# 38999-Style Connectors

**ITT**

ENGINEERED FOR LIFE

## Cannon 38999-Style Series I, II, III Connectors

ITT Cannon connectors set the industry standard for performance and reliability in the most demanding conditions and harshest environments. Our 38999-Style Series I, II, III Connectors are designed to withstand the extreme shock, exposure and vibration that are commonplace in Defense and Commercial Aerospace applications.

We offer lightweight, space-saving solutions to our military customers, coupled with high bandwidth and high power for severe service application needs. More than a century of experience, coupled with unparalleled engineering and testing resources, has established ITT Cannon as one of the premier providers of interconnect solutions worldwide.

With a proven track record for engineering and manufacturing excellence, ITT Cannon continues to deliver a broad range of innovative products and solutions that enable our customers to meet their most demanding design requirements, where impeccable reliability and safety are essential.

### Example Application Areas

- Defense
  - Military aircraft
  - Military communication systems
  - Hand held and vehicle platforms
  - Military ground support systems
  - Military computer systems
  - Harsh environment platforms
  - Blind mate applications
  - High density, low signal platforms
  - Hand held and vehicle platforms
  - Unmanned systems
- Aerospace
  - Aircraft engines
  - General electric testing equipment
  - Commercial business aviation
  - Aerospace launch vehicles

## 38999-Style Connectors: Precision Engineered, Lightweight & Rugged

ITT Cannon's 38999-Style Series I, II, III Connectors are designed to tackle the most extreme conditions with exceptional versatility in the harshest environments. Small, lightweight and highly reliable, our D38999-Style connectors deliver consistency and performance when it matters most.

### D38999-Style Series I (KJL)

ITT Cannon KJL 38999-Style Series I connectors offer high-density contact arrangements in a light-weight miniature circular connector. ITT Cannon KJL series connectors are an industry standard for military and aerospace applications. The environmentally sealed KJL series features quick-mating, three-point bayonet coupling and operates across a wide temperature range.

### D38999-Style Series II (KJ)

ITT Cannon KJ 38999-Style Series II are a weight-reduced and low profile circular connector ideally suited for avionic applications where space and weight are prime considerations. It offers high-density contact arrangements in a light-weight miniature circular connector. ITT Cannon KJ series connectors feature a quick-mating, three-point bayonet coupling, are environmentally-sealed and operate across a wide temperature range. ITT Cannon KJ series mil spec connectors were originally designed for military vehicles and are now industry standard aerospace and military connectors.

### 38999-Style Series III (KJB)

The de-facto standard circular connector for use in harsh military and aerospace environments, ITT Cannon's KJB 38999-Style Series III Connectors offer high-density contact arrangements in a light-weight miniature circular connector. ITT Cannon's KJB series connectors have quick-mating, triple-lead threaded, self-locking coupling, are environmentally-sealed and operate across a wide temperature range. These connectors were originally designed for military vehicles and are now use for multiple applications throughout the Aerospace & Defense Industry.

### 38999-Style Series III Composite (KJB)

A lightweight standard circular connector for use in military and aerospace environments with significant weight savings over aluminium-bodied D38999-Style. High density layouts with up to 128 data connections and power contacts rated up to 23A. Features a triple-start coupling with anti-decoupling ratchet for high vibration applications, Cadmium and Electroless Nickel platings, 100 percent scoop-proof contacts and rated to 1500 mating cycles.

About ITT Cannon .....36

**In addition to our 38999-style series, we also offer these connectivity solutions:**

**Combo D-Sub** Product offering includes ability to integrate signal and coax, high power, and high voltage.

**CA-Bayonet** – Signal and power connectors with exceptional sealing against the ingress of fluids and will withstand the effects of high vibrations.

**Microminiature** – High performance and reliability with exceptional versatility. Available in rectangular, circular and strip configurations, many of our connectors are designed to be comparable to the MIL-DTL-83513 specification.

**SERIES I**

**SERIES II**

**SERIES III**

- Corrosion and zinc resistant shells of aluminum alloy with cadmium and zinc over nickel plating withstand a 500 hour salt spray exposure
- Rear release crimp snap-in contacts
- High contact density
- Standard MIL-C-39029 contacts, MIL-I-81969 application tools and MIL-STD 1560 insert arrangements

- Special/custom capabilities
- 100% scoop-proof - Series I and III
- Light weight /Low Profile - Series II
- Operates under severe high temperature vibration testing through 200 C - engineered for high density circuitry - Series III

- Interfacial seal helps prevent electrolytic erosion of contacts - Series III
- Superior EMI shielding provides outstanding protection up to 65dB at 10 GHZ. - Series III

