

## Powermite 3 Surface Mount 8 Amp 40 Volt Schottky Rectifier

### DESCRIPTION

The UPS840e3 offers an exceptionally small and powerful RoHS compliant package for a 40 V, 8 Amp Schottky rectifier. Competing solutions typically come only in much larger packages. It is an ideal, small footprint, surface mount solution with a full metallic bottom side and is compatible with automatic insertion equipment. In combination with Microsemi's unique internal locking tab on the die, it provides a very low thermal resistance path to move heat out of the package. The resulting lowering of junction temperature in the die provides for lower leakage current and power loss.

### FEATURES

- Low profile package (<1.1 mm)
- Small footprint: 32 mm<sup>2</sup> (4.826 x 6.604 mm) or 0.05 in<sup>2</sup> (0.190 x 0.260 inches). See mounting pad details on the [last page](#).
- Plastic package has Underwriters Laboratory Flammability classification 94V-0
- RoHS compliant

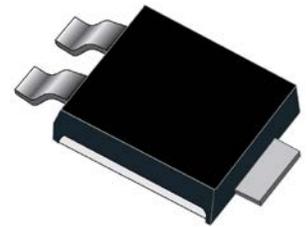

### APPLICATIONS / BENEFITS

- High current capability with low forward voltage drop
- Guard ring construction for transient protection
- Silicon Schottky (hot carrier) rectifier for minimal  $t_{rr}$  and minimal reverse recovery voltage
- Elimination of reverse-recovery oscillations to reduce need for EMI filtering.
- For use in high-frequency switching power supplies, inverters, free-wheeling diode applications, charge pump circuits, and polarity protection applications.
- Low forward power loss and high efficiency
- Low inductive parasitics (<2nH) for minimal L (di/dt) effects
- Robust package configuration for pick-and-place handling
- Full-metallic bottom eliminates flux entrapment
