

Battery Holder Overview Guide

Surface and through-hole mount battery holders are a smart choice for cost-sensitive, space-constrained applications involving computers, remote controls and other compact electronics. They provide solid electrical contact for CR1216, CR1225, CR2016, CR2025 and CR2032 lithium coin and button cells. Their nickel-plated phosphor bronze construction provides good conductivity and strength. Two metal arms secure the battery to the contact patch.
