# CA Bayonet / VG95234 Connectors

**ITT**

ENGINEERED FOR LIFE

---

# Proven Quality, Reliability & Expertise

ITT's Interconnect Solutions' Cannon brand is a leading global manufacturer of connector products serving international customers in the aerospace and defense, medical, energy, transportation and industrial end markets.

Whether delivering critical specs to aircraft pilots, streaming data through communications satellites or giving expectant parents a first look at their unborn children, Cannon connects the world's most important information to the people who need it.

**In 2015, Cannon celebrated 100 years that helped make history.** Cannon products were used in the first "talking" movies and helped transmit the first messages home from the moon. Today we proudly continue our legacy of innovating to connect the world and inspire the successes of the next century – **because amazing things happen when great things connect.**

## About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life.

Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in a total of approximately 125 countries. The company generated 2014 revenues of \$2.7 billion. For more information, visit [www.itt.com](http://www.itt.com).

# Introduction to CAB/VG95234

Cannon CA Bayonet series was designed in accordance with the VG95234 specification. This versatile and highly reliable connector series is an improvement on the well established MIL-C-5015 series. CA-Bayonet has a proven “reverse bayonet” coupling design that offers exceptional vibration protection, by a simple 120° turn.

Initially designed for aircraft and airborne applications, these rugged connectors are used in the electrical equipment of various off-road vehicles, construction machinery, industrial devices, railroad and military vehicles.

## Advantages

- rugged shell design
- waterproof up to IP68, (10 meters / 35 feet or 1 bar for 16 h) and IP69k (water jet)
- environmental protection
- bayonet coupling for easy mating and unmating
- vibration proof

Cannon has the complete VG95234 program available and, in addition, many other types which exceed the requirements of VG95234 and MIL-C-5015.

## Attention

Metal shell connectors which may be accessed are not suitable for mains power.

## Connector Design & Features

### Robust design

- Rugged aluminium shell for most severe conditions
- Bayonet coupling with rigid stainless steel roller bolts for fast and reliable mating (min. 500 cycles)
- An audible sound and a colour-marked snap-in position ensure additional coupling security

### Contact arrangements & accessories

- Over 140 arrangements and 12 connector sizes available for 1 to 65 circuits
- Wide selection of end bells for individual wires & jacketed cables
- Choice of accessories e.g. seals, gaskets, dust caps, wire hole fillers

### VG & commercial offering

- Connector offering according VG95234 standard – fully approved VG portfolio as required for military applications
- Extended offering of additional connector versions and endbell solutions for typical industrial applications

### Contact offering

- Contacts provide at least 500 mating cycles
- Contacts available as crimp, solder or PCB versions
- Gold plated contacts available for low current applications
- Crimp and assembly tooling available for all contact sizes

### Environmental protection

- Cadmium as standard, high performance plating 500h salt spray, highly conductive
- Cadmium & ChromVI free alternatives for RoHS applications
  - > ZnNi Blue grey A240 plating for 500h salt spray resistance and highly conductive
  - > ZnCo Black A232 plating, for 200h salt spray resistance, conductive
  - > ZnCo Green A233 plating, for 200h salt spray resistance and highly conductive
  - > ZnCo Black A239 plating, VG approved military plating, 48h salt spray and highly conductive
- IP67 pressure water & IP69k water jet sealing

### Insulators / grommets

- Made of high quality polychloroprene for temperature range -55/125°C (-67/+257°F)
- Material is self-extinguishing
- Resistant against hydraulic fluids, jet fuel, diesel fuel, gasoline, lubricants, brake and fire extinguisher fluids

---

## Technical Data

### Contact rating at 20 °C (+68 °F) acc. to VG95234

Contact size	Max. current A
10	8
16S/15S	22
16/15	22
12/25	41
8/60/100	74
4/160	135
0/500	245

### Current rating

Reference values based on measurements from a single pair of contacts.

### Contact resistance

(Millivolt test)

The contact resistance has to be tested according to VG95234 part 2, test no. 5.10.1 and VG 95210, part 37.

