High Power Connectors

**ITT**

ENGINEERED FOR LIFE

# We Connect

When it matters most

For more than a century, ITT Cannon has developed innovative interconnect solutions for the world's harshest environments. With facilities in the United States, Germany, Italy, Mexico, China and Japan, each with its unique strengths, we offer our customers interconnect solutions that are truly Engineered for Life.

In addition to this truly global footprint, we offer highly specialized, segmented industry expertise. We have a proven track record as an industry leader in harsh-environment applications. This has equipped us with the knowledge needed to continue to produce the most resilient, reliable connectors for our customers' most challenging conditions.

## Interconnect solutions for the harshest environments.

### The ITT Cannon difference

- Global capabilities & local support
- Proven application expertise
- A century of interconnect leadership
- A committed innovator & business partner

The logo for Cannon, featuring the word "cannon" in a lowercase, sans-serif font. The letter "o" is replaced by a stylized icon of a three-pronged electrical plug.

### About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in a total of approximately 125 countries. For more information, visit [www.itt.com](http://www.itt.com).

Industrial/Instrumentation

Defense Vehicles

Medical

Heavy Equipment

Rail

Oil & Gas

Commercial & Military Aerospace

Our connector portfolio remains the most extensive in the industry.

Offering a reliable and cost effective range of interconnect solutions.

# How to use

## This catalog is split in several sections to provide...

- A brief introduction to ITT Cannon and CGE
- A general overview of the CGE and VG 96929 product lines
- Detailed product information including contact arrangements, performance and part number data
- Detailed supporting information including accessories and tooling

The fastest way to find your product of choice is to follow these steps

---

**1** **Select your product** using the "ordering reference" option

---

---

**3** **Add accessories and tooling options** on the related pages. A connector assembly instruction is available upon request or visit [www.ittcannon.com](http://www.ittcannon.com)

---

---

**2** **Use the detail pages** to better understand the available options like connector styles, contact arrangements and contacts options

---

---

**4** **Use the contact information** on the back cover to contact us for further questions or to get advise on where you can purchase our products

---

# Introduction to CGE / VG96929

ITT Cannon's CGE series of one pole connectors is derived from VG95234 reversed bayonet connectors and fully approved to the VG96929 military standard. Designed to meet high-power / low voltage requirements this series is typically used in military vehicle or heavy industrial environments.

VG96929 / CGE connectors use two PTFE insulators and a spring retention system that allows for unlimited exchange of contacts, temperature ranges from  $-55^{\circ}\text{C}$  to  $150^{\circ}\text{C}$  and in combination with sealing rings for water pressure tightness of 1 bar.

ITT Cannon's CGE / VG96929 connectors are intermateable with other connector series designed to the VG96929 standard.

## Product & technical key features:

- Suitable for cables from  $25\text{mm}^2$  to  $240\text{mm}^2$  and currents of up to  $\sim 900\text{ A}$
- Sealed to IPx8, 1 bar / 16h water pressure tight
- Operating temperature  $-55^{\circ}\text{C}$  ...  $150^{\circ}\text{C}$
- Visual, audible and tactile locking system for secure mating
- $\frac{1}{4}$  turn reversed bayonet coupling for fast mating and high vibration robustness
- 500 mating cycles
- Simple assembly without special tooling
- RoHS compliant platings are available as alternative to standard Cadmium plating
- Versions for crimp and threaded bolt termination are offered

## Technical Data

**Current rating:** (A) at 125°C (+257 °F) ambient temperature

Shell size	16	18	22	28	32
Contact size	H2	H5	H9	H15	H24
Max Current rating (A)	100	150	239	332	425
Max Short-time load, appr 0,5 – 1 sec (A)	750	1000	2000	3000	5000

### Contact resistance (Millivolt test)

The contact resistance has to be tested according to VG95319 part 2, Test-No. 5.10.1

Contact size	H2	H5	H9	H15	H24
Contact resistance mΩ max.	0,6	0,3	0,15	0,1	0,07

### Insulation resistance

Acc. to VG 95319 part 2, Test-No. 5.12  
 Insulator resistance acc. to VG 96929  
 Standard insulation material > 1000 MΩ

### Dielectric withstanding voltage

According to VG 95319-2, Test-No.5.13  
 Test voltage: Ueff = 1 050 V

### Operating voltage and connector usage

Operating voltage for CGE / VG96929 connectors is limited to 50VAC / 75VDC according to the safety regulations defined in the European Low Voltage Directive (LVD) 2014/35/EU.

