MS/CV345* MIL-C-5015 Rear Release Connectors

A

Circular

Standard Circular High Environmental Connectors

– These connectors are available for many applications, from commercial/industrial and mass transportation systems to the most stringent high reliability military and space requirements.

The MS/CV345* connector manufactured by ITT Cannon to MIL-C-5015 (Navy) is a threaded coupling, removable rear release crimp contact type. Fully interchangeable with existing MIL-C-5015 and threaded MIL-C-83723 Series II (USAF) type connectors, they provide for minimum effort and high economy upgrades for existing applications. In addition, they offer simplified design for new and interphase equipment.

MS/CV connectors converted under MIL-C-5015 (Navy) utilize fluid resistant elastomers to provide maximum protection against degrading fuels, oils, coolants and cleansers.

Temperature withstanding capabilities range from -55°C to +200°C depending upon the class. The use of electroless nickel and cadmium plating for hardware finishes gives the connectors maximum protection from the above factors. High quality manufacturing processes and materials combine to insure the optimum performance and materials combine to insure the optimum range of environmental conditions.

The MS/CV connector manufactured by ITT Cannon is available in five shell styles and 72 contact arrangements accommodating from 1 to 52 contact (sizes 0, 4, 8, 12, and 16).

This connectors series is manufactured to accommodate the following backshells: M85049/43 (MS3415), M8504/31 or /60 (MS3416), M85049/52 (MS3417), M85049/51 (MS 3418) and M85049/26 (MS3419). Shell polarization is effected by a single keyway and key, standard MS polarization positions are available to prevent mismatching.

*For information regarding MIL-C-83723 Series II (CVA) connectors, please call ITT Cannon, 714-557-4700

Features

Universal Insertion/Extraction Tool Style – A single, expendable plastic tool is used for insertion and extraction of both pins and sockets. Tool never touches engaging ends of contacts, cannot damage insert.

Simple, Strong Contact Design – One basic configuration eliminates undercuts, maximizes bend resistance for positive contact mating.

Interfacial Pin Insert Seal – Universal interconnect permits design of raised moisture barriers around each pin which mate into lead-in chamfers of hard face socket insert for individual contact sealing. Interfacial seal is never touched by service tools.

Superior Contact Stability – “Closed-down” design of each contact cavity in the insulator support each contact, minimizes contact splicing.

Closed Entry Socket Insert – Hard dielectric socket face of mating connector has lead-in chamfers for positive alignment of pins and sockets.

Simplified Assembly Operations – One standard procedure for assembling connectors and contacts, standard MS crimp tools, all servicing of contacts accomplished from the rear of the connector.

Performance Specifications

Class	Temp. °C	Moisture, Fluid and Fuel Resistant	Shell Material	Size Finish
W	-55 to +175	Yes	Aluminum per QQ-A-225 or QQ-A-591	Olive drab over cad plate
L	-55 to +200	Yes		Electroless nickel
KT	-55 to +175	Yes	Steel per QQ-S-637 Stainless Steel	Olive drab over cad plate
KS LS	-55 to +200	Yes Steel		Passivate

Wire Range Accommodations

Contact Size	Wire Size	Minimum	Maximum
16-16	20, 18, 16	.053 (1.35)	.103 (2.62)
12-12	14, 12	.085 (2.16)	.158 (4.01)
8-8	10, 8	.132 (3.35)	.255 (6.48)
4-4	6, 4	.237 (6.02)	.370 (9.40)
0-0	2, 0	.360 (9.14)	.550 (13.97)

NOTE: Resistant to hydraulic fluid per MIL-H-5606 or skydrol (LD), lubricating oils per MIL-L-7808 and MIL-L-23699, cleaners CeeBee 694 or Aerosafe 2300, jet engine fuel per MIL-J-5624 Grade JP-5, Ethylene Glycol, and Collanol 25.

¹ Wire Reference - MIL-W16878, MIL-W-22759, Mil- 81381, MIL-C-915, MIL-C- 24145 and MIL-C 2194.

² MS3348 brushing required in crimp barrel to accommodate 10, 6 and 2 wire sizes - they are ordered separately, consult factory.

Contacts (Crimp Removable Rear Release)

Material - Copper Alloy
Finish - Size 16 - Gold over Nickel
Size 12, 8, 4 and 0 - silver plated

Test Data

High Potential Test Voltage

MS/CV connectors show no evidence of breakdown when the test voltage given below is applied between the two closes contacts and between, the shell and the contacts closest to the shell for a period of one minute.

Service Rating	Test Voltage (ms) 60cps	Suggested Operating Voltage	
		DC	AC (ms)
Inst.	1000	250	200
A	2000	700	500
D	2800	1250	900
E	3500	1750	1250
B	4500	2450	1750
C	7000	4200	3000

Test Current

Test current ratings of contacts and allowable voltage drop under test conditions when assembled as in service are shown below. Maximum total current to be carried per connector is the same as that allowable in wire bundles as specified in MIL-W-5088.

Current Rating with Silver Plated Wire (MIL-C-5015 test method)

Contact Size	Test Current (amps)	Potential Drop (millivolts)
16	13	49
12	23	42
8	46	26
4	80	23
0	150	21

*As indicated in previous MS Specification and to be used by the designer only as a guide.

MS Alternate Positions

All views are looking into front of pin insert or rear of socket insert.

Tooling

A complete line of crimp, insertion and extraction tools is provided for MIL-C-5015 connectors. Crimp tools are made from high quality metal and are designed for long life and trouble-free service. Insertion and extraction tools are made of a durable plastic and are inexpensive and expendable.
