SLD65R565SS / SLF65R565SS
650V N-Channel MOSFET

General Description

This Power MOSFET is produced using Maple semi's advanced planar stripe SuperJunciton technology. This advanced technology has been especially tailored to minimize on-state resistance, provide superior switching performance, and withstand high energy pulse in the avalanche and commutation mode. These devices are well suited for high efficiency switched mode power supplies, active power factor correction based on half bridge topology.
