

N32P 1-PHASE POWER NETWORK METER

- Measurement of single-phase network parameters: voltage, current, active, reactive and apparent power, $\cos \phi$, $\tan \phi$, frequency, active, reactive and apparent energy, active power 15 minutes, voltage 10 minutes.
- Current and voltage harmonics analysis up to 51st (measurements available via RS-485).
- Two-line LCD display with high contrast and built-in backlighting.
- Possibility of displaying the measured value and time simultaneously or a second measured value or unit (automatically displayed unit of measured quantity).
- Programmable measuring range (current 1 A / 5 A and voltage 100 V / 230 V / 400 V).
- High sampling frequency of measured signals 8 kHz.
- Programming parameters via buttons or RS-485 interface and free eCon software.
- 4 alarm outputs with signaling on led diodes, working in 7 different modes (option).
- Possibility to program each of the alarms to react to a different measurements.
- The function of the switch-on delay and switch-off delay of the alarm with the alarm event memory.
- Pulse output to control energy consumption.
- Conversion of any measured value into an analog signal 0/4...20 mA or 0...10V (option).
- Memory of minimal and maximal values for all measured quantities.
- Choice of period and averaging method with the possibility of synchronizing the average value with the built-in real-time clock.

EXAMPLE OF APPLICATION

N32P - 1-PHASE POWER NETWORK METER

FEATURES	INPUTS	OUTPUTS	GALVANIC ISOLATION

MEASURED QUANTITIES AND CALCULATED BY THE METER

- effective voltage U
- effective current I
- frequency f
- power: active P , reactive Q , apparent S
- power factor $\cos \varphi$
- power tangent $\tan \varphi$
- active energy input/output E_p
- reactive energy input/output E_q
- total apparent energy E_s
- energy meter E
- maximum and minimum values in the given averaging period
- current time

DATA VISUALISATION

Two-line display.
Simultaneous preview of two measured values e.g. current and power.

or

Automatically displayed unit of measured value and symbol of multiplier kilo, mega.

or

Preview of current time on the bottom line of the display.
Real-time clock with automatic winter/summer time change function.

MULTI-PARAMETER MEASUREMENT

Up to 47 parameters can be viewed in one meter. The display can indicate two values simultaneously. All values are available via the RS-485 (Modbus) digital interface.

UNIVERSAL MEASURING INPUT

x/1 A

x/5 A

Universal input for current and voltage measurement directly or indirectly from a current or voltage transformer. The primary and secondary sides of the transformer are separately configurable, which will correspond to the actual values.

x/100 V

x/110 V

Only one parameter can be measured e. g. only the current, where the operation of the meter is synchronized with the current signal.

ALARM FUNCTIONS

1 or 4 relay outputs with signaling on the display in the form of an active alarm number.

Each of the alarms can be configured to work in one of 7 modes, incl. REG mode for alarm control via RS-485 Modbus.

Programmable maintenance of alarm signaling. After the alarm event has ceased, the alarm status marker blinks on the display until it is deleted by the user.

Individually programmable parameters of switching on and switching off the alarm; this feature can be used to prevent „false“ alarms from occurring.

MEASUREMENT AVERAGING ALGORITHM

Average values of voltage, current and power calculated by the walking window method, i.e. continuously updated.

Programmable averaging period of measured parameters in minutes, e.g. active power.

MOVING WINDOW

The average value can be synchronized with the internal time clock, e.g. for the 15-minute setting, the value is updated every quarter of an hour.

Additional measurement of minimum and maximum values during the moving window.

TECHNICAL DATA

INPUTS AND MEASURING RANGES

Measured quantity	Measuring range (Ku=1; Ki=1)	Class
Voltage input 100 V 230 V 400 V	0.05...1.2 Un	0.1
Current input 1 A 5 A	0.05...1.2 In	
Frequency	35...65...100 Hz	
Active power	The actual measuring range for active and reactive power: -1.2Ur * 1.2Ir ... 1.2Ur * 1.2Ir. For apparent power: 0... 1.2Ur * 1.2Ir	0.2
Reactive power		
Apparent power		
cos φ	-1...0...1	0.5
tg φ	-999.99...-1.2...0...1.2...999.99	
THD of voltages and currents	0...100%	
Active energy	0...9 999 999.9 kWh	
Reactive power	0...9 999 999.9 kVarh	
Apparent power	0...9 999 999.9 kVA	
Current time	0.00...23.59	
Ku - voltage ratio; Ki - current ratio; Un - rated voltage; In - rated current; Ur - set voltage measurement range; Ir - set current measurement range;		± 20 ppm

