PRODUCT DATA SHEET

LFBHL - 6S33

TECHNICAL DATA

Operating voltage	24 V DC
Rated Power / m	15 W
Rated current / m	630 mA (± 10%)
LED Type	SMD 2216
LED spacing	3,57 mm
LED quantity / m	280
Cut size	25 mm / 7 LED
Light efficiency	up to 85lm / Watt
Control	yes (PWM optional)
Protection class	IP 20
Connection	2 Pads
Max. wire cross section	max. 0,75 qmm
Max. assembly length	max. 5 m
Bending radius	30 mm

Control gear and accessories

Further information on the control gear can be found in the installation instructions accompanying the product.

Further information on the accessories can be found in the accessories data sheet belonging to the product.

VERSIONS

PRODUCT FEATURES

Voltage based flexible LED module

Suitable for applications with medium brightness requirements

Pulse width modulation (PWM) control is optional

Two-layer foil circuit board with optimized thermomanagement

Mounting by self-adhesive 3M tape

IMPORTANT NOTES

Lifetime notes

The max. Tc/Tp temperature plays a decisive role in the service life specifications of ledxon LED modules. Exceeding the permissible limits results in a significant reduction of the service life and can even lead to the destruction of the modules. The expected lifetime of >60,000 hours represents a purely statistical value. (L70B50 at Tp65°). For optimal operation of ledxon LED modules, we recommend mounting them exclusively on rigid and immovable surfaces. The heat sink must provide sufficient heat dissipation so that the maximum permissible temperature at the Tc point is not exceeded. The temperature measurement at the Tc point must be carried out according to the specifications of EN 60598-1.

Notes photometric and electrical data

Chromaticity coordinates and tolerances according to CIE 1931

Measuring ambient temperature: ta=25°C

Measurement tolerance color coordinates (x/y) +/-0.005

The maximum permissible operating voltage must not be exceeded. This may lead to a reduction in lifetime or failure.

All Ledxon LED modules can be dimmed by PWM (pulse width modulation).

Safety and installation instructions

When installing the flexible LED modules, do not fall below the maximum permissible bending radius. Bending in the transverse direction will damage the PCB. For optimal adhesive properties of the double-sided 3M adhesive tape, ledxon recommends mounting exclusively on dry, clean, grease-, oil- and silicone-free surfaces. Ledxon assumes no liability for the correct bonding of the LED modules. Standard ESD protection measures must be observed when installing ledxon LED modules. Flexible LED modules are delivered without lead. Electrification is done by soldering leads to the provided solder pads. The maximum permissible cable cross-section must be observed. The soldering temperature of 270° C for max. 10 seconds must not be exceeded. LED modules are subject to photobiological risk group 1.
