## **Electrical Characteristics for Series**

| % of Ampere<br>Rating | Ampere Rating | Opening Time at 25°C |  |  |
|-----------------------|---------------|----------------------|--|--|
| 100%                  | 10A – 20A     | 4 Hours, Minimum     |  |  |
| 350%                  | 10A – 20A     | 5 Seconds, Maximum   |  |  |

#### **Description**

The 501 Series is a 100% Lead-free, RoHS compliant and Halogen-free fuse series designed specifically to provide over- current protection to circuits that operate under high working ambient temperature up to 150°C.

The general design ensures excellent temperature stability and performance reliability.

The high I2t values which is typical in the Littelfuse Ceramic Fuse family, ensure high inrush current withstand capability.

#### **Features**

- Operating Temperature from -55°C to +150°C
- Designed to provide over-current protection in high current voltage regulator module (VRM) applications
- 100% Lead-free, RoHS compliant and Halogenfree
- · Suitable for both leaded and lead-free reflow / wave soldering

## **Applications**

- Voltage Regulator Module (VRM) Equipment
- Notebook PC
- DC-DC Converter

#### Notes:

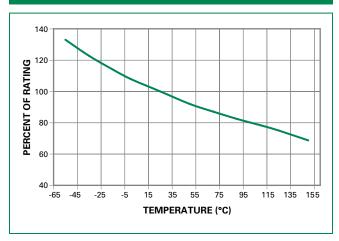

- 1. DC Interrupting Rating tested at rated voltage with time constant < 0.5 msec.
- 2. Nominal Resistance measured with < 10% rated current.
- 3. Nominal Melting I2t measured at 1 msec. opening time. For other I2t data refer to chart.
- 4. Nominal Voltage Drop measured at rated current after temperature has stabilized and with fuse mounted on board with 3-oz Cu trace.

Devices designed to carry rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See "Temperature Re-rating Curve" for additional re-rating information.

Devices designed to be mounted with marking code facing up.

## **Temperature Re-rating Curve**

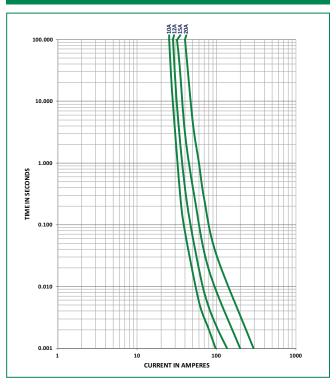

#### Note:

 Re-rating depicted in this curve is in addition to the standard re-rating of 20% for continuous operation.

#### Example:

For continuous operation at 75 degrees celsius, the fuse should be rerated as follows:  $I=(0.80)(0.85)I_{RAT}=(0.68)I_{RAT}$
