

# The Card That Never Sleeps

## Growing Edge Storage in Video Surveillance Applications Requires Industrial-Quality Memory

Edge storage technology — the recording of video and storing it in the camera instead of in a centralized recording facility across the network — is quickly gaining acceptance and is being more broadly adopted into IP video surveillance applications.

Selecting a microSD card specifically designed for IP video surveillance cameras can bring more value and enhance system performance by providing recording redundancy, optimizing network load reduction, and lowering overall TCO.

## Why Micron Industrial microSD Cards for Edge Storage Applications

- 1. High Endurance**  
Support for 3 years of high-quality, continuous 24/7 video recording.
- 2. Outstanding Recording Performance**  
Optimized firmware provides stable performance for 24x7 high-quality video recording with minimal frame drops.
- 3. Industrial Quality**  
Reliable, high quality with 2 million hours mean time to failure (MTTF) or an annualized failure rate of 0.44%; 2X the reliability of surveillance HDDs used in NVRs today.
- 4. Smart Tool for Health Monitoring**  
Health monitoring feature for IP camera integration reports card usage and lifetime remaining and can be integrated into system software to alert end users.