**Specification Comparison**

Design Criteria	Series I	Series II	Series III (Aluminum)	Series III (Composite)
Low Profile/Light Weight	no	yes	no	yes
Scoop Proof	yes	no	yes	yes
Coupling System	Bayonet	Bayonet	Triple Start Thread	Triple Start Thread
Electrolytic Erosion	no	no	yes	yes
Durability (Cycles)	500	250	500	1500
High Impact Shock	yes	no	yes	yes
External Bending Moment				
Shell Size 25	650 in/lbs	150 in/lbs	1000 in/lbs	1000 in/lbs
Random Vibration "J"	49.5G, Ambient	43.7G, Ambient	49.5G, Ambient	49.5G, Ambient
Sine Vibration	60G		60G	60G
Sand, Dust, Ice	yes		yes	yes
Shell Size	9-25	8-24	9-25	9-25

**Contact Rating**

Contact Size	Test Current DC Test Amperage	Maximum Millivolt Drop*	Crimp Well Data	
			Well Diameter	Well Depth
22D	5	40	.0345 ± .0010	.157/.141
22M**	3	30	.0280 ± .0010	.157/.141
22**	5	40	.0365 ± .0010	.157/.141
20	7.5	35	.0470 ± .0010	.229/.209
16	13	25	.0670 ± .0010	.229/.209
12	23	25	.1000 ± .0020	.229/.209

\* Maximum millivolt drop data is determined by measuring resistance of mated contacts from end to end  
 \*\* For reference only

## Performance and Material Specifications

Test voltage, AC (rms), work voltage to be determined by application

## Test Data

Test Description	Parameters
Durability	500 cycles of mating and unmating, 250 cycles for Series II with spring fingers
Temperature Range	Class F, N; - 65°C (-85°F) to + 200°C (+392°F) Class A; - 65°C (-85°F) to + 150°C (+302°F) Class B,W: - 65°C (-85°F) to + 175°C (+347°F)
Vibration	Mated connectors are vibrated with weights to simulate rear accessory loads to the following levels: Sine Vibration: Up to 60 G's - Series I & III (at rated temperature - Series III) Not applicable for Series II. Random Vibration: 43.7 Grms at rated temperature - Series III 49.5 Grms at Ambient Temperature - Series I & III 43.7 Grms at Ambient Temperature - Series II
EMI Shielding Effectiveness	Class F: EMI leakage attenuation, greater than 90dB at 100Mhz, greater than 65dB at 10 GHz. Shell to shell conductivity, 1.0 millivolt max. resistance. Class W: EMI leakage attenuation, greater than 90dB at 100 MHz, greater than 50dB at 10 GHz. Shell to shell conductivity, 2.5 millivolt max.
Corrosion Resistant	Class B, W, and Z will withstand 500 hours salt spray. Class A, F, N, will withstand 48 hours salt spray.
Fluid Immersion	Connectors are fluid resistant to many fuels, solvents, coolants and oils.
High Impact Shock	Mated connectors terminated with MIL-C-915 cable and environmentally sealed backshells will withstand high impact shock per MIL-S-901. Applicable to Series I & III only.
Altitude	Designed to operate between sea level and 100,000 ft. above sea level.
Other Environments	Mated connectors shall withstand sand and dust per method 110 of MIL-STD-202 and be ice resistant. Applicable to Series I & III only.

NOTE: For hermetic standard or test data please consult ITT.

**How To Order**

**Military Nomenclature**

*DISCLAIMER: Our facility is not currently certified by the DLA and this product is not covered by the QPL/QML. Mil-Spec part numbers are only for cross reference to the Commercial Equivalent.*

- MS NUMBER SHELL STYLE**  
 MS27466 - Wall Mounting Receptacle  
 MS27468 - Jam Nut Receptacle  
 MS27467 - Grounded Plug  
 MS27656 - Wall Mounting Receptacle (back panel mounting)  
 MS27505 - Box Mounting Receptacle (back panel) (Class E)

- CLASS**  
 E - Inactive for new design. Superseded by Class T.  
 G - Environmental resistant Space Grade  
 P - Environment - resistant with straight potting cup accessories  
 T - Environment - resistant with accessory threads and teeth, except MS27505 (without rear accessory) (Class T not applicable to MS27505)

**SHELL SIZE**  
 9, 11, 13, 15, 17, 19, 21, 23, and 25

- HARDWARE FINISH STANDARD**  
 A - Bright cadmium over electroless nickel plate, -85°F to +302°F (-65°C to +150°C)  
 B - Olive drab cadmium over electroless nickel plate, -85°F to +347°F (-65°C to +175°C)  
 F - Electroless nickel, -85°F to +392°F (-65°C to +200°C)

**CONTACT ARRANGEMENT**  
 See pages 22 and 23.

- CONTACT STYLE**  
 P - Pin  
 S - Socket  
 \*A - Less Pin Contact  
 \*B - Less Socket Contact

\*Used only when other than power contacts are to be installed (i.e. shielded, thermocouple, etc.)

