Bluetooth[®] AT Data Module Datasheet

REVISION HISTORY

Revision	Date	Description	Approved By
1.0	3 Jan 2012	Initial Release	Jonathan Kaye
2.0	20 Mar 2012	Updates to firmware v11.28.1.0	Jonathan Kaye
3.0	11 May 2012	Formatting and general editing	Jonathan Kaye
4.0	7 Jan2013	Updated FCC Statement, new mech. drawings, general editing / formatting	Jonathan Kaye
4.1	15 Mar 2013	Converted to Laird formatting	Sue White
5.0	04 Feb 2014	Separated into two separate docs (Hardware Integration Guide and User Guide). Added a Related Documents section.	Sue White
5.1	06 Feb 2014	Updated the Bluetooth SIG Qualification section.	Jonathan Kaye
5.2	15 Aug 2014	Updated shipping tray image and added module package dimension image.	Jonathan Kaye
5.3	3 Sept 2014	Updated EU Declaration of Conformity	Jonathan Kaye
5.4	30 Nov 2016	Updated to Datasheet from Hardware Integration Guide	Sue White

1 OVERVIEW AND KEY FEATURES

The BTM430 and BTM431 Bluetooth[®] modules from Laird Technologies have been designed to meet the needs of developers who wish to add robust, short range Bluetooth data connectivity to their products. They are based on the market leading Cambridge Silicon Radio BC04 chipset, providing exceptionally low power consumption with outstanding range.

With physical sizes as small as 12.5 x 18.0mm and best of class, low-power operation, these modules are the ideal choice for applications where designers need both performance and minimum size. For maximum flexibility in systems integration, the modules are designed to support a separate power supply for I/O.

To aid product development and integration, Laird Technologies has integrated a complete Bluetooth protocol stack within the modules, including support for the Bluetooth Serial Port Profile. The modules are fully qualified as Bluetooth End Products, allowing designers to integrate them within their own products with no further Bluetooth Qualification. They can then list and promote their products on the Bluetooth website free of charge.

A comprehensive AT command interface is included, which simplifies firmware integration. Combined with a low cost developer's kit, this ensures that the choice of Laird Technologies Bluetooth modules guarantees the fastest route to market.

RoHS

1.1 FEATURES AND BENEFITS 8

- Bluetooth[®] v2.0+EDR
- Adaptive Frequency Hopping to cope with interference from other wireless devices
- External or internal antenna options
- Comprehensive AT interface
 for simple programming
- Bluetooth[®] END Product Qualified
- Compact size
- Class 2 output 4dBm
- Low power operation
- UART interface
- PCM and SCO for external codec
- GPIO lines under AT control
- Support for multiple profiles
- Wi-Fi co-existence

1.2 APPLICATIONS

- Embedded Devices
- Phone Accessories
- Security Devices
- Medical and Wellness Devices
- Automotive Applications
- Bluetooth Advertising
- ePOS

2 SPECIFICATIONS

2.1 Detailed Specifications

Categories	Feature	Implementation	
Wireless Specification	Bluetooth®	Version 2.0+EDR	
	Transmit Class	Class 2	
	Frequency	2.402 – 2.480 GHz	
	Channels	79 channels Frequency Hopping Adaptive Frequency Hopping	
	Max Transmit Power	+4 dBm at antenna pad – BTM430 +4 dBm from integrated antenna – BTM431	
	Min Transmit Power	-27 dBm at antenna pad – BTM430 -27 dBm from integrated antenna – BTM431	
	Receive Sensitivity	-84dBm	
	Range	30m	
	Data Transfer Rate	Up to 300 kbps	
Antenna Modes	External Antenna	50 Ohm matched SMT pad – BTM430	
	Integrated Antenna (option)	+0dBi multilayer ceramic – BTM431	
UART Interface	Serial Interface	RS-232 bi-directional for commands and data 16550 compatible	
	Baud Rate	Configurable from 1,200 to 921,600bps Non-standard baud rates supported	
	Bits	8	
	Parity	Odd, even, none	
	Stop bits	1	
	Default Serial parameters	9600,n,8,1	
	Levels	Set by VDD_USB input	
	Modem Control	DTR, DSR, DCD, RI, RTS, CTS	
General Purpose Interface	I/O	8 general purpose I/O pins	
Audio	Support	1 PCM channel @ 64kbps	
	SCO Channels	Support SCO and eSCO	
	PCM Interface	Configurable as master or slave 8 bit A-law 8 bit µ-law 13 bit linear PCM Clock available when in slave mode	
Protocols and Firmware	Bluetooth Stack	V2.0 compliant. Fully integrated.	
	Profiles	GAP Generic Access Profile SDP Service Discovery Profile	
		SDF Service Discovery Frome