Contact size Metric	AWG	Max. contact resistance mΩ
10	–	12
15S/15	16S/16	6
25	12	3
60/100	8	1
160	4	0,5
500	0	0,2

### Insulation resistance

Acc. to VG95319, part 2, test no. 5.12 and VG95210, part 32, test condition B

Standard insulator material > 1000 MΩ

FKM insulator material (upon request) > 5000 MΩ

### Test voltage

Acc. to VG95319, part 2, test no. 5.13 and VG 95210, part 31  
Test voltage for service rating:

Service rating	Test voltage $V_{rms}$
Instruments	1050
A	2000
B	4500
D	2500
E	3500

### Air and creepage paths (min.)

Voltage class	Instr.	A	D	E
Air and creepage paths mm	0,7	1,1	2,8	4,8

### Operating voltage and connector usage

Operating voltage for CA Bayonet / VG95234 connectors is limited to 50VAC / 75VDC according to the safety regulations defined in the European Low Voltage Directive (LVD) 2014/35/EU.

For other uses or regions please see appropriate regional regulations.

Dimensions shown in mm  
Specifications and dimensions subject to change

## Mechanical Features

### Ambient temperature

Standard insulator material  
-55°/125°C (- 67/257°F)

### FKM insulator material\*

-30°/200°C (- 22/392°F)

### Safety provisions\*\*

In mated condition

General (all connectors):  
IP67 acc. to ISO20653

VG 95234 Connectors:  
1 bar for 16h

IP69K Version Connectors:

Plug with Universal Endbell and receptacle with o-ring  
IP68 (1bar for 16h); IP69K (Jet water sealed) acc. to ISO20653

### Vibration test

200 m/s<sup>2</sup> at 10 to 2000 Hz

### Mating cycles

500 min.

### Withdrawal force per contact

The corresponding separating force has to be measured according to VG95319, part 2, test no. 5.7. using the required test gage and DIN EN60512-16-5.

Contact size Metric	AWG	Separating force min N	Gage
10	-	0,3	G 0,99
15S/15	16S/16	1,0	G 1,56
25	12	1,5	G 2,36
60/100	8	3,0	G 3,58
160	4	4,0	G 5,69
500	0	8,5	G 9,04

### Gauge

(see also VG95234, Part 1)

Gauge	Contact diameter d +0,01	L -1
G 0,99	0,99	7
G 1,56	1,56	9
G 2,36	2,36	12
G 3,58	3,58	13
G 5,69	5,69	13
G 9,04	9,04	13

Dimensions shown in mm

Specifications and dimensions subject to change

## Coupling torque

The allowable coupling torques have to be tested under full bundle conditions of the connectors to VG95319, part 2, test no. 5.8.2.

Shell Size	Allowable coupling torque closing and opening Nm max.	Opening Nm min.
10SL	1,7	0,15
12S	2,5	0,23
14S	3,6	0,35
16S/16	5,5	0,46
18	8	0,58
20	9	0,7
22	11	0,8
24	14	0,8
28	17	0,92
32	19	1,03
36	23	1,03

## Contact retention

The contact retention has to be tested according to VG95319, part 2, test no. 5.4. Test force direction = Mating direction.

Contact size	AWG	Test force N
10	-	30
15S/15	16S/16	35
25	12	55
60/100	8	80
160	4	90
500	0	95

## Materials

### Shell - Aluminum alloy

Standard finishes

Cadmium (A66) VG approved,, 500h salt spray, highly conductive  
ZnCo black (A239) RoHS, VG approved, 48h salt spray, highly conductive

ZnNi blue grey (A240) RoHS, 500h salt spray, highly conductive

ZnCo black (A232) RoHS, 200h salt spray, conductive

ZnCo green (A233) RoHS, 200h salt spray, highly conductive

### Insulator and grommets

Polychloroprene (Standard)

FKM (High temperature)

### Contacts - Copper alloy

Standard finish - Hard silver

Special finish - A176 nickel and hard gold plating

\* consult factory for availability

\*\* Longitudinal sealing: The connector is not sealed against fluids entering through the cable, as the sealing lips of the single wire sealing are pressing against the jacket of the individual conductors.

Only solutions as PG or ME adapters as well as universal endbell provide for longitudinal sealing provided that both ends of the cable are sealed correctly.

## Mounting Holes

Mounting holes for wall mounting receptacles style A, B1, B2, C1, C2, J1, J2, N1 and N2 acc. to VG95234, or CA 3100E/F/R-B and CA 3102 E-B.

