# ITV4030 12A/15A/22A Series Surface Mount

#### **Agency Approvals**

Agency	Agency File Number	Ampere Range
c 🔁 us	E10480	12 A, 15 A, 22 A
$\triangle$	TA 50461285	12 A, 15 A, 22 A

#### **Thermal Derating Characteristics**

Ambient Operating Temperature			40° C	60° C
Recommend Rated Current (A)	ITV4030 12 A Series	13.5	12.0	10.0
	ITV4030 15 A Series	18.0	16.0	13.5
Current (A)	ITV4030 22 A Series	24.0	22.0	18.0

# Description

ITV4030 Series is a three terminals surface mountable battery protector which is designed to against both overcurrent and overvoltage (overcharging). A fuse element is embedded to cut off the circuit when overcurrent issue happens. A heater is also directly embedded under the fuse element, it will generate heat to blow the fuse once overvoltage detected by IC or FET.

### **Features**

- Halogen Free
- Surface Mount
- Fast response
- Protection for both overcurrent and overcharging

### **Applications**

- Two-way radio
- eCall
- Tablet PC
- Vacuum cleaner
- Power tools

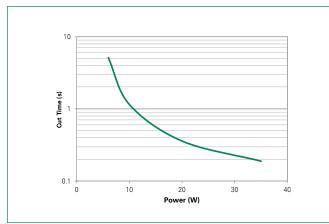

#### **Electrical Characteristics**

All temperature refer to topside of the package, measured on the package body surface
 If reflow temperature exceeds the recommended profile, devices may not meet the performance requirements

## **Soldering Parameters**

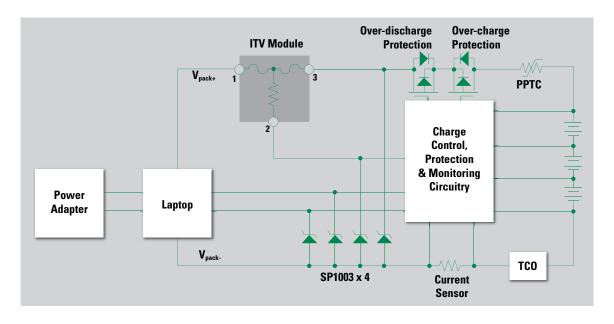

Average Ramp-Up Rate (7	3°C/second max.		
	Temperature Min (Ts <sub>min</sub> )	150°C	
Preheat	Temperature Max (Ts <sub>max</sub> )	200°C	
	Time (Ts <sub>min</sub> to Ts <sub>max</sub> )	60-120 seconds	
Time maintained above:	217°C		
	Time (t <sub>L</sub> )	60-105 seconds	
Peak Temperature (T <sub>P</sub> )	255°C		
Time within 5°C of actual	5 seconds max.		
Ramp-Down Rate		6°C/second max.	
Time 25°C to Peak Tempe	8 minutes max.		

#### **Physical Specifications**

Material	Glass Epoxy PCB
<b>Base Thickness</b>	0.6mm
Copper Thickness	0.07mm
Covered Wire	AWG18 (ITV4030 12A Series) AWG14 (ITV4030 15A/22A Series)

#### **Typical Application Circuit Diagram**

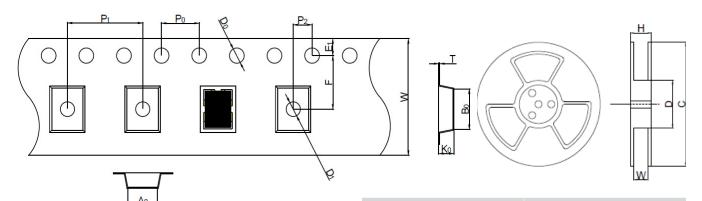

# Installation and Handling Guidelines

- Before and after mounted, the ultrasonic-cleaning or immersioncleaning must not be done to ITV device. The flux on element would flow, and it would not be satisfied its specification when cleaning is done. In addition, a similar influence happens when the product comes in contact with cleaning solution. These products after cleaning will not be guaranteed.
- Silicone-based oils, oils, solvents, gels, electrolytes, fuels, acids, and similar will adversely affect the properties of ITV devices, and shall not be used or applied.
- Please DO NOT reuse the ITV device removed by the soldering process.
- ITV devices are secondary protection devices and are used solely for sporadic, accidental overcurrent or overtemperature error condition, and shall NOT be used if or when constant or repeated fault conditions (such fault conditions may be caused by, among others, incorrect pin-connection of a connector) or over-extensive trip events may occur.
- Operation over the maximum rating or other forms of improper use may cause failure, arcing, flame and/or other damage to the ITV devices.

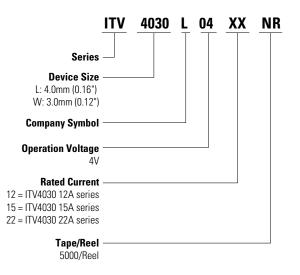

- The performance of ITV devices will be adversely affected if they are improperly used under electronic, thermal and/or mechanical procedures and/or conditions non-conformant to those recommended by manufacturer.
- Customers shall be responsible for determining whether it is necessary to have back-up, failsafe and/or fool-proof protection to avoid or minimize damage that may result from extra-ordinary, irregular function or failure of ITV devices.
- There should be minimum of 0.1mm spacing between ITV and surrounding compounds, to maintain the product characteristics and avoid damage other surrounding compounds.
- This product is designed and manufactured only for general-use of electronics devices. We do not recommend that it is used for the applications military, medical and so on which may cause direct damages on life, bodies or properties.