OUTPUTS

Output type	Properties	Remarks
Relay output	<ul style="list-style-type: none"> 1 NO contact, load capacity 5A / 250V a.c.; 5A / 30V d.c. 3 relays with a changeover contact, load capacity 6A / 250V a.c.; 6A / 30V d.c.; 0,15A / 250V d.c. 	
Analog output	<ul style="list-style-type: none"> programmable current 0/4...20 mA, load resistant ≤ 500 Ω programmable voltage 0...10V, load resistant ≥ 500 Ω 	Analog output error: 0.1% of the set range Additional error from temperature changes: 50% of class/10K
OC output	OC type, passive npn, 30V d.c./30 mA	voltage free output

DIGITAL INTERFACE

Interface type	Transmission protocol	Mode	Baud rate
RS-485	MODBUS RTU	8N2, 8E1, 8O1, 8N1	2.4, 4.8, 9.6, 14.4, 19.2, 28.8, 38.4, 57.6, 115.2 kbit/s

EXTERNAL FEATURES

Readout field	1 row 6-digit; digits height 12.85 mm 2 rows: 5-digit; digits height 7.5 mm	high contrast LCD with backlight and programmable measuring unit
Weight	< 0.25 kg	
Overall dimensions	96 x 48 x 93 mm	mounting hole: $92^{+0.6} \times 45^{+0.6}$ mm
Protection grade (acc. to EN 60529)	from frontal side: IP65	from terminal side: IP 10

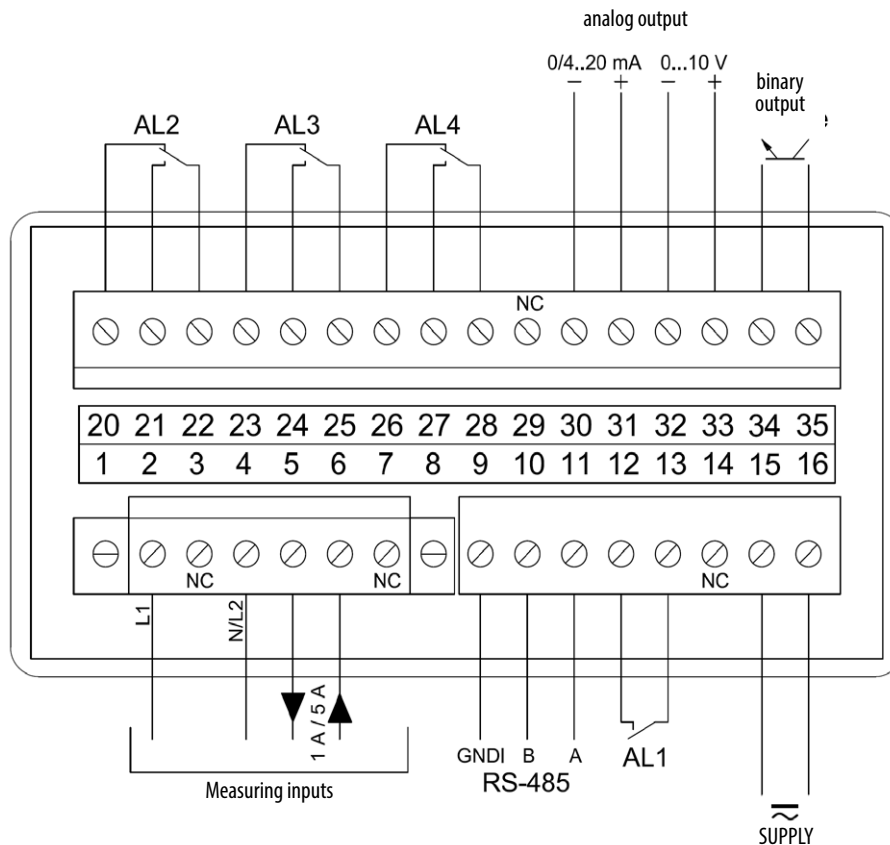

RATED OPERATING CONDITIONS

Supply voltage	85...253 V a.c. (40...400 Hz), 90...300 V d.c. 20...40 V a.c. (45...65 Hz) / 20...60 V d.c.	power consumption < 6 VA
Temperature	ambient: -25...23...55°C	storage: -30...70°C
Relative humidity	25...95%	without condensation
Operating position	any	

SAFETY AND COMPABILITY REQUIREMENTS

Electromagnetic compatibility	noise immunity	acc. to EN 61000-6-2
	noise emissions	acc. to EN 61000-6-4
Isolation between circuits	basic	acc. to EN 61010-1
Pollution level	2	
Installation category	III	
Maximal phase-to-earth voltage	for measuring, power and alarm circuits: 300 V	
	for other circuits: 50 V	
Altitude a.s.l.	< 2000 m
