

## JST16 Series 16A TRIACs

Rev.3.0

## DESCRIPTION:

JST16 series triacs, with high ability to withstand the shock loading of large current, provide high dv/dt rate with strong resistance to electromagnetic interface. With high commutation performances, 3 quadrants products especially recommended for use on inductive load.

JST16A provides insulation voltage rated at 2500V RMS and JST16F provides insulation voltage rated at 2000V RMS from all three terminals to external heatsink complying with UL standards (File ref: E252906).