**POLARIZING POSITION**  
 A,B,C, and D. (No letters required for normal). See page 21.

Note: To order MS connectors less standard power contacts, purchase order must state "Less Contacts"

**Cannon Nomenclature**

**SERIES PREFIX**  
 KJL - Series I-Scoop proof

- SHELL STYLE**  
 0 - Wall mounting receptacle  
 3 - Wall mounting receptacle (back panel mounting)  
 4 - Thru bulkhead receptacle\*  
 5 - Box mounting receptacle (back panel mounting)  
 6 - Straight plug, grounded  
 7 - Jam nut receptacle

- CLASS**  
 E - Inactive for new design. Superseded by Class T.  
 G - Environmental resistant - Space Grade  
 F - Environment - resistant with strain relief accessory  
 P - Environment - resistant with straight potting cup accessory  
 T - Environment - resistant (without rear accessory) (Class T not applicable to KJL5)

\*Consult factory for availability

**SHELL SIZE**  
 9,11,13,15,17,19,21,23 and 25

- HARDWARE FINISH STANDARD**  
 A - Bright cadmium over electroless nickel plate, -85°F to +302°F (-65°C to +150°C)  
 B - Olive drab cadmium over electroless nickel plate, -85°F to +347°F (-65°C to +175°C)  
 N - Electroless nickel, -85°F to +392°F (-65°C to +200°C)  
 Z - Zinc Nickel, Black  
 - - (Dash) When using a finish modification code

**CONTACT ARRANGEMENT**  
 See pages 22 and 23.

- CONTACT STYLE**  
 P - Pin  
 S - Socket  
 PS - Pin-Socket (Shell style 4 only)

**POLARIZING POSITION**  
 N (normal), A, B, C, D. See page 21.

- MODIFICATION CODE**  
 L - Less contacts, not stamped on connector  
 16 - Outgassed  
     NASA space graded connector  
 17 - Clinch Nuts installed  
     4-40 Size 9-21, 6-32 Size 23-25)  
 27 - Outgassed, standard connector  
 A296 - Black Zinc Cobalt, RoHS Compliant

**How To Order**

**Military Nomenclature**

*DISCLAIMER: Our facility is not currently certified by the DLA and this product is not covered by the QPL/QML. Mil-Spec part numbers are only for cross reference to the Commercial Equivalent.*

**MS NUMBER SHELL STYLE**

- MS27472 - Wall Mounting Receptacle
- MS27473 - Straight Plug
- MS27474 - Jam Nut Receptacle
- MS27484 - Grounded Plug
- MS27497 - Wall Mounting Receptacle (back panel mounting)
- MS27513 - Box Mounting Receptacle
- MS27499 - Box Mounting Receptacle (Class E)
- MS27508 - Box Mounting (back panel mounting) (Class E)

**CLASS**

- E - Environment - resistant with rear accessory (without strain relief)
- G - Environmental - resistant wall mount and jam nut receptacle and plug types. Space Grade.
- P - Environment - resistant with straight potting cup accessories
- T - Environment - resistant (without rear accessory). (Class T not applicable to MS27499, MS27513, and MS27508.)

**SHELL SIZE**

8, 10, 12, 14, 16, 18, 20, 22, 24.

**HARDWARE FINISH STANDARD**

- A - Bright cadmium over electroless nickel plate, - 85°F to + 302°F (- 65°C to + 150°C)
- B - Olive drab cadmium over electroless nickel plate, - 85°F to + 347°F (- 65°C to + 175°C)
- F - Electroless nickel, - 85°F to + 392°F (-65°C to + 200°C)

**CONTACT ARRANGEMENT**

See pages 22 and 23.

**CONTACT STYLE**

- P - Pin
- S - Socket
- \*A - Less Pin Contact
- \*B - Less Socket Contact

\*Used only when other than power contacts are to be installed (i.e. shielded, thermocouple, etc.)

**POLARIZING POSITION**

A, B, C, and D (no letter required for normal). See page 21.

Note: To order MS connectors less standard power contacts, purchase order must state "Less Contacts".

**ITT Nomenclature**

**SERIES PREFIX**

- KJ - Series II - Low Profile

**SHELL STYLE**

- 0 - Wall mounting receptacle
- 2 - Box mounting receptacle
- 3 - Wall mounting receptacle (back panel mounting)
- 5 - Box mounting receptacle (back panel mounting)
- 6 - Straight plug
- G6 - Straight plug, grounded
- 7 - Jam nut receptacle

**CLASS**

- E - Environment - resistant with rear accessory (without strain relief)
- F - Environment - resistant with strain relief accessory
- G - Environmental - resistant wall mount and jam nut receptacle and plug type. Space Grade.
- P - Environment - resistant with straight potting cup accessory
- R - Environment - resistant with full grommet seal without rear accessory; shell styles 2 and 5 only
- T - Environment - resistant (without rear accessory). (Class T not applicable to KJ2E, KJ2R, KJ5E and KJ5R.)

