

# NHD-4.3-480272MF-20 Controller Board

## **TFT Controller Evaluation Board**

NHD- Newhaven Display 4.3- 4.3" Diagonal 480272- 480xRGBx272 pixels

MF- Model

20- 20-POS FFC interface (8-bit data)

SSD1963 Controller

# Newhaven Display International, Inc.

2661 Galvin Ct. Elgin IL, 60124

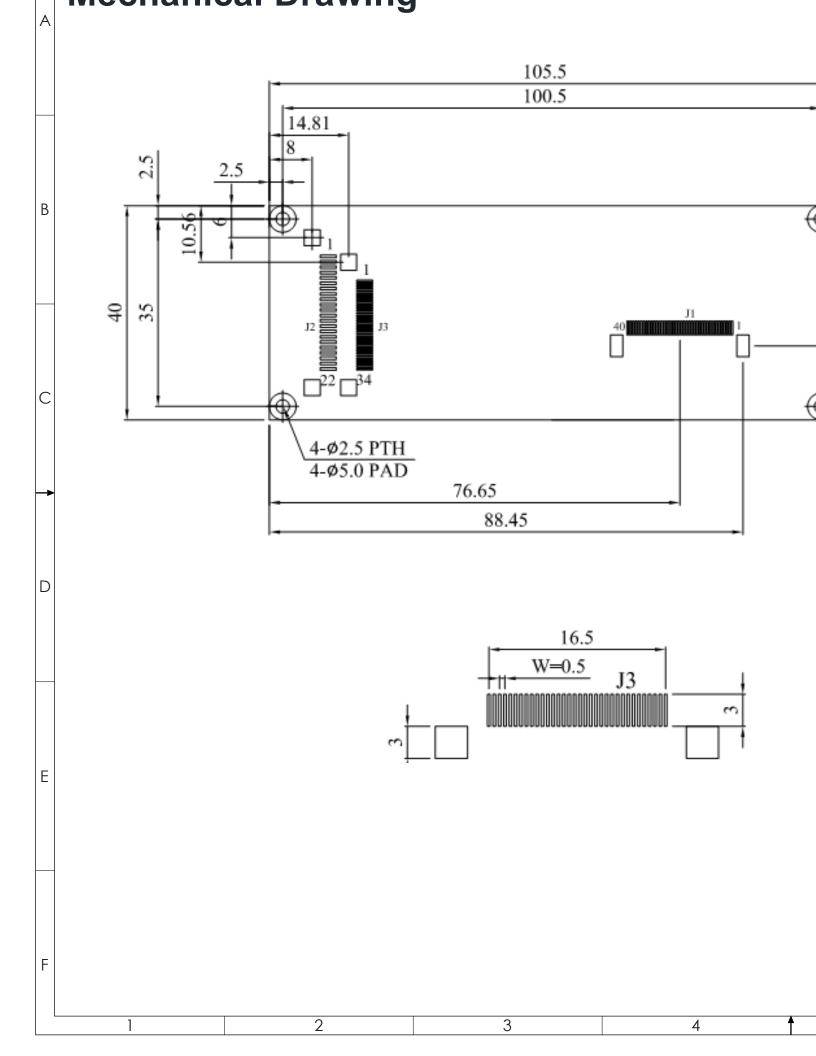

Ph: 847-844-8795 Fax: 847-844-8796

### **Document Revision History**

| Revision | Date     | Description  | Changed by |
|----------|----------|--|------------|
| 0        | 5/14/07  | Initial Release  | CL         |
| 1        | 4/27/12  | J2 pin description updated                             | AK         |
| 2        | 4/19/19  | LED Driver IC Updated                                  | SB         |
| 3        | 3/4/2021 | 2D Mechanical Drawing Redesign;                        | AS         |
|          |          | Revised Compatibility to NHD-4.3-480272MF-ATXL# Models |            |

### **Functions and Features**

• To use for testing, evaluating, or in final production with NHD-4.3-480272MF-ATXL# displays.

# Note: J2 has a 20-POS FFC connector assembled, pins 21, 22 are not connected.

# Pin Description: J1 (SSD1963 output to display panel)

| Pin No. | Symbol  | <b>External Connection</b> | Function Description                  |
|---------|---------|----------------------------|---------------------------------------|
| 1       | LED-    | LED Power Supply           | Backlight GND                         |
| 2       | LED+    | LED Power Supply           | Backlight Power (32mA @ 20~22V)       |
| 3       | GND     | Power Supply               | Ground                                |
| 4       | VCC     | Power Supply               | Power supply for LCD and logic (3.3V) |
| 5-10    | [R0-R7] | MPU                        | Red Data Signals                      |
| 11-12   | GND     | Power Supply               | Ground                                |
| 13-18   | [G0-G7] | MPU                        | Green Data Signals                    |
| 19-20   | GND     | Power Supply               | Ground                                |
| 21-26   | [B0-B7] | MPU                        | Blue Data Signals                     |
| 27-29   | GND     | Power Supply               | Ground                                |

### **Controller Information**

Built-in SSD1963 controller.

