

AC input with fixed cable

AC input with connector

## Features

- Full power output at 70~100% constant current range operation
- Wide input range 90 ~ 305VAC with active PFC function
- · Metal housing design with IP67
- Multiple dimming functions: 3 in 1(0-10V/PWM/Resistor)
- · Dimming circuit with Isolated for latest safety regulation
- Surge protection with 6KV/4KV
- Typical lifetime>50000 hours and 5 years warranty
- · AC input cable with connector for flexible installation

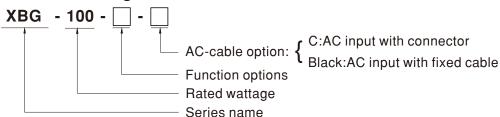

# Applications

- · LED bay lighting
- · LED stage lighting
- LED spot lighting
- Explosion-proof lighting
- Type HL LED driver for class I division 2.

# Description

XBG-100 series is a 100W AC/DC LED driver featuring the constant power mode. XBG-100 operates from 90~305VAC and offers with different rated current ranging between 1750mA and 2780mA. Thanks to the high efficiency up to 92%, with the fanless design, the entire series is able to operate for -40°C ~+85°C case temperature under free air convection. The design of metal housing and IP67 ingress protection level allows this series to fit both indoor and outdoor applications. Moreover the innovative environment-adaptive capability allows this series to reliably light on the LEDs for all kinds of application environments. XBG-100 series comply with the latest version of IEC61347/IEC60598-1 and UL8750 international safety regulations. The output and dimming circuit are also completely in accordance with the new regulations with isolation to ensure the safety of both users and luminaire system during installation.

- 3. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
- 4. Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time.
- 5. This series meets the typical life expectancy of >50,000 hours of operation when Tcase, particularly tc point (or TMP, per DLC), is about 75°C or less.
- 6. To fulfill requirements of the latest ErP regulation for lighting fixture, this LED drive can only be used behind a switch without permanently connected
- 7. Please refer to the warranty statement on MEAN WELL's website at http://www.meanwell.com
- 8. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).
- 9. Products sourced from the Americas regions may not have the PSE/CCC/BIS/KC logo. Please contact your MEAN WELL sales for more information.
- 10. For any application note and IP water proof function installation caution, please refer our user manual before using. https://www.meanwell.com/Upload/PDF/LED\_EN.pdf

High Performance Region

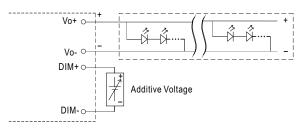

## **■ DIMMING OPERATION**

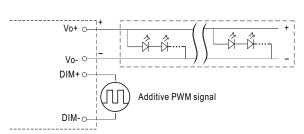

## **※** 3 in 1 dimming function (for AB-Type)

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-:
   0 ~ 10VDC, or 10V PWM signal or resistance.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply: 100µA (typ.)
- O Applying additive 0 ~ 10VDC

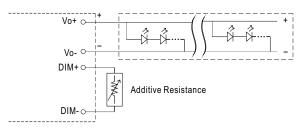

"DO NOT connect "DIM- to Vo-"

Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

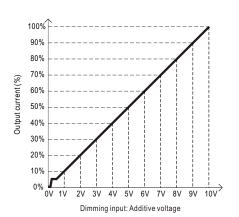

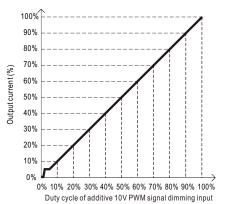

"DO NOT connect "DIM- to Vo-"

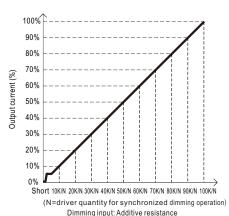

Applying additive resistance:

"DO NOT connect "DIM- to Vo-"