Note KJ supplied with exact complement of contacts.

**SHELL SIZE**

8, 10, 12, 14, 16, 18, 20, 22, and 24.

**HARDWARE FINISH STANDARD**

- A - Bright cadmium over electroless nickel plate, - 85°F to + 302°F (- 65°C to + 150°C)
- B - Olive drab cadmium over electroless nickel plate, - 85°F to + 347°F (- 65°C to + 175°C)
- N - Electroless nickel, - 85°F to + 392°F (-65°C to + 200°C)
- Z - Zinc Nickel, Black
- (Dash) When using a finish modification code

**CONTACT ARRANGEMENT**

See pages 22 and 23.

**CONTACT STYLE**

- P - Pin
- S - Socket

**POLARIZING POSITION**

N (normal), A, B, C, D, see page 21.

**MODIFICATION CODE**

- L - Less contacts, not stamped on connector
- 16 - Outgassed NASA space graded connector
- 17 - Clinch Nuts installed (4-40 Size 9-21)
- 27 - Outgassed, standard connector
- A296 - Black Zinc Cobalt, RoHS Compliant

**SERIES PREFIX**  
KJB\* - Series III - Scoop proof, threaded coupling

**SHELL STYLE**  
0 - Wall mount receptacle  
6 - Straight plug

**CLASS**  
T - Environment-resistant (without rear accessory)

\* Consult factory for availability

SHELL SIZE

9	11	13	15	17	19	21	23	25	Cannon Designation
A	B	C	D	E	F	G	H	J	Military Designation

**HARDWARE FINISH**  
J - Olive drab cadmium over electroless nickel plate, -85°F to +347°F (-65°C to +175°C)  
M - Electroless nickel, - 85°F to +392°F (-65°C to +200°C), RoHS Compliant

**CONTACT STYLE**  
H - Pin contacts (1500 cycle)  
J - Socket contacts (1500 cycle)  
P - Pin contacts  
S - Socket contacts

**POLARIZING POSITION**  
N (normal) A, B, C, D, E. See page 21.

**MODIFICATION CODE**  
L - Less contacts, not stamped on connector

**CONTACT ARRANGEMENTS**  
See pages 22 and 23.

24	100°	85°	74°	126°

- NOTES**
1. All Angles are BSC
  2. The insert arrangement does not rotate with main key/keyway
  3. All minor keys are rotated to provide shell polarization, the master key remains fixed at twelve o'clock position.
  4. Polarization is different from Series I and II.

Potting Boot Adapter Ring

How To Order (MS Version)

NOTE: When ordering the MS version you must specify both MS numbers for the Potting Boot and the Adapter Ring.

Shell Size		Finishes					
Series I	Series II	MS27485 Part Number	Cannon Part Number	A Cadmium/Nickel	B Clear Cadmium/Nickel	N Cadmium/Nickel-O.D	F Electroless Nickel
9	8	27485*-***	237-0887-***	-000	A	-001	B -002 F
11	10	27485*-***	237-0874-***	-000	A	-001	B -002 F
13	12	27485*-***	237-0875-***	-000	A	-001	B -002 F
15	14	27485*-***	237-0876-***	-000	A	-001	B -002 F
17	16	27485*-***	237-0877-***	-000	A	-001	B -002 F
19	18	27485*-***	237-0878-***	-000	A	-001	B -002 F
21	20	27485*-***	237-0879-***	-000	A	-001	B -002 F
23	22	27485*-***	237-0880-***	-000	A	-001	B -003 F
25	24	27485*-***	237-0881-***	-000	A	-001	B -003 F

Wire Sealing Plugs

Series III Size	Series I & II Size	Part Number		Color Code
		Cannon	MS27488	
22D	22D	225-1013-000	MS27488-22-2	Black
20	20	225-0070-000	MS27488-20-2	Red
16	16	225-0104-000	MS27488-16-2	Green
12	12	225-0105-000	MS27488-12-2	Orange

Wire sealing plugs meet MS27488 standards. The plugs are color coded according to size for easy identification. Wire sealing plugs may be ordered separately.

# Assembly Instructions

## Wire Stripping

Strip insulation from end of wire to be crimped. (See table for proper stripping dimensions.) Do not cut or damage wire strands.

Wire Size	A
22D or 22M*	.125 (3.18)
20	.188 (4.77)
16	.188 (4.77)
12	.188 (4.77)

\* For reference only

## Contact Crimping

1. Insert stripped wire into contact crimp pot. Wire must be visible thru inspection hole.

2. Using correct crimp tool and locator, cycle the tool once to be sure the indentors are open. Insert contact and wire into locator. Squeeze tool handles firmly and completely to insure a proper crimp. The tool will not release unless the crimp indentors in the tool head have been fully actuated.

