CAUTION: Electrostatic Sensitive Device. Observe precautions for handling. NOTES:

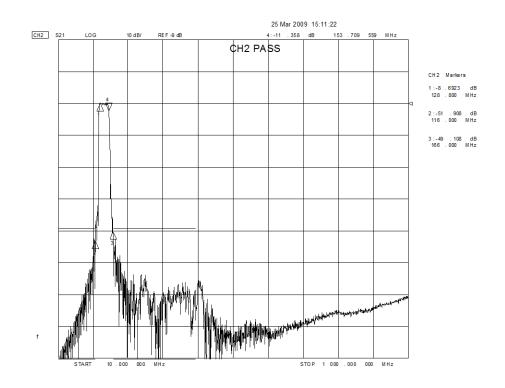

- Unless noted otherwise, all specifications apply over the operating temperature range with filter soldered to the specified demonstration board with impedance matching to 50 Ω and measured with 50 Ω network ana-
- Únless noted otherwise, all frequency specifications are referenced to the
- nominal center frequency, fc.
 Rejection in final user application is dependent on PCB layout and external impedance matching design. See Application Note No. 42 for
- "LRIP" or "L" after the part number indicates "low rate initial production"
- and "ENG" or "E" indicates "engineering prototypes." The design, manufacturing process, and specifications of this filter are 5. subject to change.

 Either Port 1 or Port 2 may be used for either input or output in the design.
- However, impedances and impedance matching may vary between Port 1 and Port 2, so that the filter must always be installed in one direction per the circuit design.
- MUS and international patents may apply.
