Disconnectable Crimp style connectors

This connector is for connecting the lithium polymer battery or for connecting DC-IN, and has the sequence structure for connection to the power supply circuit in preference to connection to the signal circuit by dividing the signal circuit and power supply circuit clearly. Moreover, this is the low profile connector (space saving) for applying the high current by adopting the heat radiation structure.

- Connector for power supply (7.0 A)
- Low profile (Space saving)
- Hybrid model of Signal circuit  
+ Power supply circuit
- Heat radiation structure
- Sequence structure
- High-strength
- Check of incomplete mating