3. Release crimped contact and wire from tool. Be certain the wire is visible thru inspection hole in contact.

## Contact Insertion

1. Remove hardware from plug or receptacle and slip over wire bundle in proper order for reassembly.

2. Using proper plastic or metal insertion tool for corresponding contact, position wire in tip of the tool so that the tool tip butts up against the contact shoulder.

3. Press tool against contact shoulder and, with firm and even pressure, insert wired contact and tool tip into center contact cavity. A slight click may be heard as metal retaining tines snap into place behind contact shoulder.

4. Remove tool and pull back lightly on wire to make sure contact is properly seated. Repeat operation with remainder of contacts to be inserted, beginning with the center cavity and working outward in alternating rows.

5. After all contacts are inserted, fill any empty cavities with wire sealing plugs, Resemble plug or receptacle hardware.

## Contact Extraction

1. Remove hardware from plug or receptacle and slide hardware back along wire bundle.

2. Using plastic or metal extraction tool with proper color code corresponding to contact size, place wire in tool.

3. Insert tool into contact cavity until tool tip bottoms against the contact shoulder, expanding clip retaining tines.

4. Hold wire firmly in tool and extract wired contact and tool. Repeat operation for all contacts to be extracted.

5. Fill any empty wire cavities with wire sealing plugs, and

6. Reassemble plug or receptacle.

38999-Style Specifications

The following excerpts are some of the parameter requirements of the MIL-DTL-3899 Specification.

Test Description	Paragraph Reference	Requirements																																																																								
Contact Retention	4 5 19	After preloading to 3 pounds maximum, the force shall be applied at a rate of approximately 1 pound per second and maintained at full load for 5-10 seconds. No damage to contacts or insert shall result nor shall the contacts be dislocated from their normal position in the connector more than 0.012 inch under the given load. Failure to meet these requirements shall be cause for rejection. <table border="1" style="margin-left: 40px;"> <tr> <td>Contact Size</td> <td>22M*</td> <td>22D</td> <td>22*</td> <td>20</td> <td>18</td> </tr> <tr> <td>Loads in Pounds ± 10%</td> <td>10</td> <td>10</td> <td>10</td> <td>15</td> <td>25</td> </tr> </table>	Contact Size	22M*	22D	22*	20	18	Loads in Pounds ± 10%	10	10	10	15	25