Shell size	ø d1 (H12*)		ø d2 (H13*)		E ±0,15	Screws to be used	
	Style A CA 3102E-B	Style B1, B2 C1, C2, J1, J2 N1, N2 CA 3100E, F, R-B	Style A, B2, C2, J2, N2 CA-B Mod-05	Style B1, C1, J1, N1 CA 3100E, F, R-B		A, B2, C2, J2, N2 CA-B-Mod. 05	B1, C1, J1, N CA 3100E, F
10SL	16,4	18,5	3,4	4,5	18,2	M3...ISO 1580	M4...ISO 1207
12S	16,4	21,7	3,4	4,5	20,6	M3...ISO 1580	M4...ISO 1207
14S	19,7	24,9	3,4	4,5	23,0	M3...ISO 1580	M4...ISO 1207
16S	22,9	27,7	3,4	4,5	24,6	M3...ISO 1580	M4...ISO 1207
16	22,9	27,7	3,4	4,5	24,6	M3...ISO 1580	M4...ISO 1207
18	26,1	31,1	3,4	4,5	27,0	M3...ISO 1580	M4...ISO 1207
20	29,5	34,5	3,4	4,5	29,4	M3...ISO 1580	M4...ISO 1207
22	32,7	37,8	3,4	4,5	31,8	M3...ISO 1580	M4...ISO 1207
24	36,0	41,3	3,9	4,5	34,9	M3,5...ISO 1580	M4...ISO 1207
28	42,0	47,1	3,9	5,5	39,7	M3,5...ISO 1580	M5...ISO 1207
32	48,3	53,8	4,5	5,5	44,5	M4...ISO 1580	M5...ISO 1207
36	54,6	60,0	4,5	5,5	49,2	M4...ISO 1580	M5...ISO 1207

When used with safety elements the max. outer diameter must not exceed the outer diameter of the screw head.

\*Drilling tolerances according to DIN ISO 286.

## Harnessing

VG95234 connectors are designed for single wire harnessing. Full sealing will be guaranteed only by using wires in accordance with MIL-W-5086, LN 9251 (for AWG) and VG 95218-20 and TL 6145-011 (for metric wires). All other wires have to conform to wire and insulation diameters with the data given in the following table:

Contact size		Crimp- and solder contacts		Insulation Ø	
AWG	Metric mm	AWG	Metric mm <sup>2</sup>	AWG	Metric mm
-	10	-	0,75-1,0	-	1,45-2,5
16S/16	15S/15	16	0,75-1,5	1,6-2,8	1,60-2,8
12	25	12	2,5	2,9-3,5	2,9-3,5
-	60	-	6,0	-	3,5-4,9
8	100	8	10,0	4,2-5,8	5,5-6,5
4	160	4	16,0	6,2-9,0	7,1-9,0
0	500	0	50,0	10,5-13,0	10,5-13,0

## Wire Stripping

Either mechanical or hot stripping can be used. Prevent conductor or insulator damage. For solder contacts, conductors have to be pretinned.

Note: Do not twist conductors used with crimp contacts. Do not touch uninsulated conductors before crimping. Twisting of conductors and grease or lubricants on the wires cause poor crimp quality.

Contact size	Stripping length mm	
AWG	Metric	
-	10	4,0 + 0,4
16S/16	15S/15	6,0 + 0,5
12	25	6,0 + 0,5
8	60/100	11,0 + 0,8 - 0,4
4	160	11,0 + 0,8 - 0,4
0	500	13,0 + 0,8 - 0,4

Dimensions shown in mm  
Specifications and dimensions subject to change

## Separating and Mounting Dimensions

When using connectors according to VG95234 the below mentioned installation dimensions have to be met.