For other uses or regions please see appropriate regional regulations.

## Mechanical Features

### Ambient temperature

Standard insulation material -55°/150°C (-67/302°F)

### Safety provisions

Degree of protection IPX8 (1 bar for 16 h) acc. to DIN EN 60529

### Vibration test

200 m/s² at 10 to 2000 Hz

### Mating cycles

500 min.

### Coupling torque

In wired condition acc. to VG95319, Part 2, test no. 5.8.2.

Shell size	Allowable coupling torque Closing and opening Nm max.	Opening Nm min.
16	5,5	0,5
18	8	0,6
22	11	0,8
28	17	0,9
32	19	1

### Contact retention

Acc. To VG 95319, Part 2, test no. 5.4

Contact size	Test force N min
H2	100
H5	120
H9	140
H15	160
H24	200

## Material

### Shell Finish

Cadmium (A66), VG approved, 500h salt spray, highly conductive  
ZnCo black (A239) RoHS, VG approved, 48h salt spray,  
highly conductive

ZnNi blue grey (A240) RoHS, 500h salt spray, highly conductive  
ZnCo green (A233) RoHS, 200h salt spray, highly conductive

### Insulator

PTFE -55°/150°C (-67/302°F)

### Contact

Material: Copper or copper alloy

Finish: Hard silver

### O ring

FKM

### Cables

Approved cable types according to VG95218

## Crimp tools - For connector series CGE / VG96929

### Version A – Hydraulic – Manual hand tool

Description: HPW400U-ITT

Part number: 121586-5257

\* only for contact size H2/25 and H5/50

### Version B – Electro-Hydraulic Crimp set

Description: HP700EL-ITT

Part number: 121586-5279

\* for all contact sizes

Version	Description	Marking	ITT Cannon order-nr.
A	Manually operated Hydraulic hand tool*	HPW400U-ITT	121586-5257
B	Electro-Hydraulic Crimp tool set with foot pedal, hand control and crimp head*	HP700EL-ITT	121586-5279
B (Accessory)	Switch-mode power supply for EHA5 230V	SNT4-ITT	121586-5280
B (Accessory)	Lithium Ion Battery 18V 3A with recharger	LGA4-ITT	121586-5281

## Crimp dies

Contact size	Crimp die	Order part no.	Hexagon wrench size	Marking	Cable size	
					AWG	mm <sup>2</sup>
H2 / 25	complete set	121586-5243	8.45	04	----	25
H5 / 50	complete set	121586-5245	12.40	05	----	50
H9 / 95	lower die	121586-5272	16.1	----	----	95
	upper die	121586-5273				
H15 / 150	lower die	121586-5274	20.90	----	----	150
	upper die	121586-5275				
H24 / 240	lower die	121586-5276	25.00	----	----	240
	upper die	121586-5277				

## PRODUCT SAFETY INFORMATION

---

**THIS NOTE MUST BE READ IN CONJUNCTION WITH THE PRODUCT DATA SHEET/CATALOG. FAILURE TO OBSERVE THE ADVICE IN THIS INFORMATION SHEET AND THE OPERATING CONDITIONS SPECIFIED IN THE PRODUCT DATA SHEET/ CATALOG COULD RESULT IN HAZARDOUS SITUATIONS.**

### 1. MATERIAL CONTENT AND PHYSICAL FORM

Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups.

- a) Printed circuit types and low cost audio types which employ all plastic insulators and casings.
- b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic or glass insulating materials. Contact materials vary with type of connector and also application and are usually manufactured from either: Copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be specified.

### 2. FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD

There is no fire hazard when the connector is correctly wired and used within the specified parameters. Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionization and burning. Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire. Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the product Data Sheet/Catalog are exceeded and can cause breakdown of insulation and hence electric shock. If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonization of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

### 3. HANDLING

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

### 4. DISPOSAL

Incineration of certain materials may release noxious or even toxic fumes.

### 5. APPLICATION

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30 V ac or 42.5 V dc are potentially hazardous and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths. Always use the correct application tools as specified in the Data Sheet/Catalog. Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate national regulations.

### IMPORTANT GENERAL INFORMATION

(i) Air and creepage paths/Operating voltage. The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations. For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

#### (ii) Temperature

All information given are temperature limits. The operation temperature depends on the individual application.

#### (iii) Other important information

Cannon continuously endeavors to improve their products. Therefore, Cannon products may deviate from the description, technical data and shape as shown in this catalog and data sheets.

All data subject to change without notice.
