

### SuperCool Series Thermoelectric Cooler Assembly

The SLA-400-24-02 Liquid-to-Air thermoelectric cooler assembly is a high performance thermoelectric based liquid cooler. It is designed to temperature control small chambers used in medical diagnostics, lasers, imaging systems or sample storage compartments in analytical instrumentation. This unique, **patented** design offers a high performance hot side heat dissipation mechanism that convects heat more efficiently than conventional heat exchanger technologies. The design utilizes custom thermoelectric modules to maximize cooling capacity and premium grade fans to keep the noise down. Moisture resistant insulation is used to keep condensation from penetrating into the thermoelectric module cavity. This unit operates at 24 VDC and is designed for indoor lab use environment. It has a maximum Qc of 407 Watts when  $\Delta T=0$  and a maximum  $\Delta T$  of 39 °C at Qc = 0.

#### US Patent US2016/0255746 A1

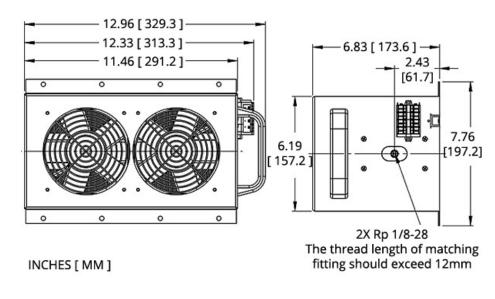

## **Features**

- High performance
- Compact form factor
- Reliable solid-state operation
- RoHS-compliant

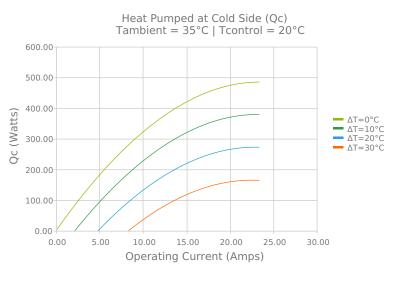

#### **Applications**

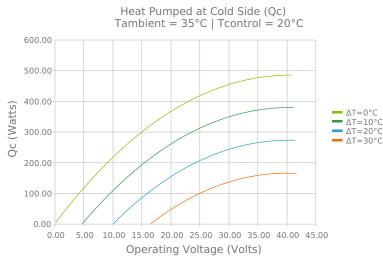

- Liquid Cooling Options for PET and SPECT Scanners
- Peltier Cooling for Refrigerated Centrifuges
- Heating and Cooling of Incubator Chambers
- Thermal Management Solutions for Beverage Cooling

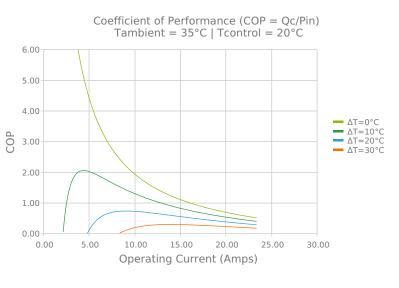

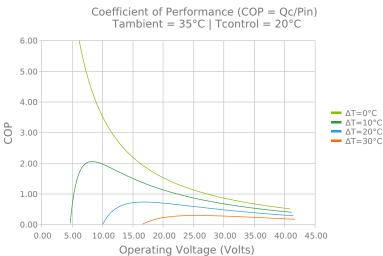

## **ELECTRICAL AND THERMAL PERFORMANCE**

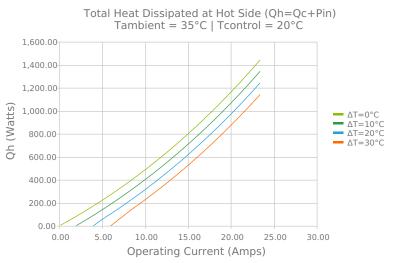

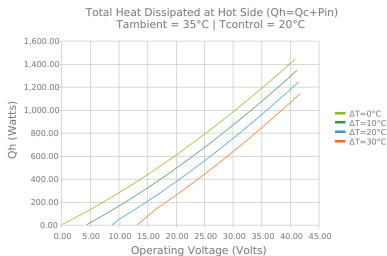

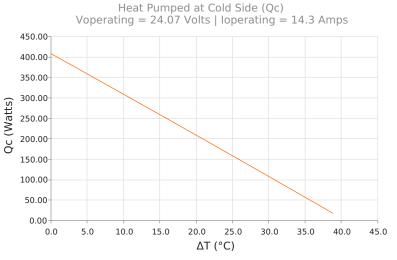

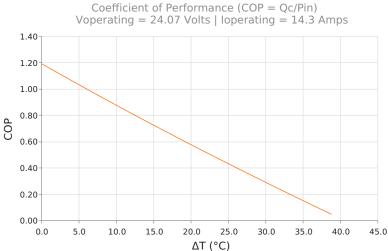

## **SPECIFICATIONS**

**Operating Temperature Range** 

**Supply Voltage** 

**Current Draw**

### **WIRING SCHEMATIC**

## **NOTES**

<sup>1</sup>For indoor use only

<sup>2</sup>Units are generally maintenance free, however occasionally it is recommended to clean the heat sinks and fans of debris. This is best done with compressed air.

<sup>3</sup>Cooled liquid block needs to be isolated from humidity in the air to minimize condensation and thermally insulated for best performance.
