FLEXIMARK® Plier FL52ERA FL52A

Delivery:

FLEIXMARK® Pliers are delivered in package separately.

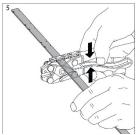

Mounting:

FLEXIMARK® Character holders can be used for both cable and component marking. You simply punch the holes for cable ties or screws as you need them.

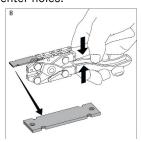

- 1. With FLEXIMARK® Plier FL52ERA, you can punch both holes for cable ties on holders with a width of 6-12mm.
- 1. With FLEXIMARK® Plier FL52A you can punch both holes for cable ties on character holders with a width of 19mm

4. Push the holder through the hole for punching the following holes for cable tie mounting

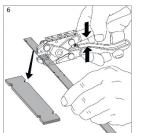

7. Press the handles for punching center holes.

2. Insert the character holder into the area for punching. Note: Choose the right area for the right width of character holders.

5. Use the front cutting part to cut the punched holders

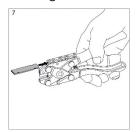

8. Mount your holder together with cable ties or screw

3. Punch both holes by squeezing the handles

6. Use the front punching part for punching center holes for screw mounting