Loads in Pounds ± 10%	10	10	10	15	25																																																																					
Coupling Torque	4 5 6	For qualification testing, mating halves shall be coupled and uncoupled, measuring the torques necessary. The torques required to couple and uncouple mating connector halves shall fall within the limits specifications as follows: <table border="1" style="margin-left: 40px;"> <thead> <tr> <th colspan="3">Torque</th> <th colspan="3">Torque</th> <th colspan="3">Torque</th> <th colspan="3">Torque</th> </tr> <tr> <th>Shell Size</th> <th>Max.</th> <th>Min.</th> <th>Shell Size</th> <th>Max.</th> <th>Min.</th> <th>Shell Size</th> <th>Max.</th> <th>Min.</th> <th>Shell Size</th> <th>Max.</th> <th>Min.</th> </tr> </thead> <tbody> <tr> <td>8/9</td> <td>8</td> <td>2</td> <td>14</td> <td>20</td> <td>4</td> <td>18</td> <td>28</td> <td>5</td> <td>22</td> <td>36</td> <td>7</td> </tr> <tr> <td>10/11</td> <td>12</td> <td>2</td> <td>15</td> <td>20</td> <td>3</td> <td>19</td> <td>28</td> <td>3</td> <td>23</td> <td>36</td> <td>5</td> </tr> <tr> <td>12</td> <td>16</td> <td>2</td> <td>16</td> <td>24</td> <td>4</td> <td>20</td> <td>32</td> <td>6</td> <td>24</td> <td>36</td> <td>7</td> </tr> <tr> <td>13</td> <td>16</td> <td>2</td> <td>17</td> <td>24</td> <td>3</td> <td>21</td> <td>32</td> <td>5</td> <td>25</td> <td>40</td> <td>5</td> </tr> </tbody> </table>	Torque			Torque			Torque			Torque			Shell Size	Max. 13	16	2	17	24	3	21	32	5	25	40	5																																																															
Durability	4 5 7	Connector halves shall be mated and unmated 250 times for Series II with ground fingers and 500 times for Series I and III at a rate not exceeding 300 cycles per hour. The test may be performed by hand or by mechanical means, but the coupling ring shall be operated as in normal service. Failure to complete this test because of mechanical malfunction shall be cause for rejection.																																																																								
Insulation Resistance	4 5 9	An insulation resistance test shall be performed on unmated connectors in accordance with MIL-STD-202, Method 302, Test condition B. Measurement shall be made between three pairs of adjacent contacts and the shell. Failure to meet the minimum requirement of 50,000 megohms for Classes E, P, F, R, and T shall be cause for rejection.																																																																								
Vibration	4 5 22	Wired, mated connectors shall be subjected to the vibration test of MIL-STD-202, Method 214, Test Condition II, except that the duration shall be one hour in each plane. Receptacles shall be mounted on the vibration fixture by normal means. All contacts shall be wired in a series circuit and 100-500 millamperes of current shall be allowed to flow through the series circuit during vibration. Suitable means shall be employed to monitor the current flow and to indicate any discontinuity of more than 1 microsecond. The wire bundle shall be damped to the nonvibrating points at least 8 inches from the rear of the connector. Current discontinuity of 1 microsecond or more, disengagement of the mated connectors, evidence of cracking, breaking, or loosening of parts shall be cause for rejection.																																																																								
Shock	4 5 23	Wired mated connectors shall be subjected to one shock in each direction in each of three mutually perpendicular axes. The pulse shall be approximate half sine wave of 300g ± 15% magnitude with a duration of 3 ± 1 milliseconds. Receptacles shall be mounted on a shock fixture by normal means. All contacts shall be wired in a series circuit and 100-150 ma. of current shall flow through the series circuit during shock. Suitable means shall be employed to monitor the current flow and to indicate any discontinuity of more than 1 microsecond. The wire bundle shall be clamped to fixed points at least 8 inches from the rear of the connector, Current discontinuity of 1 microsecond or more, disengagement of the mated connectors, evidence of cracking, breaking, or loosening of parts shall be cause for rejection.																																																																								
Thermal Shock	4 5 4	Unmated receptacles shall be subjected to 10 cycles of thermal shock in the following manner: Step a The receptacle shall be suspended for 10 + 1 - 0 minutes in the center of a cold water bath with a volume of approximately one cubic foot. No dimension of the bath shall be less than 10 inches. The water temperature shall not exceed 4°C (39.20°F) Step b The receptacle shall be suspended for 10 1 - 0 minutes in the center of a hot water bath with a volume of approximately one cubic foot. No dimension of the bath shall be less than 10 inches. The water temperature shall be not less than 94°C (201°F). The time of transfer from one bath to the other shall not exceed 5 seconds. At the end of the tenth cycle, the receptacle shall have the excess moisture shaken off and shall then be dried in a forced air oven at 66±5°C for 15 ± 1 minutes. Any evidence of damage resulting from this test shall be cause for rejection.																																																																								
Altitude Immersion	4 5 8	Mated connectors shall be placed in a container of water at approximately 20°C and placed in an altitude chamber. All wire ends shall be located within the chamber and exposed to the chamber atmosphere, but not submerged. The exposed wire ends shall not be sealed. A quantity of salt, 5 percent by weight, shall be added to make the water conductive. The chamber pressure shall then be reduced to approximately one inch of mercury and maintained for thirty minutes. The chamber pressure shall then be slowly returned to atmospheric. This shall be considered one cycle. Two additional cycles shall be performed. At the end of the last cycle, while the mated connectors are still submerged, the Insulation Resistance Test (room temperature), and the High Potential Test (sea level voltages) shall be performed upon the same circuits. Failure to meet an insulation resistance minimum of 2,000 megohms or any evidence of dielectric breakdown or -flashover shall be cause for rejection.																																																																								
Solvent Immersion	4 5 29	Unmated connectors shall be immersed fully in the applicable fluid specified below for 20 hours. After removal from the fluid, each connector shall remain for one hour in free air at room temperature. a.) Jet fuel JP-4 to MIL-J-5624 b.) Aircraft lubricating oil to MIL-L-9236																																																																								
Corrosion	4 5 12	Unmated connectors and individual contact samples shall be subjected to the soft spray of MIL-STD-202, Method 101, Test Condition 8 (tin plated, Class Y receptacles-24 hours). Immediately after exposure, the surfaces of the specimens shall be thoroughly washed in tap water and dried in a circulatory oven at a temperature of 38 ± 3°C (100°F) for a period of approximately 12 hours. Any exposure of basis metal as a result of this test, shall be cause for rejection.																																																																								
Dynamic Salt Spray	4 5 12 2	(Series I and 11, finish B; Series III, class W). The wired assembled plugs and receptacles shall be mated and unmated 50 cycles at a rate of 300 cycles per hour maximum. The mating and unmating shall be accomplished so that the plug and receptacle are completely separated during each cycle. The connectors shall then be subjected to the salt spray test in accordance with method 1001 of MIL-STD- 1344. The connectors shall be tested for 452 hours mated followed by 48 hours unmated. After the salt spray exposure the remaining number of durability cycles specified in 4.7.7 shall be completed.																																																																								
Temperature Durability	4 5 33	Wired rated connectors shall be subjected to the indicated ambient temperature for a period of 1,000 hours <table border="1" style="margin-left: 40px;"> <tr> <td>Series I and II (finish A)</td> <td>150<sup>+3°</sup><sub>-0°</sub>°C (302° F)</td> <td>Series I and II (finish B)</td> <td>175<sup>+3°</sup><sub>-0°</sub>°C (347° F)</td> </tr> <tr> <td>Series III (class W)</td> <td>175<sup>+3°</sup><sub>-0°</sub>°C (347° F)</td> <td>All other finishes</td> <td>200<sup>+3°</sup><sub>-0°</sub>°C (392° F)</td> </tr> </table>	Series I and II (finish A)	150 <sup>+3°</sup> <sub>-0°</sub> °C (302° F)	Series I and II (finish B)	175 <sup>+3°</sup> <sub>-0°</sub> °C (347° F)	Series III (class W)	175 <sup>+3°</sup> <sub>-0°</sub> °C (347° F)	All other finishes	200 <sup>+3°</sup> <sub>-0°</sub> °C (392° F)

