# mikroBUS™ Cape - dimensions

## Legend

- mm
- mils

**Note**

The BeagleBone click™ shield has an EEPROM module for storing pin configuration data. Initially the shield is configured with a blank EEPROM. The default address for the EEPROM is 0x54. You can change it to addresses 0x50 - 0x57 with the selection of the two address jumpers. They are Labeled A0 and A1. To write to EEPROM, use the onboard TP1 pin [which needs to be connected to GND].

# X-ON Electronics

Largest Supplier of Electrical and Electronic Components
