■ Cautions

· Cautiously route all wires so they cannot be easily pulled out, pinched or damaged.
· Do not press on the LEDs or other components on the strip.
· Do not twist and bend less than 60mm diameter.
· Do not install the product in an environment, with direct exposure to sunshine, water,oil or corrosion.
· Ensure that the mounting surface is clean, dry and free from oil, grease or wax.
· For the best effect, the power wire of each LED strips should be connected to the driver.
· The power rating of the driver is suggested to be at least 20% higher than the total required wattage of the strip(s) being powered.
· Do not drive the strip before completely releasing it from the reel.
· Switch OFF power at the mains before installing the LED strip. Check the supply voltage and wire connections before switching the power on.
