerous applications.

### CIR\_\_FR Series

Rugged hard black anodized finish, available with extended coupling nuts for better gripping. Uses metal or composite backshells. Various types of strain relief accessories are available.

## VRPC

Lightweight, plastic connector for the Mass Transit, Offroad and Industrial markets that is qualified for the NFF 16-101, NFF 16-102 for fire and smoke resistance.

## Powerlock

Single pole power connectors, 400 A, 660 A. Waterproof. Color coded and keyed for three phases, neutral and earth.

## VSC

Threaded circular connector; 7 and 19 solder or crimp contacts. Socapex compatible. Ground contacts. Metal backshell and grounding feature.

## Snaplock

Single pole connectors for power applications up to 200 Amps. Typically used with cable 25/35/50 sq.mm.

## Product Safety Information

### 1. MATERIAL CONTENT AND PHYSICAL FORM

Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups.

a) Printed circuit types and low cost audio types which employ all plastic insulators and casings.

b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic or glass insulating materials. Contact materials vary with type of connector and also application and are usually manufactured from either: Copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be specified.

### ⚠ CAUTION

### 2. FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD

There is no fire hazard when the connector is correctly wired and used within the specified parameters.

Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionization and burning. Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire. Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the product Data Sheet/Catalog are exceeded and can cause breakdown of insulation and hence electric shock. If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonization of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

### 3. HANDLING

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers.

Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to instal-

lation/use and rejected if found to be damaged.

### 4. DISPOSAL

Incineration of certain materials may release noxious or even toxic fumes.

### 5. APPLICATION

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30 V ac or 42.5 V dc are potentially hazardous and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths. Always use the correct application tools as specified in the Data Sheet/Catalog. Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate national regulations.

### IMPORTANT GENERAL INFORMATION

(i) Air and creepage paths/Operating voltage. The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations. For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

#### (ii) Temperature

All information given are temperature limits. The operation temperature depends on the individual application.

#### (iii) Other important information

Cannon continuously endeavors to improve their products. Therefore, Cannon products may deviate from the description, technical data and shape as shown in this catalog and data sheets.

ITT Interconnect Solutions, is a business unit of ITT Corporation which manufactures the highest quality products available in the marketplace; however these products are intended to be used in accordance with the specifications in this publication. Any use or application that deviates from the stated operating specifications is not recommended and may be unsafe. No information and data contained in this publication shall be construed to create any liability on the part of Cannon. Any new issue of this publication shall automatically invalidate and supersede any and all previous issues.

### Product Warranty

A limited warranty applies to Cannon products. Please refer to [www.ittcannon.com](http://www.ittcannon.com) (General Terms of Sale) for the complete text of Cannon's applicable Terms and Conditions, including Warranty.

This publication is not to be construed as an offer. It is intended merely as an invitation to make an offer. By this publication, Cannon does not assume responsibility or any liability for any patent infringements or other rights of third parties which may result from its use.