### Connector style D or

CA3106E-B and CA3106F-B CA3106F-B-13/-14/-15

Connector style G, M, R1 or CA3106E-B-02/-03/-06  
CA3106E-B-13/-14/-15 and CA3106E-B-32 with shrink  
boot, straight, acc. VG95343

### Connector style E, E1 and K or

CA3108E/F-B and CA3108F-B-13/-14/-15

Connector style G, M, R1 or CA3106E-B-02/-03/-06  
CA3106E-B-32 with shrink boot 90° acc. to VG 95343

Shell size	L1 (D) min.	L2 (G/M) min.	L3 min.	(G/M) min.	L4 R1 +10 mm	L5 max	L6 max
10SL	70	70	70	65	75	8,0	3,5
12S	70	75	75	70	80	8,0	3,5
14S	70	75	75	70	80	8,0	3,5
16S	70	90	80	80	90	8,0	3,5
16	80	100	90	90	100	6,5	3,5
18	90	100	90	90	100	8,0	3,5

## How to order

### VG Order reference

## Explanation

### Series

VG95234

### Shell style

J1, J2, N1, N2, S1, U1, U2 – wall mounting receptacle  
 F, V – cable connection receptacle  
 A, B1, B2 – box mounting receptacle  
 C1, C2 – bulkhead receptacle  
 D, G, H, L, M, R1, T – straight plug  
 E, E1, K – plug 90°

### Shell size

10SL, 14S, 16S, 16, 18, 20, 22, 24, 28, 32 and 36

### Contact arrangement

See pages 13 to 26

### Contact type

P – Pin contact  
 S – Socket contact

### Contact termination

Without identification = metric crimp contacts  
 Identification '1' = AWG crimp contacts  
 Identification '2' = mixed AWG and metric crimp contacts

### Insulator position

Positions N, X, Y allowed only, see details on 'contact arrangement' pages 13-23

### With / without contacts

Without identification = with crimp contacts  
 Identification '1' = without crimp contacts, to be ordered separately

### Plating

Without identification = cadmium  
 Identification 'H' = RoHS, black, ZnCo plating, VG approved

\* 'H' is the VG plating modification identical to commercial plating A239

## Important!

VG contact arrangements are restricted. Only those layouts listed in VG95234 standard are allowed. See the following pages for VG permitted layouts and contact arrangements.

Further details about contact terminations / wire ranges can be found on pages 54-59.

## Accessories acc. to VG

Dummy receptacles	VG95234 BOD
Gaskets, front mount	VG95234 DA
Gaskets, rear mount	VG95234 DH
Protecting caps	VG95234 KR
Protecting caps	VG95234 KB
Cable clamps	VG95234 KK
Bushing	VG95234 KT

## How to order

### Cannon Order reference

## Explanation

### Series

CA – Circular connectors with bayonet coupling

### Shell style

- 3100 – Wall mounting receptacle
- 3101 – Cable connecting receptacle
- 3102 – Box mounting receptacle
- 3105 – Dummy receptacle for front and panel mounting
- 3106 – Plug, straight
- 3108 – Plug, 90°
- TBF – Bulkhead receptacle

### Class

- E – environmental with resilient insulators and endbell with clamp and bushing
- F – environmental with resilient insulator and endbell for flex tube
- R – environmental with resilient insulator and shortened light-weight endbell without cable clamp

### Shell size

10SL, 12S, 14S, 16S, 16, 18, 20, 22, 24, 28, 32 and 36

### Contact arrangement

See pages 13 to 26

### Contact type

- P – Pin
- S – Socket
- PS – one side pin, one side socket (only for TBF)

### Insulator position

Besides the normal position further insulator positions are possible for Cannon connectors (see page 13-23) to prevent mismatching. Polarization is achieved by turning the pin contact insulator clockwise towards the shell, the socket insulator, however, in opposite clockwise direction. This information refers to the mating side of the contact insulator. For special insert alternations of standard inserts see page 24.

### Modification

see page 12

Dimensions shown in mm  
Specifications and dimensions subject to change

## Modifications

### (only for CA.....-B)

- 01 – metric crimp contacts
- 02 – adapter for heat shrink boots AWG crimp contacts
- 03 – adapter for heat shrink boots, metric crimp contacts
- 04 – rear mount, thread holes in flange, metric crimp contacts (CA3102 only)
- 05 – rear mount, through holes in flange, (CA3100, CA3102, rear mounting CA 20, TBF)
- 06 – adaptor for heat shrink boots, solder pot contacts
- 08 – angular endbell, thread holes in flange (for CA3100 only)
- 09 – angular endbell, through holes in flange (for CA3100 only)
- 13 – shielded version, solder pot contacts
- 14 – shielded version, metric crimp contacts
- 15 – shielded version, AWG crimp contacts
- 32 – shielded version, reduced cable entry diameter
- 41 – grounding spring on barrel
- 109 – F80 contacts, rear mount, thread holes in flange (for CA3102 only)
- 111 – rear mount, thread holes in flange (CA3102 only), solder pot contacts
- F80 – AWG crimp contacts
- A176 – gold plated contact, see pages 54-55
- A232 – Zinc cobalt black plating
- A233 – Zinc cobalt green plating
- A239 – Zinc cobalt black plating, VG approved
- A240 – Zinc Nickel plating, blue grey plating
- F42 – less grommet and backshell
- F0 – less contacts, contacts to be ordered separately, see pages 54-55

