USB Dongle License

USB Dongle License for **mikroC PRO for PIC* compiler** is a USB stick which carries a **single user encrypted compiler license key**. It completely removes the compiler Demo limit and enables you to build your projects without any restrictions. Dongle is supposed to be plugged in your computer's USB host port, as shown on **Figure 1.3**. Once inserted, it should be recognized as an **HID device**.

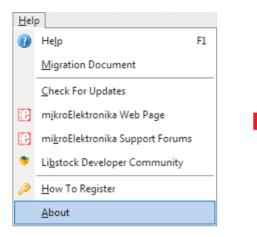

Figure 1-1: Bottom of the Help menu contains the About Item.

How do I know if the license is working?

Start your **mikroC PRO for PIC*** compiler. Click the **Help** item on the main menu and then click **About** (**Figure 1-1**). The **About window** (**Figure 1-2**) should appear. In the "**Registered to:**" field (marked with white rectangle on **Figure 1-2**) there should be a text "**mE Dongle mC PIC**". This means that the compiler has successfully detected the license. All of your projects larger than 2K of program words should now be able to compile.

Frequently Asked Questions

Q. Is USB Dongle License valid without registration?

Yes. Unlike Key File Licensing option, USB Dongle License is ready to work as soon as you plug it into the USB port. No license request or registration is required.

Q. Can I use USB Dongle License on different computers?

Yes. USB Dongle License can be used on any computer with USB port. It is your personal license which is not tied to a specific computer.

Q. I have updated my compiler. Is my USB Dongle License still valid?

Yes. Once purchased, USB dongle license works with every version of mikroC PRO for PIC[®] compiler. When you update your compiler the USB dongle license is operational right away.

Q. Can I use multiple USB Dongles on a single computer?

Yes. If you already have USB Dongle Licenses for other MikroElektronika software products, you can use them simoutaneously on a single computer. If your computer doesn't have enough USB host ports, you can use an additional USB hub.

Q. I've just lost my Dongle, can I get a new one for free?

Unfortunately not. If you lose your dongle you will need to buy a new compiler license and pay the full price.