Bluetooth® AT Data Module Datasheet

Pin	Signal	Description	Voltage Specification
39	Unused		
40	Unused		
41	GND		
42	GPIO1/ UART_RI	I/O for host	VIO
43	GPIO7	UART_DTR	VIO
44	GPIO8	UART_DSR	VIO
45	GND		
46	D-	Not used for AT module variants	VUSB
47	D+	Not used for AT module variants	VUSB
48	GPIO6	RF_ACTIVE	VIO
49	GPIO5	WLAN_ACTIVE	VIO
50	GPIO3	BT_PRIORITY	VIO

Note: 1. Unused pins may have internal connections and must not be connected.

Reset input is active low. Input is pulled up to VDD_IN via 22k. Minimum reset pulse width is 5 ms.
 Pins 8 – 11 (SPI related) are only for Laird internal production purposes.

4. Pins 25-37 should be left not connected on modules with integrated antenna

2.3 **Operating Parameters**

Table 3: Operating Parameters

Recommended Operating Condit	ions	
OPERATING CONDITION	MIN	MAX
VDD_USB (USB compatibility not required)	1.7	3.6
VDD_USB (USB compatibility required)	3.1	3.6
VDD_IO	1.7	3.3
VDD_IN	3.0	3.3

3 APPLICATION NOTE FOR SURFACE MOUNT MODULES

3.1 Introduction

Laird Technologies surface mount modules are designed to conform to all major manufacturing guidelines. This application note is intended to provide additional guidance beyond the information that is presented in the User Manual. This Application Note is considered a living document and will be updated as new information is presented.

The modules are designed to meet the needs of a number of commercial and industrial applications. The modules are designed to be easily manufactured and conform to current automated manufacturing processes.

3.2 Shipping

Modules are shipped in ESD (Electrostatic Discharge) safe trays that can be loaded into most manufacturers pick and place machines. Layouts of the trays are provided in Figure 1 and Figure 2.

Figure 1: BTM430 and BTM431 Shipping Tray Details

Embedded Wireless Solutions Support Center: <u>http://ews-support.lairdtech.com</u>

Bluetooth[®] AT Data Module Datasheet

3.3 **Reflow Parameters**

Laird Technologies surface mount modules are designed to be easily manufactured including reflow soldering to a PCB. Ultimately it is the responsibility of the customer to choose the appropriate solder paste and to ensure oven temperatures during reflow meet the requirements of the solder paste. Laird Technologies' surface mount modules conform to J-STD-020D1 standards for reflow temperatures.

Figure 2: Recommended Reflow Temperature

Temperatures should not exceed the minimums or maximums presented in Table 6.

