

**Ultra Fast High PSRR
Low Noise CMOS Voltage Regulator**

LR6205 Series

■ **INTRODUCTION**

The LR6205 series are a group of positive voltage regulators manufactured by CMOS technologies with high ripple rejection, ultra low noise, low power consumption and low dropout voltage, which can prolong battery life in portable electronics. The LR6205 series work with low-ESR ceramic capacitors, reducing the amount of board space necessary for power applications. The LR6205 series consume less than 0.1uA in shutdown mode and have fast turn-on time less than 50us. The series are very suitable for the battery-powered equipments, such as RF applications and other systems requiring a quiet voltage source.