### Important!

VG contact arrangements are restricted. Only those layouts listed in VG95234 standard are allowed. See the following pages for VG permitted layouts and contact arrangements.

Further details about contact terminations / wire ranges can be found on pages 54-59.

## With Spring Washer and Friction Ring

**These connectors feature a spring washer and a friction ring under the coupling nut.**

### Advantage

Improved resistance to vibration

### How to order

Delete "31" from standard part number and then insert "W" after Class E, F or R.

Example: CA06EW10SL-3P-B-14

The connectors acc. to VG95234 are generally delivered with spring washer.

## Additional Connector Options

### CA3100E-B-02/03/06

Adapter for heat shrink boot

### CA3100E-B-13/14/15

Adapter for shielded cables

### CA02L-B

Receptacle with PCB solder contacts

### CA20L-B

Rear mount receptacle with PCB solder contacts

### CA06EH\*

H stands for High temperature FKM insulator and sealing material

### CA07A-B

Jam nut receptacle

### CA00EP-B-TL\*

TINEL-LOCK adapter

### CA06EW-B-TLXX\*

TINEL-LOCK adapter

### CA06PG/ME

PG or Metric gland adapter

\*Consult factory for availability

Caution: This insulator rotation is not recommended as it can mate with normal rotation connectors.

◆ Attention: For all insert rotations, it is possible for miss-mating to occur. It is the responsibility of the customer to ensure they have selected correctly.

No solder pot contacts available for #10/20 contacts.

\*Reduced contact termination 0,3 mm<sup>2</sup>.

◆ Attention: For all insert rotations, it is possible for miss-mating to occur. It is the responsibility of the customer to ensure they have selected correctly.

## Alternative Insert Positions

Indicates location of centerline of key or keyway of shells in fixed normal position. Insert is rotated as shown by arrow and letters.

Connectors according to VG95234 are generally available with insert positions X and Y only.

Tolerances:

# 10SL-20:  $\pm 2^\circ$

# 22-36:  $\pm 1,5^\circ$

# 32A69:  $\pm 1^\circ$

## Positions

View shows mating side of pin or termination side of socket.

Insert positions are added without hyphen directly behind the contact type.

Example:

CA3106F32A10P<sup>2</sup>-B-01

## Special Insert Positions

A number of layouts allow for additional insert alternations. These special insert alternations are identified by a position number as shown in the table below.

Position	Polarization
2	260°
3	110°
4	80°

## Box Mounting Receptacle - Front Mount

### VG95234 – Style A

#### CA 3102E-B, additional modifications on page 12.

Description: Receptacle for front panel mounting with square flange.

Threaded holes in flange not possible.

VG95234 Part no.	Cannon Part no.	d <sub>1</sub> max.	d <sub>2</sub> H13*	d <sub>3</sub> -0,15	l <sub>1</sub> ±0,3	l <sub>2</sub> ±0,4	l <sub>3</sub> ±0,2	l <sub>4</sub> ±0,3	Weight <sup>1)</sup> g max.

<sup>1)</sup> Weight without insulator.

\*Drilling tolerances according to DIN ISO 286.

### CA02L-B, additional modifications on page 12.

Description: Receptacle for front panel mounting with solder pin contacts to solder into printed circuits. All pattern drawings upon request. For all other dimensions see above table. For contact arrangements with #16 and #12 contacts only. For #12 contacts consult factory.

## Box Mounting Receptacle - rear mount

### VG95234 Style B1 (with threaded holes in flange). CA3102-B and Modifications, e.g. -04, -109 or -111

Description: Receptacle with square flange for rear panel mounting.