	Table 6: Recommended Maximum and minimum tempe	ratures
--	--	---------

Recommended Max & Min's		
SPECIFICATION	VALUE	UNIT
Temperature Inc./Dec. Rate (max)	3	°C / Sec
Temperature Decrease rate (goal)	2-3	°C / Sec
Soak Temp Increase rate (goal)	.5 - 1	°C / Sec
Flux Soak Period (Min)	60	Sec
Flux Soak Period (Max)	90	Sec
Flux Soak Temp (Min)	150	°C
Flux Soak Temp (max)	190	°C
Time Above Liquidous (max)	60	Sec
Time Above Liquidous (min)	20	Sec
Time In Target Reflow Range (goal)	30	Sec
Time At Absolute Peak (max)	30	Sec
Liquidous Temperature (SAC305)	217	°C
Lower Target Reflow Temperature	225	°C
Upper Target Reflow Temperature	250	°C
Absolute Peak Temperature	260	°C

4 FCC REGULATORY STATEMENTS

4.1 BTM430 FCC and Industry Canada Statements

The Final Equipment user manual must show the following statements:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

To comply with the FCC RF exposure compliance requirements, this device and its antenna must not be co-located or operating to conjunction with any other antenna or transmitter.

Considerations for OEM integration:

This module has a limited modular approval. Approval with any other antenna configuration or layout other than that approved will necessitate additional radiated emission testing to be performed.

To inherit the modular approval, the antennas for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

This module was approved with the following antenna:

RF Solutions: ANT-24G-WHJ-SMA 0dBi

Operation of this module with any other antenna will require additional testing to be performed.

Co-location with other radio transmitting devices operating concurrently in the same band will require additional testing and certification.

Designers should note the distinction that the FCC makes regarding portable and mobile devices. Mobile devices are defined as products that are not used closer than 20cm to the human body, whereas portable devices can be used closer that 20cm to the body. A device may be used in portable exposure conditions with no restrictions on host platforms when the averaged output power is less than the low power threshold for an uncontrolled environment $\leq 60/f$ (GHz) i.e. 25 mW for a 2.4 GHz device. The maximum Power Exposure for the BTM430 has been evaluated and found to comply with the low power threshold for an uncontrolled environment.

Refer to FCC document KDB 447498 for more information on RF exposure procedures and equipment authorization policies for mobile and portable devices.

FCC Labeling requirement

If the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: PI4410B" or "Contains FCC ID: PI4410B." Any similar wording that expresses the same meaning may be used.

Bluetooth® AT Data Module Datasheet

4.2 BTM431 FCC and Industry Canada Statements

The user manual must show the following statements:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

To comply with the FCC RF exposure compliance requirements, this device and its antenna must not be co-located or operating to conjunction with any other antenna or transmitter.

Considerations for OEM integration:

To inherit the modular approval, the antennas for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

Co-location with other radio transmitting devices operating concurrently in the same band will require additional testing and certification.

Designers should note the distinction that the FCC makes regarding portable and mobile devices. Mobile devices are defined as products that are not used closer than 20cm to the human body, whereas portable devices can be used closer that 20cm to the body. A device may be used in portable exposure conditions with no restrictions on host platforms when the averaged output power is less than the low power threshold for an uncontrolled environment \leq 60/f (GHz) i.e. 25 mW for a 2.4 GHz device. The Maximum Power Exposure for the BTM431 has been evaluated and found to comply with the low power threshold for an uncontrolled environment.

Refer to FCC document KDB 447498 for more information on RF exposure procedures and equipment authorization policies for mobile and portable devices.

FCC Labelling requirement

If the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: PI4411B" or "Contains FCC ID: PI4411B." Any similar wording that expresses the same meaning may be used.

5 EU DECLARATION OF CONFORMITY – BTM430 / BTM431

Manufacturer:	Laird
Product:	BTM410 / BTM411 / BTM420 / BTM421 / BTM430 / BTM431 / BTM441 / BTM443 / BTM461
EU Directive:	RTTE 1995/5/EC
Conformity Assessment:	Annex IV

