

# FHZ SERIES 5 STUD & 7 STUD ZCASE® FUSE HOLDERS

400A • 32V DC • 5 Stud & 7 Stud • ZCASE®

## Description

The 5 Stud and 7 Stud ZCASE Fuse Holders are configurable products designed for primary high current power distribution. They use a power input terminal, which is usually paired with a ZCASE shunt for the input. With common bussed power, configurable studs (choose M6, M8, or M10) and appropriate ZCASE fuses, a wide variety of configurations are possible. The dust covers keep dust out of the backside of the fuse box and the cover protects the fuses from debris.

## Features and Benefits

- High Current Distribution with Flexible bussing and configurable stud sizes to improve assembly Poka Yoke
- Midi range ZCASE fuses (40A-200A) and Mega range ZCASE Fuses (80A-600A) can be used in any location, so no dedicated locations improving flexibility
- Corrosion resistant coatings
- Stainless steel nuts can be applied with high speed nut runners

## Applications

- Construction Equipment
- Agricultural Equipment
- Body Builders
- HD/MD Truck

### ZCASE® 40-600A Bolt-Down Fuses

The ZCASE is a bolt down fuse with a wide rating range up to 600A. The Time Current characteristic is similar to the well known MEGA® design and can be used as full wire protection until 250A. Higher ratings typically used for short circuit protector.

### M10-M6 Thread Studs

M10, M8 and M6 Studs are available to match with similar sized ZCASE fuses (M10, 80-600A, M8, 40-600S, and M6, 40-250A). The different sizes support error proofing for assembly. All studs are electrically isolated when dropped into the holder. The studs are robust coated Steel so they can be used with stainless steel hardware even when high speed assembly equipment is used.

### 2-7 Way Bus Bars

Bus Bars are available in a number of sizes so that the ZCASE Fuse Box can be customized. The Bus Bars allow the box to handle multiple circuits so that one high current box can handle multiple power sources. This includes multi-voltage applications or switches and unswitched power circuits, Bus Bars are solid copper with tin plating for corrosion resistance and good power transfer.
