

MINI® Sn (Tin plated) Blade Fuses

Time-Current Characteristic Curves

*Component Level Temperature = the maximum ambient temperature that a single fuse will survive. This does not factor-in the heat from a populated fuse box, but does include the heat from the current load with the proper rerating. **System Level Temperature represents the ambient temperature of the fuse box at a location within the vehicle. The temperature within a populated fuse box (in a given location) will be higher. The limiting factor is the plating. Sn-plating's temperature limit is ≈130°C, and Ag-plating allows up to 150°C at the terminal interface.

MINI® Blade Fuses Rated 32V

The MINI® Fuse is the standard for vehicle circuit protection. Its miniature design meets the need for more circuits to be protected while utilizing less space, and its ability to cope with high temperatures in adverse environments makes the MINI® Fuse of recommended choice for protection.

Specification	MINI	MINI Sn	
	(Silver Plated)	(Tin Plated)	
Interrupting Rating:	1000A @ 32 VDC	1000A @ 32 VDC	
Voltage Rating:	32 VDC	32 VDC	
*Component Level Temperature Range:	-40°C to +125°C	-40°C to +105°C	
**System Level Temperature Range:	-40°C to +105°C	-40°C to +85°C	
105°C and 85°C are typical system level ter	mperature requirements.		
Terminals:	Ag plated zinc alloy	Sn plated zinc alloy	
Housing Material:	PA66	PA66	
Complies with:	SAE J2077, ISO 8820-3,	SAE J2077, ISO 8820-3	
	UL 248 Special Purpose Fuses	not UL recognized
