Description

HA Series transient surge suppressors are industrial high energy Metal-Oxide Varistors (MOVs). They are designed to provide secondary surge protection in the outdoor and service entrance environment (distribution panels) of buildings, and also in industrial applications for motor controls and power supplies used in the oil-drilling, mining, and transportation fields.

The design of the HA Series of MOVs provide rigid terminals for screw mounting. Also available in a clipped lead version for through hole board placement or to accommodate soldered leads designation "HC."

See Ratings and Specifications Table for part number and brand information.

Features

- Lead-free, Halogen-Free and RoHS compliant.
- Wide operating voltage range
 $V_{M(AC)RMS}$
110V to 750V
- Two disc sizes available
32mm and 40mm
- High energy absorption capability
 $W_{TM} = 170J$ to 1050J
- High peak pulse current capability, ITM = 25,000A to 40,000A
- Rigid terminals for secure mounting
- Available in trimmed version for through hole board mounting – Designation "HC"
- No derating up to 85°C ambient

Absolute Maximum Ratings

• For ratings of individual members of a series, see Device Ratings and Specifications chart

Continuous		HA Series	Units
Steady State Applied Voltage:			
AC Voltage Range ($V_{M(AC)RMS}$)		110 to 750	V
DC Voltage Range ($V_{M(DC)}$)		148 to 970	V
Transients:			
Peak Pulse Current (I_{TM})			
For 8/20 μ s Current Wave (See Figure 2)		25,000 to 40,000	A
Single Pulse Energy Range			
For 2ms Current Squarewave (W_{TM})		160 to 1050	J
Operating Ambient Temperature Range (T_A)		-55 to +85	°C
Storage Temperature Range (T_{STG})		-55 to +125	°C
Temperature Coefficient (α^V) of Clamping Voltage (V_C) at Specified Test Current		<0.01	%/°C
Hi-Pot Encapsulation (COATING Isolation Voltage Capability) (Dielectric must withstand indicated DC voltage for one minute per MIL-STD 202, Method 301)		2500	V
COATING Insulation Resistance		1000	M Ω

CAUTION: Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

HA Series Ratings & Specifications

Note: Average power dissipation of transients not to exceed 2.0W per varistor
 1. 40kA capability depends on applications rated up to 97Vrms. 30kA applies if > 97 Vrms.
 2. 40kA capability depends on applications rated up to 115Vrms. 30kA applies if > 115 Vrms.
 3. 40kA capability depends on applications rated up to 123Vrms. 30kA applies if > 123 Vrms.
 4. 40kA capability depends on applications rated up to 132Vrms. 30kA applies if > 132Vrms.

Power Dissipation Ratings

Figure 1

Should transients occur in rapid succession, the average power dissipation required is simply the energy (watt-seconds) per pulse times the number of pulses per second. The power so developed must be within the specifications shown on the Device Ratings and Specifications table for the specific device. Furthermore, the operating values need to be derated at high temperatures as shown in above. Because varistors can only dissipate a relatively small amount of average power they are, therefore, not suitable for repetitive applications that involve substantial amounts for average power dissipation.

Peak Pulse Current Test Waveform

Figure 2

- O_1 = Virtual Origin of Wave
- T = Time from 10% to 90% of Peak
- T_1 = Rise Time = $1.25 \times T$
- T_2 = Decay Time

Example - For an $8/20 \mu s$ Current Waveform:

- $8 \mu s = T_1 =$ Rise Time
- $20 \mu s = T_2 =$ Decay Time

Physical Specifications

Lead Material	Tin-plated Copper
Soldering Characteristics	Solderability per MIL-STD-202, Method 208
Insulating Material	Cured, flame retardant epoxy polymer meets UL94V-0 requirements.
Device Labeling	LF, Part Number and date code

Environmental Specifications

Operating Temperature	-55°C to +85°C/
Storage Temperature	-55°C to +125°C
Humidity Aging	+85°C, 85% RH, 1000 hours +/- 10% typical resistance change
Thermal Shock	+85°C to -40°C 5 times +/- 10% typical resistance change
Solvent Resistance	MIL-STD-202, Method 215
Moisture Sensitivity	Level 1, J-STD-020

Dimensions

HA Series Outline Specifications

(Dimensions in Millimeters)