1.1 Reference Standards used for Presumption of Conformity

Article Number	Requirement	Reference standard(s)
3.1a	Health and Safety	EN 60950-1:2005 (2 nd Ed); +Am1:2009 +Am2:2013 EN 60950-1:2006+A11+a1:2010+A12:2011+A2:2013
3.1a	RF Exposure	EN 62479:2010
3.1b	Protection requirements with respect to electromagnetic compatibility	EN 301 489-1 V1.9.2 (2011-09) EN 301 489-17 V2.2.1 (2012-09) Emissions: EN55022:2010 /AC:2011 (ClassB) Immunity: EN61000-4-2:2009 EN61000-4-3:2006 /A1:2008 /A2:2010
3.2	Means of the efficient use of the radio frequency spectrum	EN 300 328 V1.8.1 (2012-06)

1.2 Declaration:

We, Laird, declare under our sole responsibility that the essential radio test suites have been carried out and that the above product to which this declaration relates is in conformity with all the applicable essential requirements of Article 3 of the EU Directive 1995/5/EC, when used for its intended purpose.

7 ORDERING INFORMATION

Part Number	Description
BTM430	Bluetooth AT Data Module (external antenna)
BTM431	Bluetooth AT Data Module (with integrated antenna)
DVK – BTM430	Development board with BTM430 module soldered in place
DVK – BTM431	Development board with BTM431 module soldered in place

7.1 General Comments

This is a preliminary datasheet. Please check with Laird Technologies for the latest information before commencing a design. If in doubt, ask.

Refer to the schematic BTDMD-R-001.pdf for the Development Kit on the following two pages for examples of typical pin connections. A pdf of the schematic can be downloaded from the product web page.

8 BLUETOOTH SIG QUALIFICATION

The BTM430 and BTM431 modules are listed on the Bluetooth SIG website as qualified End Products.

Design Name	Owner	Declaration ID	Link to listing on the SIG website
BTM430, BTM431	Laird Technologie s	B016510	https://www.bluetooth.org/tpg/QLI viewQDL.cfm?qid=16510

It is a mandatory requirement of the Bluetooth Special Interest Group (SIG) that every product implementing Bluetooth technology has a Declaration ID. Every Bluetooth design is required to go through the qualification process, even when referencing a Bluetooth Design that already has its own Declaration ID. The Qualification Process requires each company to registered as a member of the Bluetooth SIG – www.bluetooth.org

The following link provides a link to the Bluetooth Registration page: <u>https://www.bluetooth.org/login/register/</u>

For each Bluetooth Design it is necessary to purchase a Declaration ID. This can be done before starting the new qualification, either through invoicing or credit card payment. The fees for the Declaration ID will depend on your membership status, please refer to the following webpage: https://www.bluetooth.org/en-us/test-qualification/qualification-overview/fees

For a detailed procedure of how to obtain a new Declaration ID for your design, please refer to the following SIG document:

https://www.bluetooth.org/DocMan/handlers/DownloadDoc.ashx?doc_id=283698&vId=317486

To start the listing, go to: https://www.bluetooth.org/tpg/QLI SDoc.cfm

In step 1, select the option, Reference a Qualified Design and enter 16510 in the End Product table entry. You can then select your pre-paid Declaration ID from the drop down menu or go to the Purchase Declaration ID page, (please note that unless the Declaration ID is pre-paid or purchased with a credit card, it will not be possible to proceed until the SIG invoice is paid.

Bluetooth® AT Data Module Datasheet

Once all the relevant sections of step 1 are complete, complete steps 2, 3 and 4 as described in the help document. Your new Design will be listed on the SIG website and you can print your Certificate and DoC.

For further information please refer to the following training material; <u>https://www.bluetooth.org/en-us/test-gualification/gualification-overview/listing-process-updates</u>

Innovative **Technology** for a **Connected** World

Laird Technologies is the world leader in the design and manufacture of customized, performance-critical products for wireless and other advanced electronics applications. Laird Technologies partners with its customers to find solutions for applications in various industries such as:

- Network Equipment
- Telecommunications
- Data Communications
- Automotive Electronics
- Computers
- Aerospace
- Military
- Medical Equipment
- Consumer Electronics

Laird Technologies offers its customers unique product solutions, dedication to research and development, as well as a seamless network of manufacturing and customer support facilities across the globe.
