# HEF4017B-Q100 

## 1. General description

The HEF4017B-Q100 is a 5-stage Johnson decade counter with ten spike-free decoded active HIGH outputs (Q0 to Q9), an active LOW carry output from the most significant flip-flop ( $\overline{\mathrm{Q}} 5-9$ ), active HIGH and active LOW clock inputs (CPO, $\overline{\mathrm{CP}} 1$ ) and an overriding asynchronous master reset input (MR).

The counter is advanced by either a LOW-to-HIGH transition at CP0 while $\overline{\mathrm{CP}} 1$ is LOW or a HIGH-to-LOW transition at $\overline{\mathrm{CP}} 1$ while CPO is HIGH (see Table 3).

When cascading counters, the $\overline{\mathrm{Q}} 5-9$ output, which is LOW while the counter is in states 5 , $6,7,8$, and 9 , can be used to drive the CPO input of the next counter. A HIGH on MR resets the counter to zero $(\mathrm{Q} 0=\overline{\mathrm{Q}} 5-9=\mathrm{HIGH}$; Q 1 to $\mathrm{Q} 9=\mathrm{LOW})$ independent of the clock inputs (CP0, $\overline{\mathrm{CP}} 1$ ).

Automatic counter code correction is provided by an internal circuit: following any illegal code the counter returns to a proper counting mode within 11 clock pulses.

Schmitt trigger action makes the clock inputs highly tolerant of slower rise and fall times.
It operates over a recommended $\mathrm{V}_{\mathrm{DD}}$ power supply range of 3 V to 15 V referenced to $\mathrm{V}_{\mathrm{SS}}$ (usually ground). Unused inputs must be connected to $\mathrm{V}_{\mathrm{DD}}, \mathrm{V}_{\mathrm{SS}}$, or another input.

This product has been qualified to the Automotive Electronics Council (AEC) standard Q100 (Grade 1) and is suitable for use in automotive applications.

## 2. Features and benefits

- Automotive product qualification in accordance with AEC-Q100 (Grade 1)
- Specified from $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ and from $-40^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$
- Automatic counter correction
- Tolerant of slow clock rise and fall times
- Fully static operation
- $5 \mathrm{~V}, 10 \mathrm{~V}$, and 15 V parametric ratings
- Standardized symmetrical output characteristics
- ESD protection:
- MIL-STD-833, method 3015 exceeds 2000 V
- HBM JESD22-A114F exceeds 2000 V
- MM JESD22-A115-A exceeds $200 \mathrm{~V}(\mathrm{C}=200 \mathrm{pF}, \mathrm{R}=0 \Omega)$
- Complies with JEDEC standard JESD 13-B

## 3. Ordering information

Table 1. Ordering information
All types operate from $-40^{\circ} \mathrm{C}$ to $+125{ }^{\circ} \mathrm{C}$

| Type number | Package |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Name | Description | Version |
| HEF4017BT-Q100 | SO16 | plastic small outline package; 16 leads; body width 3.9 mm | SOT109-1 |

## 5. Pinning information

### 5.1 Pinning

Fig 5. Pin configuration

### 5.2 Pin description

Table 2. Pin description

| Symbol | Pin | Description |
| :--- | :--- | :--- |
| Q0 to Q9 | $3,2,4,7,10,1,5,6,9,11$ | decoded output |
| V $_{\text {SS }}$ | 8 | ground supply voltage |
| $\overline{\text { Q} 5-9 ~}$ | 12 | carry output (active LOW) |
| $\overline{C P} 1$ | 13 | clock input (HIGH-to-LOW edge-triggered) |
| CP0 | 14 | clock input (LOW-to-HIGH edge-triggered) |
| MR | 15 | master reset input |
| $V_{\text {DD }}$ | 16 | supply voltage |

## 6. Functional description

Table 3. Function table [1]

| MR | CP0 | $\overline{\text { CP1 }}$ | Operation |
| :--- | :--- | :--- | :--- |
| H | X | X | Q0 $=\overline{\text { Q5-9 }=\text { H; Q1 to Q9 = L }}$ |
| L | H | $\downarrow$ | counter advances |
| L | $\uparrow$ | L | counter advances |
| L | L | X | no change |
| L | X | H | no change |
| L | H | $\uparrow$ | no change |
| L | $\downarrow$ | L | no change |

[1] H = HIGH voltage level; L = LOW voltage level; X = don't care; $\uparrow=$ positive-going transition; $\downarrow=$ negative-going transition.

