CAUTION: Electrostatic Sensitive Device. Observe precautions for handling.

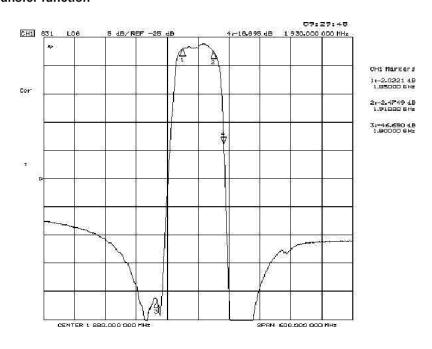

- Unless noted otherwise, all specifications apply over the operating temperature range with filter soldered to the specified demonstration board with impedance matching to  $50 \Omega$  and measured with  $50 \Omega$  network analyzer.

  Unless noted otherwise, all frequency specifications are referenced to the nominal center frequency, fc.

  Rejections measured as attenuation below the minimum IL point in the passband. Rejection in final user application is dependent on PCB layout and external interesting the passband of the passband of the passband.
- impedance matching design. See Application Note No. 42 for details.
- The design, manufacturing process, and specifications of this filter are subject to change.
- US and international patents may apply.