# Product Safety and Warranty

## 1. MATERIAL CONTENT AND PHYSICAL FORM

Electrical connectors do not usually contain hazardous materials.

Electrical connectors and individual components do not release or otherwise result in exposure to hazardous chemicals under normal conditions of use and fall under the definition of "Article," under the Hazard Communication Standard, 29 CFR 1910.1200, and are not considered hazardous materials.

Solder and fluxes can be hazardous if inhaled or absorbed through the skin and should only be used as recommended by the manufacturer. Please consult your solder and flux manufacturer for more specific application recommendations.

## 2. FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD

There is no fire hazard when the connector is correctly wired and used within the specified parameters. Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionization and burning. Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire. Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the product Data Sheet/Catalog are exceeded and can cause breakdown of insulation and hence electric shock. If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonization of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

## 3. HANDLING

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Always wear safety glasses to avoid potential injury to eyes during cleaning, soldering, fiber preparation, etc.

Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged. Proper lifting techniques shall be used for handling shipping cartons.

## 4. DISPOSAL

Please recycle, reclaim or dispose of connectors and individual components in accordance with local, state and federal laws. Incineration of certain materials may release noxious or even toxic fumes..

## 5. APPLICATION

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30 V ac or 42.5 V dc are potentially hazardous and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths. Always use the specified application tools, cleaning materials and assembly instructions documented in the Data Sheet/Catalog. Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate national regulations.

## IMPORTANT GENERAL INFORMATION

**(i) Air and creepage paths/Operating voltage.** The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations.

For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

### (ii) Temperature

All information given are temperature limits. The operation temperature depends on the individual application.

### (iii) Pressure

All pressure information given are differential pressure limits. The specific differential pressure limits, across the connector interface, are documented in the Data Safety/catalog

### (iv) Other important information

Cannon continuously endeavors to improve their products. Therefore, Cannon products may deviate from the description, technical data and shape as shown in this catalog and data sheets.

Commodities in this catalog may be controlled for export or re-export under the Export Administration Regulations (EAR), Nuclear Regulatory Commission (NRC) Regulations, or by the International Traffic in Arms Regulations (ITAR) when specifically designed, modified or configured for military use.

ITT Cannon manufactures high quality products. However, these products are intended to be used in accordance with the specifications in this publication. Any use or application that deviates from the stated operating specifications is not recommended and may be unsafe. No information and data contained in this publication shall be construed to create any liability on the part of ITT.

## ITT Cannon

ITT is a focused multi-industrial company that designs and manufactures highly engineered critical components and customized technology solutions. Our customers in the energy, transportation and industrial markets depend on us to solve their most critical problems, and we focus on partnering with them to find solutions to their unique challenges. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries.

Our connector portfolio remains the most extensive in the industry, offering a reliable and cost effective range of interconnect solutions with the brands of Cannon, VEAM and BIW Connector Systems. Continuous investment in technology and research & development have enabled ITT to provide new, innovative products and solutions to markets including:

- Automotive
- Computer & Consumer Electronics
- Industrial/Instrumentation
- Military & Aerospace
- Oil & Gas
- Telecommunications/Wireless Handheld Devices
- Transportation

When you specify a Cannon, VEAM or BIW Connector Systems connector, you can rely on products that are designed, developed, and manufactured to the highest quality and reliability standards. This tradition of excellence is based on ITT's corporate culture of operating its businesses under the principles of Six Sigma. At ITT, Six Sigma is not just a quality philosophy but a complete corporate culture that drives the entire business. Our Value Based Management and Value Based Product Development systems are two cornerstones that allow for the development of both leadership and product engineering principles, ensuring our industry leading products are developed to the accepted market driven lead times. These principles have allowed ITT to become the market leader in all of our business portfolios.