### VG95234 Style B2 (with through holes in flange). CA3102E-B and modifications, see page 12.

Description: Receptacle with square flange for rear panel mounting.

## Wall Mounting Receptacle, shielded

### VG95234 – Style S1.

#### CA3100E-B, and modifications -32, see page 12.

Description: Wall mounting receptacle, shielded with endbell for system cable acc. MTV 6145-005, with threaded holes in flange, for rear mounting.

#### CA3100E-B, and modifications -32-05, see page 12.

Description: Same as Style S1 but with through holes in flange, for rear mounting.

# CAB IP69K

## General Information

### Scope

This specification describes a CA-B connector with a sealing effectiveness up to IP69K. This connector is interchangeable with the corresponding types as per MIL-C-5015 and VG95234, as they offer the same mounting dimensions and contact arrangements. These connectors are without spring washer, friction ring and grommet.

### Recommended Method of Mounting

Connector shell is fixed with 4 screws on the housing. In combination with universal endbell and an o-ring between flange receptacle and wall the connector will reach IP68 sealing (1 bar, 16h) and IP69K sealing acc. to ISO20653.

Ratings & Characteristics	
Locking Device	Bayonet Coupling
Contact Type	Crimp or Solder Contacts
Electrical Characteristics	In accordance with VG95234 bayonet coupling
Environmental Characteristics	In accordance with VG95234 bayonet coupling Deviance with plating A240: 500h salt spray test with mated pair Deviance with plating A34: 48h salt spray test
Water tightness for mated connector	IP68 (1bar, 16h) and IP69K in combination with universal endbell and o-ring (flange receptacle to wall)

Normative references	
DIN EN 61984	Electrical Connector, safety requirements and tests
IEC 60068	Environmental tests

## Explanation

### Series

CA

### Shell style

01 = Cable connection receptacle

02 = Wall mounting receptacle, front panel mounting

06 = Straight plug, without spring washer, friction ring and grommet

### Class

X=Environmental (IP69K)

### Sealing Material

Without = CR-Sealing (cable seal: Silicone)

H= FKM sealing (cable seal: Silicone), consult factory

### Shell Sizes

Available shell sizes: 10SL, 14S, 18, 20, 22, 28

### Contact Arrangement

See pages 13-23

### Contact Type

P= Pin, S=Socket

### Coupling Mechanism

B=Bayonet

### Insulator Position

See pages 13-23, no identification for normal position

### Cable Sealing Area

**D07** = with Universal Endbell (IP69K), straight version: #10SL, #14S, #20 (wire size 4,5 – 7,2mm)

**D09** = with Universal Endbell (IP69K), straight version: #14S, #20 (wire size 6,5 - 9,3mm)

**D11** = with Universal Endbell (IP69K), straight version: #14S, #18, #20 (wire size 8,0 – 10,3mm)

**D13** = with Universal Endbell (IP69K), straight version: #18, #20, #22 (wire size 9,0 – 12,5mm)

**D14** = with Universal Endbell (IP69K), straight version: #18, #20, #22, #28 (wire size 11,5 – 14,2mm)

**D17** = with Universal Endbell (IP69K), straight version: #20, #22, #28 (wire size 14,5 – 16,6mm)

### Modification

13 – shielded version, solder pot contacts

14 – shielded version, metric crimp contacts

15 – shielded version, AWG crimp contacts

A176 – gold plated contact, see pages 54-55

A239 – Zinc Cobalt black plating, VG approved

A232 – Zinc cobalt black plating

A233 – Zinc cobalt green plating

A240 – Zinc Nickel blue grey plating

F0 – less contacts, contacts to be ordered separately, see page 54-59

\* WB = Cable clamp with telescoping bushing.

## Telescoping Bushings

Telescoping bushings (used with MS3057A resp. VG95234KK cable clamp) keep dirt, oil and dust out of the endbell. Taping or wrapping wires is eliminated since bushing protects wires guided through the clamp.

**Material: Polychloroprene**

Shell size	VG95234 Part No.	Cannon Part no.	d <sub>1</sub>	d <sub>2</sub>	d <sub>3</sub>	l	Weight g

## CA Bayonet Layout Overview with standard contact wire size

The table below shows all available contact arrangements (layouts) available for ITT's CA Bayonet product line.

