| Parameter | Rating | Units |
| :--- | :---: | :---: |
| Load Voltage | 60 | V |
| Load Current | 1 | $\mathrm{~A}_{\text {rms }} / \mathrm{A}_{\mathrm{DC}}$ |
| On-Resistance (max) | 0.4 | $\Omega$ |

## Features

- $3750 \mathrm{~V}_{\text {rms }}$ Input/Output Isolation
- Low Drive Power Requirements (TTL/CMOS Compatible)
- Arc-Free With No Snubbing Circuits
- No EMI/RFI Generation
- Small 8-Pin Package
- Machine Insertable, Wave Solderable
- Surface Mount Version
- Tape \& Reel available

## Applications

- Telecommunications
- Instrumentation
- Multiplexers
- Data Acquisition
- Electronic Switching
- I/O Subsystems
- Utility Meters (gas, oil, electric and water)
- Medical Equipment-Patient/Equipment Isolation
- Security
- Aerospace
- Industrial Controls

## Pin Configuration

## Description

LBA716 is a $60 \mathrm{~V}, 1 \mathrm{~A}, 0.4 \Omega$ dual Solid State Relay integrating independent normally open (1-Form-A) and normally closed (1-Form-B) relays into a single package. It features a superior combination of low on-resistance and enhanced peak load current (5A max.) handling capability.

## Approvals

- UL Recognized Component: File \# E76270
- CSA Certified Component: Certificate \# 1175739
- EN/IEC 60950-1 Certified Component TUV Certificate B 090749410004

Ordering Information

| Part \# | Description |
| :--- | :--- |
| LBA716 | 8-Pin DIP (50/Tube) |
| LBA716S | 8-Pin Surface Mount (50/Tube) |
| LBA716STR | 8-Pin Surface Mount (1000/Reel) |

Switching Characteristics of Normally Open Devices

Switching Characteristics of Normally Closed Devices

Absolute Maximum Ratings @ $25^{\circ} \mathrm{C}$

| Parameter | Ratings | Units |
| :--- | :---: | :---: |
| Blocking Voltage | 60 | $\mathrm{~V}_{\mathrm{p}}$ |
| Reverse Input Voltage | 5 | V |
| Input Control Current | 50 | mA |
| Peak (10ms) | 1 | A |
| Input Power Dissipation ${ }^{1}$ | 150 | mW |
| Total Power Dissipation ${ }^{2}$ | 800 | mW |
| Isolation Voltage, Input to Output | 3750 | $\mathrm{~V}_{\text {rms }}$ |
| Operational Temperature | -40 to +85 | ${ }^{\circ} \mathrm{C}$ |
| Storage Temperature | -40 to +125 | ${ }^{\circ} \mathrm{C}$ |

${ }^{1}$ Derate linearly $1.33 \mathrm{~mW} /{ }^{\circ} \mathrm{C}$
2 Derate linearly $6.67 \mathrm{~mW} /{ }^{\circ} \mathrm{C}$

Absolute Maximum Ratings are stress ratings. Stresses in excess of these ratings can cause permanent damage to the device. Functional operation of the device at conditions beyond those indicated in the operational sections of this data sheet is not implied.

## Electrical Characteristics @ $25^{\circ} \mathrm{C}$

| Parameter | Conditions | Symbol | Min | Typ | Max | Units |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Manufacturing Information

Moisture Sensitivity

1
All plastic encapsulated semiconductor packages are susceptible to moisture ingression. IXYS Integrated Circuits Division classified all of its plastic encapsulated devices for moisture sensitivity according to the latest version of the joint industry standard, IPC/JEDEC J-STD-020, in force at the time of product evaluation. We test all of our products to the maximum conditions set forth in the standard, and guarantee proper operation of our devices when handled according to the limitations and information in that standard as well as to any limitations set forth in the information or standards referenced below.

Failure to adhere to the warnings or limitations as established by the listed specifications could result in reduced product performance, reduction of operable life, and/or reduction of overall reliability.

This product carries a Moisture Sensitivity Level (MSL) rating as shown below, and should be handled according to the requirements of the latest version of the joint industry standard IPC/JEDEC J-STD-033.

| Device | Moisture Sensitivity Level (MSL) Rating |
| :---: | :---: |
| LBA716 / LBA716S | MSL 1 |

## ESD Sensitivity

This product is ESD Sensitive, and should be handled according to the industry standard JESD-625.

## Reflow Profile

This product has a maximum body temperature and time rating as shown below. All other guidelines of J-STD-020 must be observed.

| Device | Maximum Temperature x Time |
| :---: | :---: |
| LBA716 / LBA716S | $250^{\circ} \mathrm{C}$ for 30 seconds |

## Board Wash

IXYS Integrated Circuits Division recommends the use of no-clean flux formulations. However, board washing to remove flux residue is acceptable. Since IXYS Integrated Circuits Division employs the use of silicone coating as an optical waveguide in many of its optically isolated products, the use of a short drying bake could be necessary if a wash is used after solder reflow processes. Chlorine- or Fluorine-based solvents or fluxes should not be used. Cleaning methods that employ ultrasonic energy should not be used.

## Mechanical Dimensions

## LBA716

## LBA716S

PCB Land Pattern

## LBA716STR Tape \& Reel

1. Dimensions carry tolerances of EIA Standard 481-2
2. Tape complies with all "Notes" for constant dimensions listed on page 5 of EIA-481-2
