

CLICKER 4 for TPM3H

PID: MIKROE-5788

Clicker 4 for TPM3H is a compact development board designed as a complete solution, you can use it to quickly build your own gadgets with unique functionalities.

To make your prototyping experience as convenient as possible, Clicker 4 is equipped with an on-board Debug Unit, based on Toshiba's TPM067FWQG MCU, and compliant with an on-board emulator standard called CMSIS-DAP. It allows you to fully use, test, and debug the target device right out of the box.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
 ISO 14001: 2015 certification of environmental management system.
 OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).
