# **508 SERIES** PANEL INDICATOR LED

#### **FEATURES**

- Ø8.1mm mounting
- Nickel plated brass housing
- Sealed to IP67 weatherproof
- · Wide viewing angle smoked lens
- · Internal potting
- · Reverse protection diode fitted in all voltage models
- Range of LED colour options
- · Range of voltage options

#### **BENEFITS**

- Standard industrial mounting size
- Suitable for industrial applications
- Suitable for external applications
- Smoked lens gives good on/off contrast ratio
- Suitable for high vibration applications
- Protects against wrong polarity installation (voltage models)
- Suitable for status panel indication
- · Manufactured with internal resistor
- · Outstanding reliability
- · Vandal resistant

# **OPTIONAL FLYING LEAD TERMINATORS**

Marl Part No. Suffix	Wire Length	Wire Colour	No/Diameter of Cond	ductors Diameter of Insulation	Wire Specification
508-501-04 <b>-15</b>	150mm	Red - Anode	10/0.10	4.0	Type 44, 22 Gauge High Performance Wire
508-501-04 <b>-19</b>	1000mm	Black - Cathode	19/0.16mm	1.2mm	

# **NOTES**

Intensities (Iv) and colour shades of white (X-Y co-ordinates) may vary between LEDs within a batch. Additional LED Colours, Voltage Options and Flying Lead lengths available for semicustom projects. Please contact our Sales Team. All LED components are supplied in anti-static packaging.

<sup>\*\*</sup> These are Current models and the voltage shown is Vf at 20mA, not Vopr. Additionally, there is no reverse protection diode in Current models.

<sup>\*</sup> Characteristics at Ta = 25°C. For operating temperature derating graphs, please refer to sheet 2.

# 508 SERIES PANEL INDICATOR LED

#### **TECHNICAL CHARACTERISTICS**

Series	Max. Power Dissipation	Panel Cutout	Nut Mounting Torque	Min. Mounting Centres	Min - Max. Panel Thickness
508	700	8.1	0.65	14.5	1.5 - 13.0
	mW	mm	Nm	mm	mm

#### **TECHNICAL DRAWING**

Weight (g): 7.6

Dimensions in mm (typical). Not to scale. Mounting hole to be clean and burr free. Anode termination denoted by red sleeve.

925-000-00 is brass tin plated - for use with 508 series lamps. Dimensions in mm (typical). Not to scale.

#### **DE-RATING GRAPHS**

## **MATERIALS**

Body Nickel Plated Brass
Nut Nickel Plated Brass

 Panel Seal
 Viton

 Lens
 Polycarbonate

 Encapsulation
 Black Polyurethane

 Lock Washer
 Spring Steel

**Termination** Silver Flash Coated Brass

#### **DESIGN CONSIDERATIONS**

#### Electro-Static Discharge (ESD)

Build up of electro-static discharge occurs in many situations involving people moving and handling products. The range of possible situations is very diverse but voltage levels as high as several thousand volts can and do arise in many individual situations. When an operator charged up to these levels handles a static sensitive device, there is a very probable likelihood that the device will be irreversibly damaged. It is essential that precautions are taken at all stages during manufacture and assembly of these products. Although LEDs were never considered to be static sensitive devices, changes in manufacturing

technology and materials used to produce higher intensity products over a large range of the wavelength spectrum have changed this. Marl has an approved system of ESD control from goods in, through production and into final packing and dispatch. Marl recommend all users of LED based products follow the current BSI guidelines for protection of electronic devices from electrostatic phenomena.

### Voltage, Current and Temperature

The forward voltage / current value of an LED is dependent upon the ambient temperature of the environment in which

it is operated. Therefore, care must be taken to operate the LED at the correct voltage / current values, depending upon the ambient temperature.

Marl should be contacted if the device is to be operated outside the temperature range specified. Marl accept no liability for any product that is operated outside the stated voltage or temperature range.