### Six Sigma Manufacturing

ITT Cannon operates manufacturing facilities in the United States, Germany, Italy, Mexico, China and Japan, all of which have particular product area strengths allowing ITT to offer a truly global footprint to our customers. Our facilities are world class and accommodate full vertical integration utilizing the latest manufacturing technologies including: automated and robotic machining centers, Super Market manufacturing cells,

Kanban pull systems, and automated electrical, mechanical, and optical test and inspection equipment. The combination of our manufacturing strength and our advanced manufacturing facilities allows ITT to offer products at market driven prices. Our capabilities, especially in robotics, computerized precision tooling, Kaizen Project Management, Six Sigma tools, and testing, give ITT the most optimized global manufacturing footprint in the interconnect industry.

### The Custom Difference

As the industry leader in harsh environment interconnect applications, ITT's world class engineering teams will work directly with our customers to design and develop cost effective solutions for their applications. In many cases we may modify one of our standard designs to ensure a highly reliable solution where timing is critical. Yet, in those cases where a complete custom interconnect solution is required, ITT will work with our customer's Engineers to design an interconnect solution which will be cost effective yet highly reliable. As professional consultants, our Engineering teams will provide a thorough systems and mechanical analysis of any proposed solution. These analyses provide our customers with sophisticated electrical signal and mechanical characterizations to determine the best solution for their application.

### RoHS Compliance Information

ITT has implemented a strict parts control plan for all ITT electronics plants worldwide that allows the Cannon, VEAM, and BIW Connector Systems product portfolios to meet the requirements of the European Union Directive 2002/95/EC better known as the Reduction of Hazardous Substances (RoHS) initiative. As appropriate, specific Cannon, VEAM, and BIW Connector Systems products may be ordered with an R prefix number which insures our customers will receive RoHS compliant parts for their commercial electronics applications and equipment. Since most RoHS hazardous substances center around specific metal plating and lead solder coatings, ITT's products for RoHS compliance are available in the following plating finishes: electroless nickel, stainless steel, anodize over aluminum and gold plating. It should be noted that gold plating would be recommended as the replacement for tin-lead solder when ordering board mount connectors.

## Circular/Filter/Hermetic Connectors

As a world leader in circular, filter, and hermetic connectors, ITT Cannon can leverage its design and manufacturing expertise to fit virtually any application. Our expertise includes fast positive mating for a wide range of military applications, as well as numerous sizes and contact configurations for various harsh environments.

## D-Subminiature Connectors

Cannon invented D-sub connectors in 1952. Our family of D-Subs now includes combinations of signal, power and RF, as well as severe service sealed connectors. Cannon D-Subs are available with an extensive line of backshells and accessories and are one of the most economical shielded connector solutions available.

## Fiber Optic Connectors and Cable Assemblies

Cannon fiber optic solutions provide an excellent performance/cost value. Performance may be tailored to the end system, with our use of superior materials and bonding agents providing highly effective solutions. Our wide variety of products include fiber optic hybrid contacts, multi-channel, rack and panel and hi-rel assemblies.

## Microminiature Connectors

Developed first by Cannon in the 1960s, Microminiature Connectors offer high performance and reliability with exceptional versatility. Available in rectangular, circular and strip-style configurations for countless applications, many of our highly engineered Microminiature connector products meet critical customer demands in multiple applications across the Aerospace & Defense industry.

## Rack and Panel Connectors

Pioneered by Cannon during the 1930s, our Rack & Panel Connectors offer an unmatched variety of shell configurations and insert arrangements, as well as materials, plating and contact options. Today, we are recognized as an industry leader, offering an unparalleled range of off-the-shelf and custom Rack & Panel products to align with customer needs.

## RF Connectors

ITT Cannon has been providing interconnect products to the Microwave and RF industry since 1963 (formerly The Sealelectro Corporation). The RF 50 & 75 Ohm product lines cover UHF band through Ku band requirements. These connectors and cable assemblies are available with a thread type, snap type, bayonet type or slide on coupling method. The frequencies range from DC to 18+ GHz.

ITT Cannon is a leading global manufacturer of connector products serving international customers in the aerospace and defense, medical, energy, transportation and industrial end markets. Whether delivering critical specs to aircraft pilots, streaming data through communications satellites or enabling ultrasound technology that gives an expectant mother the first glimpse of her unborn child, Cannon connects the world's most important information with the people who need it. **To learn more, visit [www.ittcannon.com](http://www.ittcannon.com)**