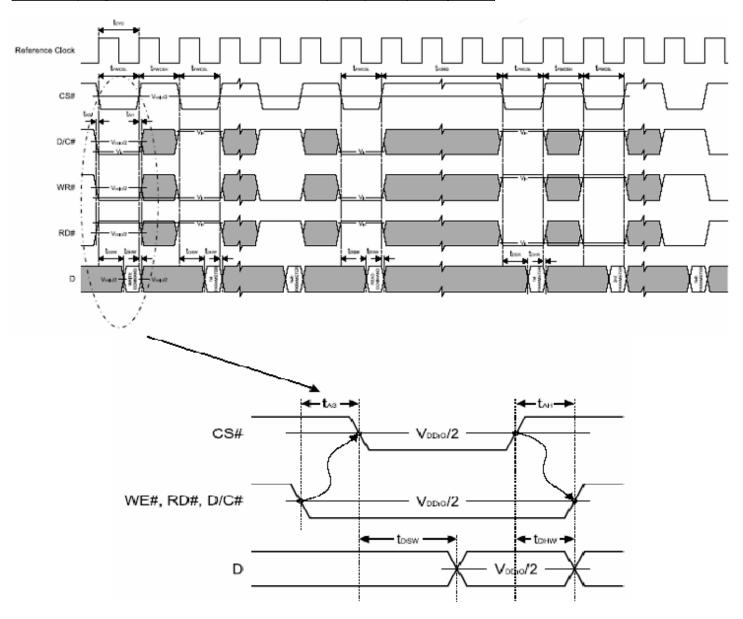

For specific <u>timing</u> and <u>color</u> information, please download specification at:

http://www.newhavendisplay.com/app\_notes/SSD1963.pdf

# **Timing Information**

8080 Mode Timing:

| Symbol | Parameter                  | Min | Typ | Max | Unit |
|--------|----------------------------|-----|-----|-----|------|
| teye   | Reference Clock Cycle Time | 9   | -   | -   | ns   |
| tPWCSL | Pulse width CS# low        | 1   | -   | -   | tCYC |
| tPWCSH | Pulse width CS# high       | 1   | -   | -   | tCYC |
| tFDRD  | First Read Data Delay      | 5   | -   | -   | tCYC |
| tAS    | Address Setup Time         | 1   | -   | -   | ns   |
| tAH    | Address Hold Time          | 1   | -   | -   | ns   |
| tDSW   | Data Setup Time            | 4   | -   | -   | ns   |
| tDHW   | Data Hold Time             | 1   | -   | -   | ns   |
| tDSR   | Data Access Time           | -   | -   | 5   | ns   |
| tDHR   | Output Hold time           | 1   | -   | -   | ns   |

### Pixel Data Format

Both 6800 and 8080 support 8-bit, 9-bit, 16-bit, 18-bit and 24-bit data bus. Depending on the width of the data bus, the display data are packed into the data bus in different ways.

### Pixel Data Format:

| Interface            | Cycle           | D[23] | D[22] | D[21] | D[20] | D[19] | D[18] | D[17] | D[16] | D[15] | D[14] | D[13] | D[12] | D[11] | D[10] | D[3] | D[8] | D[7] | D[6] | D[5] | D[4] | D[3] | D[2] | D[1] | D[0] |
|----------------------|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|------|------|------|------|------|------|------|------|------|------|

## **Quality Information**

| Test Item                | Content of Test                             | Test Condition                 | Note |
|--------------------------|---|--------------------------------|------|
| High Temperature storage | Endurance test applying the high storage    | +80°C , 200hrs                 | 2    |
|                          | temperature for a long time.                |                                |      |
| Low Temperature storage  | Endurance test applying the low storage     | -30°C , 200hrs                 | 1,2  |
|                          | temperature for a long time.                |                                |      |
| High Temperature         | Endurance test applying the electric stress | +70°C 200hrs                   | 2    |
| Operation                | (voltage & current) and the high thermal    |                                |      |
|                          | stress for a long time.                     |                                |      |
| Low Temperature          | Endurance test applying the electric stress | -20°C , 200hrs                 | 1,2  |
| Operation                | (voltage & current) and the low thermal     |                                |      |
|                          | stress for a long time.                     |                                |      |
| High Temperature /       | Endurance test applying the electric stress | +60°C, 90% RH, 96hrs           | 1,2  |
| Humidity Storage         | (voltage & current) and the high thermal    |                                |      |
|                          | with high humidity stress for a long time.  |                                |      |
| Thermal Shock resistance | Endurance test applying the electric stress | -20°C,30min -> 25°C,5min ->    |      |
|                          | (voltage & current) during a cycle of low   | 70°C,30min = 1 cycle           |      |
|                          | and high thermal stress.                    | 10 cycles                      |      |
| Vibration test           | Endurance test applying vibration to        | 10-55Hz , 15mm amplitude.      | 3    |
|                          | simulate transportation and use.            | 60 sec in each of 3 directions |      |
|                          |   | X,Y,Z                          |      |
|                          |   | For 15 minutes                 |      |
| Static electricity test  | Endurance test applying electric static     | VS=800V, RS=1.5kΩ, CS=100pF    |      |
|                          | discharge.                                  | One time                       |      |

Note 1: No condensation to be observed.

Note 2: Conducted after 4 hours of storage at 25°C, 0%RH.

**Note 3:** Test performed on product itself, not inside a container.

### **Precautions for using LCDs/LCMs**