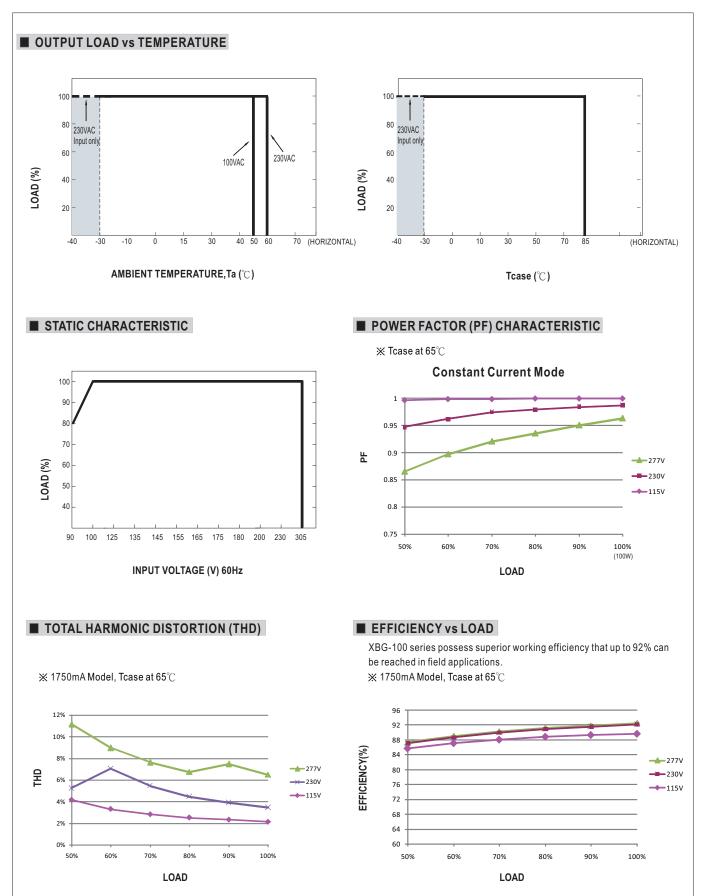

Note: 1. Min. dimming level is about 8% and the output current is not defined when 0% < Iout < 8%.

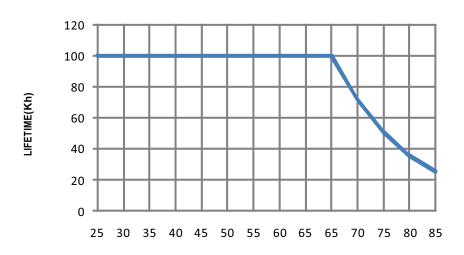

2. The output current could drop down to 0% when dimming input is about  $0\Omega$  or 0Vdc, or 10V PWM signal with 0% duty cycle.

## ■ INSTALLATIONS

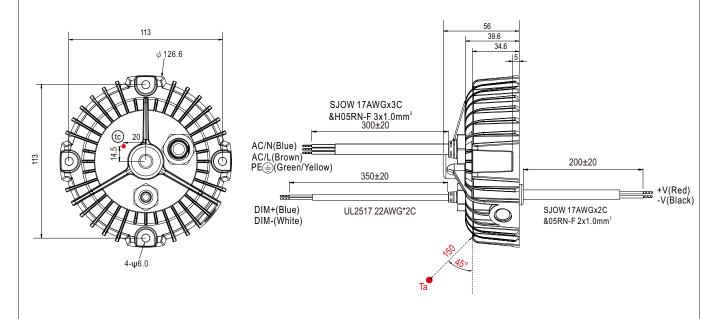

## Caution

- Please inspect the appearance of the driver if the package is damaged. There should not be any cracks.
- · Please do not drop or bump the driver.
- · All screws including the suspension screw should be paired with a spring washer and locked tight.
- $\cdot$  The entire luminaire, including the driver, should be limited to 10Kg or less.
- The luminaire should be cautiously protected from damage due to shock throughout packaging and transportation.
- · Please thoroughly follow the preceding cautionary notes to prevent the luminaire from falling, leading to injuries.
