1.6x0.8mm, Red & Pure Green LED Surface Mount Bi-Color Chip LED Indicator

Technical Data Sheet

Features:

- Package in 8mm tape on 7" diameter reel.
- Compatible with automatic placement equipment.
- Compatible with infrared and vapor phase reflow solder process.
- Bi-color type.
- Color: Red & Pure Green.
- The product itself will remain within RoHS compliant Version.

Descriptions:

- The S195A SMD LED is much smaller than lead frame type components, thus enable smaller board size, higher packing density, reduced storage space and finally smaller equipment to be obtained.
- Besides, lightweight makes them ideal for miniature applications, etc.

Applications:

- Backlighting in dashboard and switch.
- Telecommunication: Indicator and backlighting in telephone and fax.
- Flat backlight for LCD, switch and symbol.
- General use.

Spec No.: S195A	Date:	16-Mar-2018

1.6x0.8mm, Red & Pure Green LED Surface Mount Bi-Color Chip LED Indicator

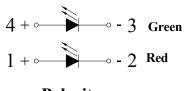

Technical Data Sheet

Absolute Maximum Ratings at Ta=25℃

Parameters	Symbol	Emitting Color	Max.	Unit	
		Red	60		
Power Dissipation	PD	Green	90	mW	
Deels Ferrurad Currentt(2)		Red	100		
Peak Forward Currentt ^(a)	IFP	Green	100	mA	
	.r.	Red	25		
Continuous Forward Current ^(b)	IF ⁻	Green	25	mA	
Reverse Voltage	VR	5		V	
	505	Red	2000	V	
Electrostatic Discharge (HBM)	ESD	Green	1000	V	
Operating Temperature Range	ature Range Topr -40°C to +80		°C to +80°C		
Storage Temperature Range	Tstg	-40 ℃ to +85 ℃ 260 ℃ for 5 Seconds			
Soldering Temperature	Tsld				

Notes:

a. Derate linearly as shown in derating curve.

b. Duty Factor = 10%, Frequency = 1 kHz

1.6x0.8mm, Red & Pure Green LED Surface Mount Bi-Color Chip LED Indicator

Technical Data Sheet

Electrical Optical Characteristics at Ta=25°C

Parameters	Symbol	Emitting Color	Min.	Тур.	Max.	Unit	Test Condition
Luminous Intensity ^(a)		Red	80	120			IF=20mA
	IV	Green	500	700		mcd	
	004/0	Red		140			IF=20mA
Viewing Angle ^(b)	201/2	Green		140		Deg	
	,	Red		632			IF=20mA
Peak Emission Wavelength	λр	Green		520		nm	
Dominant Wavelength ^(C)	λd	Red		624		nm	IF=20mA
		Green		525			
Spectral Line Half-Width	<u> </u>	Red		20			IF=20mA
	Δλ	Green		25		nm	
	VF	Red	1.60	2.00	2.40	V	IF=20mA
Forward Voltage	۷۲	Green	2.80	3.20	3.60	v	
Poverae Current	IR	Red			10		\/D-5\/
Reverse Current		Green			10	μA 0	VR=5V

Notes:

a. ALuminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.

b. 201/2 is the o -axis angle where the luminous intensity is 1/2 the peak intensity

c. The dominant wavelength (λ d) is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.

CAUTIONS

1. Handling Precautions:

- 1.1. Handle the component along the side surfaces by using forceps or appropriate tools.
- 1.2. Do not directly touch or handle the silicone lens surface. It may damage the internal circuitry.
- 1.3. Do not stack together assembled PCBs containing exposed LEDs. Impact may scratch the silicone lens or damage the internal circuitry.

Compare to epoxy encapsulant that is hard and brittle, silicone is softer and flexible. Although its characteristic significantly reduces thermal stress, it is more susceptible to damage by external mechanical force. As a result, special handling precautions need to be observed during assembly using silicone encapsulated LED products. Failure to comply might lead to damage and premature failure of the LED.

2. Storage

- 1.4. Do not open moisture proof bag before the products are ready to use.
- 1.5. Before opening the package, the LEDs should be kept at 30°C or less and 60%RH or less.
- 1.6. The LEDs should be used within a year.
- 1.7. After opening the package, the LEDs should be kept at 30°C or less and 60%RH or less.
- 1.8. The LEDs should be used within 168 hours after opening the package.
- 1.9. If the moisture adsorbent material has fabled away or the LEDs have exceeded the storage time, baking treatment should be performed using the following conditions. Baking treatment: 65±5°C for 24 hours.

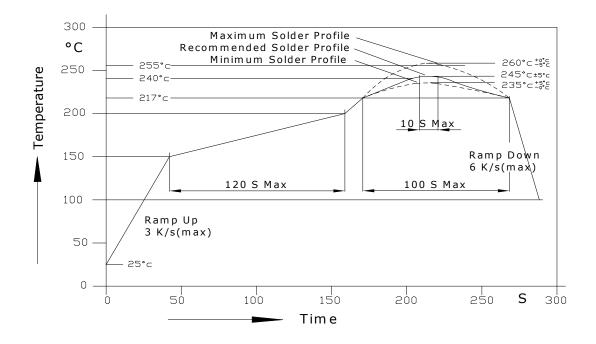

1.6x0.8mm, Red & Pure Green LED Surface Mount Bi-Color Chip LED Indicator

Luckylight

Technical Data Sheet

3. Soldering Condition

1.10. Pb-free solder temperature profile

- 1.11. Reflow soldering should not be done more than two times.
- 1.12. When soldering, do not put stress on the LEDs during heating.
- 1.13. After soldering, do not warp the circuit board.
- 1.14. Recommended soldering conditions:

F	Reflow soldering	Soldering iron			
Pre-heat	150~200°C	Temperature	300°C Max.		
Pre-heat time	120 sec. Max.	Soldering time	3 sec. Max.		
Peak temperature	260°C Max.		(one time only)		
Soldering time	10 sec. Max.(Max. two times)				

1.15. Because different board designs use different number and types of devices, solder pastes, reflow ovens, and circuit boards, no single temperature profile works for all possible combinations.

However, you can successfully mount your packages to the PCB by following the proper guidelines and PCB-specific characterization.

Technical Data Sheet

Drive Method

1.16. An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

a Recommended circuit.

bThe brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

Terms and conditions for the usage of this document

- 1. The information included in this document reflects representative usage scenarios and is intended for technical reference only.
- 2. The part number, type, and specifications mentioned in this document are subject to future change and improvement without notice. Before production usage customer should refer to the latest datasheet for the updated specifications.
- 3. When using the products referenced in this document, please make sure the product is being operated within the environmental and electrical limits specified in the datasheet. If customer usage exceeds the specified limits, Luckylight will not be responsible for any subsequent issues.
- 4. The information in this document applies to typical usage in consumer electronics applications. If customer's application has special reliability requirements or have life-threatening liabilities, such as automotive or medical usage, please consult with Luckylight representative for further assistance.
- 5. The contents and information of this document may not be reproduced or re-transmitted without permission by Luckylight.
