# Introduction

The purpose of this document is to provide the reader guidance when ordering accessories for MultiTech wireless products. This document will not provide any guidance on the selection of the wireless/cellular product to order. Please contact your sales representative for guidance in selecting the appropriate product for your application.

When ordering wireless/cellular products, you will have the option to order an un-bundled product (no power supply, antennas, interface cables etc...) or a bundled version that includes the product, power supply, antennas and interface cables in the packaging. If you order a bundled product, you likely will not need to order any of the accessories contained in this ordering guide unless you need a replacement item. If you order an un-bundled version of the product, utilize this ordering guide to assist you in selecting the various accessories you will need to operate the device.

Throughout this document, you will see a reference to certain models of products. For example, an "H5" or "MTR" model. If your device has an "H5" or "MTR" as part of its ordering part number, then the comment is applicable to your device.

Printed and downloaded versions of this document are uncontrolled. This document is updated periodically and new revisions are subsequently posted to MultiTech's website. The URL for the current revision of this document is listed below:

<http://www.multitech.com/documents/publications/marketing-guides/cellular-products-accessories-ordering-guide.pdf>

**Note:** The descriptions used in this document are descriptive in nature and might not match the descriptions located on the price list, web site or order documentation. Please reference those documents for the appropriate description.

Features and specifications are subject to change without notice.

## Power Supplies for Cellular Products

MultiTech cellular products operate on DC voltages. You can elect to power the cellular product with the following options:

- An AC adaptor that provides DC power to the cellular product
- Your own source of DC voltage

For the majority of products, the DC connection is made with a screw-on locking barrel connector.

## Options for Powering Cellular Devices with an AC Adaptor

For use with all models of cellular devices and the MTOCG-BOB-DK.

**Note:** MultiModem® Cell products with a -U designation (e.g. MTCBA-H5-U) and MultiConnect® Cell USB versions (e.g. MTC-H5-B03-KIT) operate on USB bus power and do not require a separate power supply.

**Note:** The description below contains the ISO country code for the type of AC power plug that is included with the power supply. For example, CN includes a Chinese power plug. These power supplies are rated for a maximum of 1.7 amps output.

<p><b>Notes:</b></p> <p>MultiConnect® rCell 100 series (MTR-xx models) and MultiConnect® Cell (MTC-xx models) products that utilize the FPC-532-DC power cable for general use must be connected to a UL listed LPS or Class 2 power supply. These products are UL 201 certified for in-vehicular use and must use the FPC-532-DC power cable for these installations.</p>		

## Options for Powering Cellular Development Kits

For use with the following products:

<b>Universal Socket Developer Kit</b>	<b>MultiConnect® OCG-E Developer Kit</b>
MTSMI-UDK	MT100EOCG-DK
MTUDK2-ST-CELL	

**Note:** The description below contains the ISO country code for the type of AC power plug that is included with the power supply. For example, CN includes a Chinese power plug. These power supplies are rated for a maximum of 1.7 amps output.

## **Antennas for Cellular Products**

You must order the correct antenna that supports the frequency bands that your cellular product operates in. Note that certain models of MultiTech products support a feature called diversity. If you want to take advantage of the diversity feature, you will require two cellular antennas per device.

If you would like to order an antenna that combines the cellular and GPS antennas into a single magnetic mount antenna, skip to the section on combined cellular and GPS antennas.

### Frequency Bands: 850/900/1800/1900 MHz

For use with the following products (All varieties):

MultiConnect® rCell 100 Series	MultiConnect® Cell 100 Series
MTR-C2	MTC-C2
MTR-EV3	MTC-EV3
MTR-EV3	

MultiModem® iCell	MultiModem® iSMS
MTCMR-C2	SF100-G
	SF400-G
	SF800-G

SocketModem® Cell	SocketModem® iCell	QuickCarrier® USB-E	MultiConnect® OCG-E
MTSMC-C2	MTSMC-C2-IP/GP	MT100UCC-C2	MT100EOCG-EV3
MTSMC-EV3	MTSMC-EV3-IP/GP	MT100UCC-EV3

CA-CDP-GPIO	36-Pin GPIO Cable for MTCDP Series Programmable Gateway(12")	
CA-MTAC-GPIO	GPIO Cable for MTAC-GPIO Accessory Card (2.5 ft)	

## MultiConnect® OCG Break out Board

The MultiConnect OCG Break-out Board is designed to be used with MultiTech's MTCDP and MT100EOCG series of Programmable Gateways. It provides a quick and easy way to simulate your application environment, exercise common analog and digital inputs, and quickly complete general purpose connections using the GPIO cable and quick-connects.

### Features

- GPIO cable and GPIO connectors simplify testing needs
- Four analog potentiometers simulate sensor inputs
- Eight physical switches simulate digital signal inputs
- Jumpers enable additional power and ground options
- Package also includes power supply, US, UK and EU power plugs and GPIO cable

For use with the following models:

MTCDP-xx (All varieties)

MT100EOCG-xx (All varieties)

Order PN	Description	Picture
MTOCG-BOB-DK	Programmable Gateway Break-Out Board (use with MTCDP and EOCG)	See below

## RF Cables for Embedded Products

MultiTech embedded products contain surface mount RF connectors on the PCB that are used to interface with an RF cable and antenna. The RF cables listed below include an appropriate connector that interfaces with the surface mount connector on one end and a bulk head panel mount SMA connector on the other. For the cellular connection, a standard SMA connector is specified. For Wi-Fi and/or Bluetooth connections, a reverse polarity SMA (RSMA) connector is specified.

### Reverse SMA-to-MMCX Antenna Cables

**Note:** Used for the Wi-Fi/Bluetooth connection with embedded models that utilize an MMCX connector on the PCB.

For use with the following products (All varieties):

<b>SocketWireless® Bluetooth®</b>
MTS2BTSMI

Order PN	Description	Picture
CARSMA-MMCX-1	Reverse SMA-to-MMCX Coax RF Cable, 6" (1 Pk)	See Above
CARSMA-MMCX-10	Reverse SMA-to-MMCX Coax RF Cable, 6" (10 Pk)	See Above
CARSMA-MMCX-50	Reverse SMA-to-MMCX Coax RF Cable, 6" (50 Pk)	See Above

## SMA-to-UFL Antenna Cables

**Note:** Used for the cellular connection with embedded models that utilize an UFL connector on the PCB.

For use with the following products (All varieties):

SocketModem® Cell	SocketModem® iCell	MultiConnect® Dragonfly™
MTSMC-G3	MTSMC-C2-IP/GP	MTQ-C2
