Busy Flag:

When BF = "HIGH", it indicates that the internal operation is being processed. So during this time the next instruction cannot be accepted. BF can be read when RS = "LOW" and R/W = "HIGH" (Read Instruction Operation), through DB7 Port. Before executing the next instruction, be sure that BF is not "HIGH".

RS	R/W	Operation
L	L	Instruction Write operation (MPU writes Instruction code into IR)
L	H	Read Busy Flag(DB7) and address counter (DB0 ~ DB6)
H	L	Data Write operation (MPU writes data into DR)
H	H	Data Read operation (MPU reads data from DR)