## 7. Limiting values

Table 4. Limiting values
In accordance with the Absolute Maximum Rating System (IEC 60134).

| Symbol | Parameter | Conditions | Min | Max | Unit |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathrm{V}_{\mathrm{DD}}$ | supply voltage |  | -0.5 | +18 | V |
| $\mathrm{I}_{\mathrm{IK}}$ | input clamping current | $\mathrm{V}_{\mathrm{I}}<-0.5 \mathrm{~V}$ or $\mathrm{V}_{1}>\mathrm{V}_{\mathrm{DD}}+0.5 \mathrm{~V}$ | - | $\pm 10$ | mA |
| $\mathrm{~V}_{\mathrm{I}}$ | input voltage |  | -0.5 | $\mathrm{~V}_{\mathrm{DD}}+0.5$ | V |
| $\mathrm{I}_{\mathrm{OK}}$ | output clamping current | $\mathrm{V}_{\mathrm{O}}<-0.5 \mathrm{~V}$ or $\mathrm{V}_{\mathrm{O}}>\mathrm{V}_{\mathrm{DD}}+0.5 \mathrm{~V}$ | - | $\pm 10$ | mA |
| $\mathrm{I}_{\text {I/O }}$ | input/output current |  | - | $\pm 10$ | mA |
| $\mathrm{I}_{\mathrm{DD}}$ | supply current |  | - | 50 | mA |
| $\mathrm{~T}_{\text {stg }}$ | storage temperature |  | -65 | +150 | ${ }^{\circ} \mathrm{C}$ |
| $\mathrm{T}_{\text {amb }}$ | ambient temperature |  | -40 | +125 | ${ }^{\circ} \mathrm{C}$ |
| $\mathrm{P}_{\text {tot }}$ | total power dissipation | $\mathrm{T}_{\text {amb }}=-40^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$ | $\underline{[1]}$ |  |  |
| P | power dissipation | per output | - | 500 | mW |

[1] For SO16 package: $\mathrm{P}_{\text {tot }}$ derates linearly with $8 \mathrm{~mW} / \mathrm{K}$ above $70^{\circ} \mathrm{C}$.

## 8. Recommended operating conditions

Table 5. Recommended operating conditions

| Symbol | Parameter | Conditions | Min | Typ | Max | Unit |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathrm{V}_{\mathrm{DD}}$ | supply voltage |  | 3 | - | 15 | V |
| $\mathrm{~V}_{\mathrm{I}}$ | input voltage |  | 0 | - | $\mathrm{V}_{\mathrm{DD}}$ | V |
| $\mathrm{T}_{\mathrm{amb}}$ | ambient temperature | in free air | -40 | - | +125 | ${ }^{\circ} \mathrm{C}$ |
| $\Delta \mathrm{t} / \Delta \mathrm{V}$ | input transition rise and fall rate | $\mathrm{V}_{\mathrm{DD}}=5 \mathrm{~V}$ | - | - | 3.75 | $\mu \mathrm{~s} / \mathrm{V}$ |
|  |  | $\mathrm{V}_{\mathrm{DD}}=10 \mathrm{~V}$ | - | - | 0.5 | $\mu \mathrm{~s} / \mathrm{V}$ |
|  |  | $\mathrm{V}_{\mathrm{DD}}=15 \mathrm{~V}$ | - | - | 0.08 | $\mu \mathrm{~S} / \mathrm{V}$ |

## 9. Static characteristics

Table 6. Static characteristics
$V_{S S}=0 V ; V_{l}=V_{S S}$ or $V_{D D}$ unless otherwise specified.

| Symbol | Parameter | Conditions | $\mathrm{V}_{\mathrm{DD}}$ | $\mathrm{T}_{\mathrm{amb}}=-40^{\circ} \mathrm{C}$ |  | $\mathrm{T}_{\mathrm{amb}}=25^{\circ} \mathrm{C}$ |  | $\mathrm{T}_{\text {amb }}=8{ }^{\circ} \mathrm{C}$ |  | $\mathrm{T}_{\mathrm{amb}}=125^{\circ} \mathrm{C}$ |  | Unit |

|  |  | 15 V | $\mathrm{P}_{\mathrm{D}}=6000 \times \mathrm{f}_{\mathrm{i}}+\Sigma\left(\mathrm{f}_{\mathrm{o}} \times \mathrm{C}_{\mathrm{L}}\right) \times \mathrm{V}_{\text {DD }}{ }^{2}$ |  |

## 11. Waveforms

Conditions: $\overline{\mathrm{CP}} 1=$ LOW, while CP0 triggers on a LOW-to-HIGH transition. $\overline{\mathrm{CP}} 1$ triggers on a HIGH-to-LOW transition; The shaded areas indicate where the output state is set by the input count.

