## Description

The 467 Series Fast-Acting Surface Mount Fuse (SMF) is an ultra small (0603 size) thin-film device designed for secondary protection of circuits used in space constrained applications such as hand-held portable electronic devices. This series is $100 \%$ leadfree and meets the requirements of the RoHS directive. New Halogen-Free 467 Series fuses are available-to order use the "HF" suffix. See Part Numbering section for additional information.

## Features \& Benefits

- Compatible with lead-free solders and higher temperature profiles
- High performance materials provide improved performance in elevated ambient temperature applications
- Marked on top surface with code to allow amp rating identification without testing

Element covering material is resistant to industry standard cleaning operations

- Mounting pad and electrical performance is identical to Littelfuse 431 and 434 Series products
- Halogen free, Lead-free and RoHS compliant
- Recognized to UL/CSA/NMX
- Low profile for height sensitive 248-1 and UL/CSA/NMX 248-14 applications
- Flat top surface for pick-andplace operations

## Applications

Secondary protection for space constrained applications:

- Cell phones
- DVD players
- Battery packs
- Hard disk drives.
- Digital cameras

Temperature Rerating Curve

Note:

1. Rerating depicted in this curve is in addition to the standard derating of $25 \%$ for continuous operation.

## Example:

For continuous operation at 70 degrees celsius, the fuse should be deratedas follows: $\left.I=(0.75)(0.80))_{\text {RAT }}=(0.60)\right)_{\text {RAT }}$
2. The temperature derating curve represents the nominal conditions. For questions about temperature derating curve, please consult Littelfuse technical support for assistance.
