

Multi-Purpose Flash™ (MPF™) Multi-Purpose Flash Plus (MPF+)

39 Series

Product Brief

October 2010

Product Description

Multi-Purpose Flash™ (MPF™) and Multi-Purpose Flash Plus (MPF+) make up a family of parallel flash memory products that deliver high performance, low power consumption, superior reliability and small sector size. Based on SST® SuperFlash® technology, MPF and MPF+ provide faster program, erase and read times than conventional flash, thereby saving power consumption and increasing manufacturing throughput.

In addition to offering 3V and 5V memory products, MPF and MPF+ provide 1.8V devices that deliver significant power savings compared to industry standard flash. Ideal for space-constrained applications, this family offers the industry's smallest standard packages, the XFLGA and WFBGA, both as small as 4 mm x 6 mm.