Measurement points given in Table 9.
Fig 7. Waveforms showing the propagation delays for $\mathrm{CPO}, \overline{\mathrm{CP}} 1$ to $\mathrm{Q} n, \overline{\mathrm{Q}} 5-9$ outputs and the output transition times

Conditions: $\overline{\mathrm{CP}} 1=$ LOW, while CP0 triggers on a LOW-to-HIGH transition, $\mathrm{t}_{\mathrm{W}}$ and $\mathrm{t}_{\text {rec }}$ are measured when $\mathrm{CPO}=\mathrm{HIGH}$ and $\overline{\mathrm{CP}} 1$ triggers on a HIGH-to-LOW transition.
The shaded areas indicate where the output state is set by the input count.
Measurement points given in Table 9.
Fig 8. Waveforms showing the minimum pulse width for $\mathrm{CPO}, \overline{\mathrm{CP}} 1$ and MR input; the maximum frequency for CP0 and CP1 input; the recovery time for MR and the MR input to Qn and Q5-9 output propagation delays

Hold times are shown as positive values, but may be specified as negative values;
Measurement points given in Table 9.
Fig 9. Waveforms showing hold times for CP0 to $\overline{\mathrm{CP}} 1$ and $\overline{\mathrm{CP}} 1$ to CP0

Table 9. Measurement points

| Supply voltage | Input | Output |
| :--- | :--- | :--- |
| $\mathbf{V}_{\mathrm{DD}}$ | $\mathrm{V}_{\mathbf{M}}$ | $\mathbf{V}_{\mathbf{M}}$ |
| 5 V to 15 V | $0.5 \mathrm{~V}_{\mathrm{DD}}$ | $0.5 \mathrm{~V}_{\mathrm{DD}}$ |

a. Input waveforms

b. Test circuit

Test data is given in Table 10.
Definitions for test circuit:
DUT = Device Under Test;
$C_{L}=$ load capacitance including jig and probe capacitance;
$R_{T}=$ termination resistance should be equal to the output impedance $Z_{o}$ of the pulse generator.
Fig 10. Test circuit for measuring switching times

Table 10. Test data

| Supply voltage | Input | Load |  |
| :--- | :--- | :--- | :--- |
| $\mathbf{V}_{\mathrm{DD}}$ | $\mathbf{V}_{\mathbf{I}}$ | $\mathbf{t}_{\mathbf{r}}, \mathbf{t}_{\mathbf{f}}$ | $\mathbf{C}_{\mathrm{L}}$ |
| 5 V to 15 V | $\mathrm{~V}_{\mathrm{SS}}$ or $\mathrm{V}_{\mathrm{DD}}$ | $\leq 20 \mathrm{~ns}$ | 50 pF |

## 12. Application information

Some examples of applications for the HEF4017B-Q100 are:

- Decade counter with decimal decoding
- 1 out of $n$ decoding counter (when cascaded)
- Sequential controller
- Timer

Figure 11 shows a technique for extending the number of decoded output states for the HEF4017B-Q100. Decoded outputs are sequential within each stage and from stage to stage, with no dead time (except propagation delay).

Enabling the counter on $\overline{\mathrm{CP}} 1$ when CP 0 is HIGH , or on CP 0 when $\overline{\mathrm{CP}} 1$ is LOW, causes an extra count.
Fig 11. Counter expansion

## 13. Package outline

## 15. Legal information

### 15.1 Data sheet status

| Document status $\underline{[1][2]}$ | Product status $[3]$ | Definition |
| :--- | :--- | :--- |
| Objective [short] data sheet | Development | This document contains data from the objective specification for product development. |
| Preliminary [short] data sheet | Qualification | This document contains data from the preliminary specification. |
| Product [short] data sheet | Production | This document contains the product specification. |

[1] Please consult the most recently issued document before initiating or completing a design.
[2] The term 'short data sheet' is explained in section "Definitions".
[3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nexperia.com.

### 15.2 Definitions

Draft - The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. Nexperia does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet - A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local Nexperia sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.
Product specification - The information and data provided in a Product data sheet shall define the specification of the product as agreed between Nexperia and its customer, unless Nexperia and customer have explicitly agreed otherwise in writing. In no event however shall an agreement be valid in which the Nexperia product is deemed to offer functions and qualities beyond those described in the Product data sheet.

### 15.3 Disclaimers

Limited warranty and liability - Information in this document is believed to be accurate and reliable. However, Nexperia does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. Nexperia takes no responsibility for the content in this document if provided by an information source outside of Nexperia.

In no event shall Nexperia be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.
Notwithstanding any damages that customer might incur for any reason whatsoever, Nexperia's aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the Terms and conditions of commercial sale of Nexperia.
Right to make changes - Nexperia reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use in automotive applications - This Nexperia product has been qualified for use in automotive applications. Unless otherwise agreed in writing, the product is not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of a Nexperia product can reasonably be expected to result in personal injury, death or severe property or environmental damage. Nexperia and its suppliers accept no liability for inclusion and/or use of Nexperia products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.
Applications - Applications that are described herein for any of these products are for illustrative purposes only. Nexperia makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.
Customers are responsible for the design and operation of their applications and products using Nexperia products, and Nexperia
accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the Nexperia product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.
Nexperia does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using Nexperia products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). Nexperia does not accept any liability in this respect.

Limiting values - Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.
Terms and conditions of commercial sale - Nexperia
products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nexperia.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. Nexperia hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of Nexperia products by customer.

No offer to sell or license - Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

Export control - This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Translations - A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
