#### **Overview**

#### Introduction

The EVKT-8864 is an evaluation kit for the MP8864. The MP8864 is a high-frequency, synchronous, rectified, step-down, switch-mode converter with an I2C control interface. The MP8864 offers a very compact solution that achieves 4A of continuous output current with excellent load and line regulation over a wide input supply range. This kit allows for quick evaluation of the MP8864. By using the I2C, users can set the switching frequency, slew rate, work mode, and the output voltage

#### Kit Contents

EVKT-8864 kit contents: (items below can be ordered separately).

Figure 1: EVKT-8864 Evaluation Kit Set-Up

#### **Features and Benefits**

The MP8864 is highly customizable. Users can program the MP8864 via the MPS I2C GUI.

▲ All changes made in I2C mode will NOT be retained once the EVB is powered down.

Features adjustable under each method are outlined below.

#### **I2C**

- Adjustable output voltage
- Selectable slew rate
- Selectable switching frequency
- Selectable PFM mode
- System enable (EN bit)
- Status indication: OC, OTEW, OT, PG

#### **Kit Specifications**

Features	Specification
Supply for Board	4.5V - 21V
Operating Input Voltage	4.5V - 21V
Operating Systems Supported	Windows XP, 7, and later
System Requirements	Minimum 22.2MB free
GUI Software	2 Register Controls: VSEL, System
EVB Size (L x W)	6.4 cm x 6.4 cm

### **Section 1. Hardware Specifications**

#### **1.1 Personal Computer Requirements**

The following must be minimally met to use the EVKT-8864.

- Operating System of Windows XP, 7, or later
- Net Framework 4.0
- PC with a minimum of one available USB port
- At least 22.2 MB of free space

#### 1.2 EV8864-Q-00A Specifications

The EV8864-Q-00A is an evaluation board for the MP8864GQ. For more information, please refer to the EV8864-Q-00A datasheet.

Feature	Specification
Supply for Board	4.5V - 21V
Operating Input Voltage	4.5V - 21V
EVB Size (L x W)	6.4 cm x 6.4 cm

Figure 2: EV8864-Q-00A Evaluation Board

#### 1.3 EVKT-USBI2C-02 Specifications

The EVKT-USBI2C-02 refers to the communication interface, which connects the EVB, the PC, and its supporting accessories. It provides I2C and PMBus capabilities. Together with MPS Virtual Bench Pro and GUI tools, it provides a quick and easy way to evaluate the performance of MPS digital products. For more details, refer to the EVKT-USBI2C-02 datasheet.

## Section 2. Software Requirements

#### 2.1 Software Installation Procedure

Programming occurs through the MPS I2C GUI. Follow the instructions below to install the software.

Note: In the near future, this software can be downloaded from the MPS website. For now, it is provided on a USB thumb drive.

- 1. Plug the thumb drive into the computer using any available USB port.
- 2. Locate the folder containing the thumb drive contents.
- 3. Double click the .exe file to open the set-up guide (see Figure 4).
- 4. Follow the prompts in the set-up guide.
- 5. Wait for the status screen to verify that installation is complete (see Figure 5).

🔁 Setup - MPS IIC Interface	- • •
Select Destination Location Where should MPS IIC Interface be installed?	
Setup will install MPS IIC Interface into the following folder.	
To continue, click Next. If you would like to select a different folder, click	Browse.
C:\Program Files (x86)\MPS IIC Interface	Browse
At least 13.1 MB of free disk space is required.	
Next >	Cancel

#### Figure 4: MPS I<sup>2</sup>C GUI Set-Up Guide

#### Figure 5: I<sup>2</sup>C GUI Set-Up Success

## Section 3. Evaluation Kit Test Set-Up

#### 3.1 Hardware Set-Up

The hardware must be configured properly prior to use. Use the USB cable to connect the EVKT-USBI2C-02 communication interface to the PC, and follow the instructions below to set up the EVB.

- 1. Locate the proper wires to connect the EVB to the EVKT-USBI2C-02 communication interface.
- 2. Connect SCL, SDA, and GND (see Figure 6). If needed, refer to the datasheet for further clarification.

