34420A NanoVolt/Micro-Ohm Meter

RoHS compliant (Serial number MY61000101 & SG61000101 onwards)

Nanovolt Performance at a Microvolt Price

The Keysight Technologies 34420A nanoVolt/micro-Ohm meter is a high-sensitivity multimeter optimized for low-level measurements. It combines low-noise voltage measurements with resistance and temperature functions, setting a new standard in low-level flexibility and performance.

KEYSIGHT

Take the Uncertainty Out of Your Low-Level Measurements

Low-noise input amplifiers and a highly tuned input protection scheme bring reading noise down to 8 nVpp. Combine this with 71/2 digits of resolution, selectable analog, and digital filtering, 2 ppm basic 24-hour dcV accuracy, and a shielded copper pin connector, and you've got accurate, repeatable measurements you can count on.

Two Input Channels

An integral two-channel programmable scanner simplifies voltage comparisons. Built-in ratio and difference functions enable automated two-channel measurements without the need for an external nanoVolt scanner. Both channels share the same low-noise specifications to ensure accurate comparisons.

Built-in Resistance and Temperature

The 34420A combines its low-noise nano-Volt input circuits with a high-stability current source to provide precise low-level resistance measurements – no more hassling with the cost and complexity of an external current source. Three resistance modes are included:

- Standard
- Low power
- Voltage-limited for dry-circuit testing

Offset compensation is also provided to minimize thermal EMFs and associated errors.

SPRT Measurements

Built-in ITS-90 conversion routines accept the calibration coefficients from your SPRT probe for direct temperature measurement and conversion. Thermocouples, thermistors, and RTDs are also supported.

Unequaled Versatility

The 34420A gives you the versatility to tackle your most challenging tasks, both on the benchtop and in your automated system. Standard features include RS-232 and GPIB interfaces, SCPI and Keithley 181 programming language, 1024-reading memory, scaling and statistics, and a chart recorder analog output.

Quality You Can Count On

The 34420A gives you the quality and reliability you expect from Keysight Technologies. From the Keysight proven > 150,000 hour Mean Time Between Failure to its standard 1-year warranty, Keysight stands behind you to bring a new level of confidence to your low-level measurements.

BenchVue Software (now included)

Data capture simplified. Click. Capture. Done.

BenchVue software for the PC makes it simple to connect, control, capture, and view Keysight's DMMs simultaneously with other Keysight bench instruments without additional programming.

- Visualize multiple measurements simultaneously
- Easily log data, screenshots, and system state
- Rapidly prototype custom test sequences
- Recall the past state of your bench to replicate the results
- Export measurement data in the desired format fast
- Quickly access manuals, drivers, FAQs, and videos
- Monitor and control bench from mobile devices

The Digital Multimeter App within BenchVue enables control of digital multimeters to visualize measurements and perform unrestricted data logging and statistical analysis.

Benefit from a new perspective by visualizing multiple DMM's at the same time

Display single measurements, charts, tables, or histograms from a single instrument or multiple DMMs simultaneously to correlate trends you might otherwise miss.

Record measurements and export results in a few clicks

Log and export data quickly to popular tools such as Microsoft Excel, Microsoft Word, and MATLAB for documentation or further analysis.

Access and control tests on your DMM remotely

With the companion BenchVue Mobile app, monitor and respond to long-running tests from anywhere. Download BenchVue software at no cost today at www.keysight.com/find/benchvue

1. Specifications are for Channel 1 or Channel 2, after a 2-hour warm-up, resolution at 7.5 digits (100 NPLC), with FILTERS off. RESISTANCE specifications are for 4-wire ohms or 2-wire ohms using Null. Without Null, add 0.2 Ohms additional error in the 2-wire Ohms function. With Analog Filter ON, add 0.002% of reading to the listed specifications.
2. 20% over range on all ranges except 5% on Voltage Limited Resistance.
3. After using Null. If Null is not used, add 100 nanoVolts.
4. Channel 1 only.
5. Channel 1 only. Resistance measurements, for NPLC < 1, add 160 µΩ RMS noise.
6. The voltage limit can be set to 20 mV (default), 100 mV, or 500 mV. Measured resistance plus Channel 1 HI and LO lead resistance is limited to 10.5 Ω in the 10 Ω range and 105 Ω in the 100 Ω range.
7. For 25 Ω SPRT with triple-point of water, check within the last 4 hours. Without the triple-point of water check, add 0.013 °C for 24 hours, add 0.035 °C for 90 days, and add 0.055 °C for 1-year specifications.
8. For fixed reference junction. Add 0.3 °C for the external reference junction, and add 2.0 ûC for the internal reference junction.

[1] After a 2-hour warm-up, ± 1 °C, 6.5 digits (10 PLC) with Analog Filter Off and Digital Filter Medium (50 reading average).
2-minute rms and 24-hour noise typical. For measurements using 0.02 or 0.2 NPLC, add 800 nV rms noise.
[2] Typical noise behavior for Ch 1 or Ch 2, after 2-hour warm-up, 6.5 digits (10 PLC), 2-minute observation period on 1 mV range.
For peak-to-peak noise, multiply rms noise by 6.

Ordering Information

Includes low thermal input cable (34102A), low thermal shorting plug (34103A), Kelvin clip set (11062A), calibration certificate, and power cord.

Options	Description
34420A-A6J	ANSI Z540 compliant calibration

Accessories

Options	Description
34102A	Low-thermal input cable (four conductors) with copper spade lugs
34103A	Low-thermal shorting plug
34104A	Low-thermal input connector
34131A	Transit case
34161A	Accessory pouch
34190A	Rackmount Kit: This kit is designed for use with only one instrument, mounted on either the left or the right side of the rack.
34191A	2U Dual Flange Kit: Secures the instrument to the front of the rack. This kit can be used with the instrument to the front of the rack.
34194A	Dual Lock Link Kit: Recommended for side-by-side combinations and includes links for instruments of different depths. This kit can be used with the 34191A 2U Dual Flange Kit to mount two half-width, 2U height instruments side-by-side.
