# VSC7422

## 25-Port, Layer-2 Gigabit Ethernet Switch with 12 Fully Integrated Copper PHYs

The VSC7422 is the industry's first fully integrated 25-port Gigabit Ethernet switch with 12 copper PHYs in a single package. In conjunction with Microsemi's 12-port PHY VSC8512 or VSC8522, a 25-port switch can be designed using only two ICs.

The device leverages Microsemi's 65 nm SimpliPHY™ technology, resulting in one of the most cost-effective and lowest power consumption devices in the industry. The dual chip solution combines the most advanced Ethernet energy efficiency features for bringing green technology solutions to market.

The device provides a rich set of unmanaged Ethernet switching features such as Layer-2 forwarding with basic VLAN and QoS processing, enabling the delivery of differentiated services. The VSC7422 contains an 8051 CPU for light management of the switch.

A comprehensive application software package is provided for LED control, loop indication, device overheat protection, and other enhanced functions.