Figure 6: EVB to MPS I<sup>2</sup>C Communication Interface Wire Connection

#### 3.2 Powering up the EVB

- 1. Connect the positive and negative terminals of the load to the VB and GND pins, respectively.
- 2. Preset the power supply output between 4.5V and 21V, and then turn off the power supply.
- 3. Connect the positive and negative terminals of the power supply output to the VIN and GND pins, respectively.
- 4. Turn the power supply on. The MP8864 will enter the power-on sequence automatically.

#### 3.3 Software Set-Up

After connecting the hardware according to the above steps, follow the steps below to use the GUI software.

- 1. Start the software. It will automatically check the EVB connection.
  - If the connection is successful, the address will be listed in the "Slave Address" (see Figure 7).

Figure 7: Appearance of Address Shows Successful Connection

- If not, a warning will appear at the bottom. There are two warnings users can expect.
  - 1) "No Slave Found. Please Check the Connection!" This means that the evaluation board is not connected (see Figure 8).
  - 2) "Device is not available. Please check the Connection!" This means that the USB I2C communication interface is not connected (see Figure 9).

Figure 8: Warning Indicates Unsuccessful Connection – Evaluation Board not Connected

- 2. If the connection is successful, proceed to Step 3. Otherwise, check connections between the EVB, communication interface, and PC. Re-plug the USB into the computer and restart the GUI.
- Click the **PartSelect** button to select the MP8864 (see Figure 7) (The default GUI window is for the MP8861). The Register Control menu will appear on the left side. I2C register values will be read and displayed on the right side after clicking **Read** button (see Figure 9).

▲ All changes made via I2C will be restored to default values once the EVB is powered down.

#### 3.4 Troubleshooting Tips

Note: USBI2C-02 and USBI2C-01 drivers are not compatible. USBI2C-02 uses USBXpress and USBI2C uses Cyusb3. USBI2C-02 is the recommended device for MPS PMBus and I2C.

#### EVKT-USBI2C-01

In case that the USBI2C-01 driver is not properly installed, manual installation is required. Follow the steps below.

- 1. Open the Device Manager and select update driver software (see Figure 11).
- 2. Click "Browse my computer for driver software", find the driver located on thumb drive and install.

#### EVKT-USBI2C-02

In the case that the USBI2C-02 driver is not properly installed, manual installation is required. Follow the steps below.

Note: Check driver version. Find "USBXpress" Device in the Device Manager under USB controllers.

#### 🛄 🏺 USBXpress Device

Right click and view properties. Check to make sure the driver version matches the newest version (see Figure 12).

- 1. Browse the thumb drive contents and open the driver's folder.
- 2. Install the correct USBXpress ".exe" file.

Choose either 32 bit or 64 bit operating system.

32-bit: USBXpressInstaller\_x86.exe 64-bit: USBXpressInstaller\_x64.exe

3. Connect the EVKT-USBI2C-02 Dongle to the PC with the USB cable.

#### No Supply

The MP8864's input pin has an under-voltage

lockout(UVLO) detection circuit. If the input voltage (AVIN) is lower than the UVLO rising threshold, the MP8864's functions are disabled.

#### Shutdown Event

If the MP8864 detects that the input voltage is lower than the UVLO falling threshold (enter no supply state) or over-temperature protection is triggered (enter power-off state), the MP8864 switches to no supply state or power-off state, regardless of the current state.

#### Thermal Recovery

If the MP8864 is in a power-off state due to the die temperature exceeding the thermal protection threshold, the MP8864 enters a power-on sequence when the die's temperature decreases.

#### Shutdown Sequence

When the input voltage is lower than the UVLO falling threshold or the IC is over-temperature, the MP8864 enters the shutdown sequence directly.

## **Section 4. Ordering Information**

The components of the evaluation kit can be purchased separately depending on user needs.

Part Number	Description
EVKT-8864	Complete evaluation kit
Contents of EVKT-8864	
EV8864-Q-00A	MP8864GQ evaluation board
EVKT-USBI2C-02	Includes one USB to I2C communication interface, one USB cable, one ribbon cable
Tdrive-8864	USB flash drive that stores the GUI installation file and supplemental documents

Order directly from MonolithicPower.com.
