

**Nextreme™ NRC400 Performance Chiller**

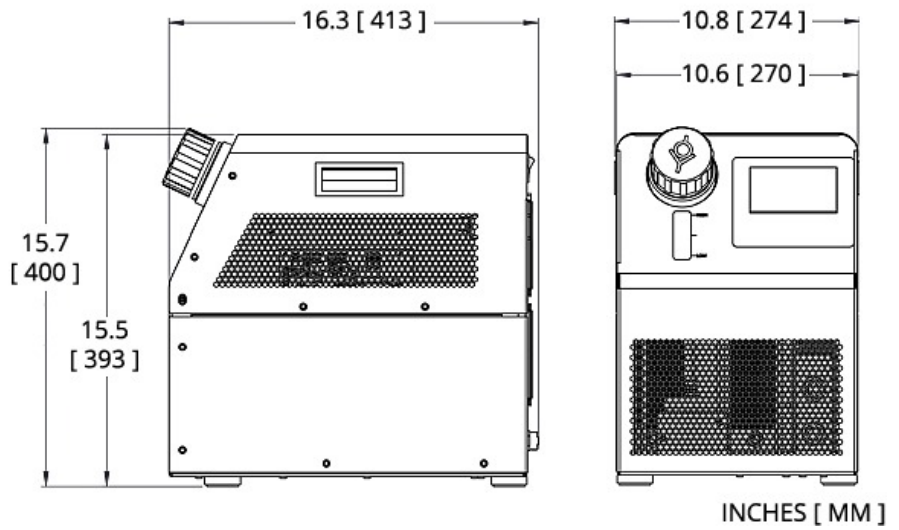

The Nextreme NRC400 is a next generation benchtop recirculating chiller using solid-state thermoelectric technology for precise temperature control of analytical and industrial equipment. It offers high heat pumping capacity for its size, improved temperature stability and lower noise operation than previous models. Utilizing custom thermoelectric coolers with premium thermoelectric materials, it delivers a higher coefficient of performance (COP). The NRC400 is a semi-closed system with a large reservoir tank requiring less refilling. It is equipped with a high-quality pump offering high MTBF with low pulsation to accommodate highly sensitive imaging and test instruments. Users can easily control temperature setpoints and alarm settings via the LCD touchscreen display. Custom configurations are available, however, MOQ applies. Power cord is **not** supplied with the unit and **must be ordered separately**.
