

Inclinometers

Inclinometer **MEMS / capacitive**

IN88, 1- and 2-dimensional

CANopen

The inclinometers of the IN88 series allow measuring 2-dimensional inclinations in the range of ±85° or 1-dimensional inclinations up to 360°.

With their high robustness, their protection level up to max. IP69k and their wide temperature range from -40°C to +85°C, these devices are ideally suitable for outdoor use - e.g. for mobile automation applications.

Reverse polarity

Temperature

Robust

- · High protection rating IP67 and IP69k in one device.
- · Highest robustness thanks to metal housing.
- Stable accuracy over the whole temperature range from -40°C up to +85°C.
- · Non long-term drift thanks to sensor array technique.

Versatile

- · Parameterizable filter.
- · Measuring direction 1- or 2-dimensional.
- With 1 x M12 connector or 2 x M12-connector.
- · Stacked installation possible for redundancy.

a Measuring direction

1 = 1-dimensional 2 = 2-dimensional

b Measuring range

 $6 = \pm 85^{\circ 1}$ $7 = 0^{\circ} \dots 360^{\circ 2)}$ Interface CANopen d Power supply 2 = 10 ... 30 V DC

Type of connection 1 = 1 x M12 connector, 5-pin $3 = 2 \times M12$ connector, 5-pin

| Connection technology | | Order no. |
|-------------------------------------|---|---------------------------------|
| Cordset, pre-assembled | M12 female connector with coupling nut for Bus in, 5-pin 5 m [16.40'] PVC cable | 05.00.6091.A211.005M |
| | M12 male connector with external thread for Bus out, 5-pin 5 m [16.40'] PVC cable | 05.00.6091.A411.005M |
| Connector, self-assembly (straight) | M12 female connector with coupling nut for Bus in, 5-pin M12 male connector with external thread for Bus out, 5-pin | 05.B-8151-0/9 05.BS-8151-0/9 |

General information on CANopen

The CANopen inclinometers support the latest CANopen communications profile according to DS301. In addition, device-specific profiles such as the inclinometer profile DS410 and DS305 (LSS) are available.

The following operating modes may be selected: Polled Mode, Cyclic Mode, Sync Mode. Moreover, scale factors, preset values and many other additional parameters can be programmed via the CAN bus. When switching the appliance on, all parameters are loaded from a flash memory. These parameters have previously been stored in a zero-voltage secure manner. The output values position, position raw value, sensor temperature and sensor information can be combined very variably as a PDO (PDO mapping). The inclinometers are available with one or two connectors.

The device address and baud rate can be set/modified by means of the software. The two-color LED indicates the operating or fault status of the CAN bus, as well as the status of the internal diagnostics.

LSS layer setting services DS305 V2.2

- · Global command support for node address and baud rate configuration.
- Selective protocol via identity object (1018h).

CANopen communication profile DS301 V4.2

Among others, the following functionality is integrated (Class C2 functionality):

- NMT slave.
- Heartbeat protocol.
- Identity object.
- Error behavior object.
- Variable PDO mapping, 2 sending PDO's.
- Node address, baud rate and programmable CANbus termination.

CANopen inclinometer profile DS410 V1.3

The following parameters can be programmed:

- Variable PDO mapping of position, position raw value, sensor temperature and sensor information.
- · Extended failure management.
- User interface with visual display of bus and failure status 1 LED two-color.
- Customer-specific protocol.
- "Watchdog controlled" device.

Over the whole temperature and measuring range 1-dimensional ≤ ±0.4°; 2-dimensional ≤ ±1°.

²⁾ Only for 2-dimensional measuring direction.