For each layout the crimp contact styles and wire cross sections used as default are shown.

If other crimp sizes are required the connector can be ordered with suffix "-F0" (without contacts).

See ordering key on page 11 for details. In this case, separate contacts can be selected according to contact selection tables on pages 54-55.

\*The numbers represent modifications for contact termination as listed on page 12. E.g. CA3106E20-29S-B-14 is the modification for a shielded endbell with metric crimp contacts.

## VG Layout Overview with standard contact wire size

The table below shows all contact arrangements (VG layouts) permitted to be used under VG95234 standard.

For each layout the contact sizes and wire sizes used as default are shown. Generally, all contacts used according to VG95234 are crimp contacts.

If other crimp sizes are required the VG95234 standard allows to order a connector without contacts.

See ordering key on page 10 for details. In this case, separate contacts can be selected according to contact selection tables on pages 54-55.

\* The numbers represent modifications for contact termination as listed on page 12. E.g. VG95234M20-22P2N is the modification for a shielded endbell with metric and AWG crimp contacts.

## Insertion & Extraction Tools

Crimp contacts should be inserted or, if needed, extracted with the correct tools. In order to avoid damage to the insulator it is recommended to use guide pins for the insertion of socket contacts.

Dimensions shown in mm  
Specifications and dimensions subject to change

**This note must be read in conjunction with the Product Data Sheet / Catalog. Failure to observe the advice in this information sheet and the operating conditions specified in the Product Data Sheet/ Catalog could result in hazardous situations.**

## 1. Material content and physical form

Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups.

a) Printed circuit types and low cost audio types which employ all plastic insulators and casings.

b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic or glass insulating materials. Contact materials vary with type of connector and also application and are usually manufactured from either: Copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be specified.

## 2. Fire characteristics and electric shock hazard

There is no fire hazard when the connector is correctly wired and used within the specified parameters. Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionization and burning.

Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire.

Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the product Data Sheet / Catalog are exceeded and can cause breakdown of insulation and hence electric shock. If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonization of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

## 3. Handling

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Electrical connectors may be damaged in transit to the customer, and damage may create hazards. Products should therefore be examined prior to installation / use and rejected if found to be damaged.

## 4. Disposal

Incineration of certain materials may release noxious or even toxic fumes.

## 5. Application

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30 V ac or 42.5 V dc are potentially hazardous and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body.

The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths.

Always use the correct application tools as specified in the Data Sheet / Catalog. Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate national regulations.

## Important general information

(i) Air and creepage paths/Operating voltage. The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations.

For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

(ii) Temperature. All information given are temperature limits. The operation temperature depends on the individual application.

(iii) Other important information. Cannon continuously endeavors to improve their products. Therefore, Cannon products may deviate from the description, technical data and shape as shown in this catalog and data sheets.

---

## ▶ Circular/Filter/Hermetic/Fiber Optic Connectors

As a world leader in circular, filter, and hermetic connectors, ITT can leverage its design and manufacturing expertise to fit virtually any application. Our expertise includes fast positive mating for a wide range of military applications, as well as numerous sizes and contact configurations for various harsh environments. ITT can meet numerous specifications, including NATO and MIL standards.

---

## ▶ D-Subminiature Connectors

Cannon invented D-Sub connectors in 1952. Our family of D-Subs now includes combinations of signal, power and RF, as well as severe service sealed connectors. Cannon D-Subs are available with an extensive line of backshells and accessories and are one of the most economical shielded connector solutions available. ITT D-Sub connectors are qualified to the MIL-DTL- 24308 specification.

---

## ▶ Microminiature Connectors

Developed first by Cannon in the 1960's, Interconnect Solutions microminiature connectors offer high performance and reliability with exceptional versatility. Available in rectangular, circular, and strip configurations for countless applications, many of our connectors meet or exceed applicable requirements of the MIL-DTL- 83513 specification.

---

## ▶ Rack and Panel Connectors

Initially pioneered by Cannon during the 1930s, Interconnect Solutions is the world leader in rack and panel connectors, offering unmatched variety of shell configurations and insert arrangements, materials, plating, and contact options. Many of our standard and custom designs meet the stringent requirements of ARINC 600, ARINC 404 (MIL-C-81659), and MIL-DTL-83733 standards.
