45V Io=200mA Ultra low Quiescent current LDO

■FEATURES

- AEC-Q100 grade 1 qualified (T1 specification only)
- Low Quiescent Current 5.5μA typ.(A version)
  5.0μA typ.(B version)
- Operating Voltage 4.0V to 40V
- Operating Temperature Ta=-40°C to 125°C
- Output Voltage Accuracy V_O ±1.0%(Ta=25°C)
  V_O ±2.0%(Ta=-40°C to 125°C)
- Output Current I_O(min.)=200mA
- ON/OFF Control A ver. only
- Correspond to MLCC
- Under Voltage Lock Out circuit
- Thermal Shutdown Circuit
- Over Current Protection Circuit
- Package Outline A ver. SOT-89-5-2
  B ver. SOT-89-3, TO-252-3-L1

■GENERAL DESCRIPTION

NJW4104 is a 45V Io=200mA ultra low quiescent current low dropout regulator.

It achieves low quiescent current characteristics, therefore it contributes to reduce current consumption of applications.

Output Voltage is guaranteed ±2% under wide range conditions: V_{IN}=Vo+1V to 40V, Io=0 to 200mA and Ta=-40°C to 125°C.

Because of wide input voltage range and wide operating temperature range, the NJW4104 is suitable for various applications including automotive applications.

■APPLICATION

- Automotive infotainment
- Automotive ECU unit
- Industrial equipment

		$V_O \times 0.9$, Ta=-40°C to +125°C		200	-	-	
Line Regulation	$\Delta V_O/\Delta V_{IN}$	V_{IN}= V_O +1V to 40V, I_O =30mA	V_O=3.3V	-	-	23.5	mV
			V_O=5.0V	-	-	34	
		V_{IN}= V_O +1V to 40V, I_O =30mA, Ta=-40°C to +125°C	V_O=3.3V	-	-	35.3	
			V_O=5.0V	-	-	51	
Load Regulation	$\Delta V_O/\Delta I_O$	I_O =0mA to 200mA	V_O=3.3V	-	-	15.2	mV
			V_O=5.0V	-	-	23	
		I_O =0mA to 200mA, Ta=-40°C to +125°C	V_O=3.3V	-	-	26.4	
			V_O=5.0V	-	-	40	
Ripple Rejection	RR	V_{IN}=7.0V ,ein=200mVrms, f=1kHz, I_O =10mA	V_O=3.3V	-	41	-	dB
			V_O=5.0V	-	36	-	
Dropout Voltage (5)	ΔV_{IO}	I_O=100mA		-	0.18	0.25	V
		I_O=100mA, Ta=-40°C to +125°C		-	-	0.46	
Control Current (4)	I_{CONT}	V_{CONT}=1.6V		-	0.5	2	µA
		V_{CONT}=1.8V, Ta=-40°C to +125°C		-	-	3	
Control Voltage for ON-state (4)	$V_{CONT(ON)}$			1.6	-	-	V
		Ta=-40°C to +125°C		1.8	-	-	
Control Voltage for OFF-state (4)	$V_{CONT(OFF)}$			-	-	0.6	V
		Ta=-40°C to +125°C		-	-	0.6	
UVLO Release Voltage	V_{UVLO}	V_{IN} =L→H		2.4	2.8	3.3	V
		V_{IN} =L→H, Ta=-40°C to +125°C		2.1	-	3.5	
UVLO Hysteresis Voltage	V_{HYS}	V_{IN} =H→L		70	200	-	mV
		V_{IN} =H→L, Ta=-40°C to +125°C		70	-	-	
Average Temperature Coefficient of Output Voltage	$\Delta V_O/\Delta Ta$	Ta=-40°C to 125°C, I_O =30mA		-	±50	-	ppm/°C

(4): Applied for A version.

(5): Except Output Voltage Rank less than 3.8V

Characteristics values of defined as Ta=-40°C to +125°C are applied only “T1”spec.

■THERMAL CHARACTERISTICS

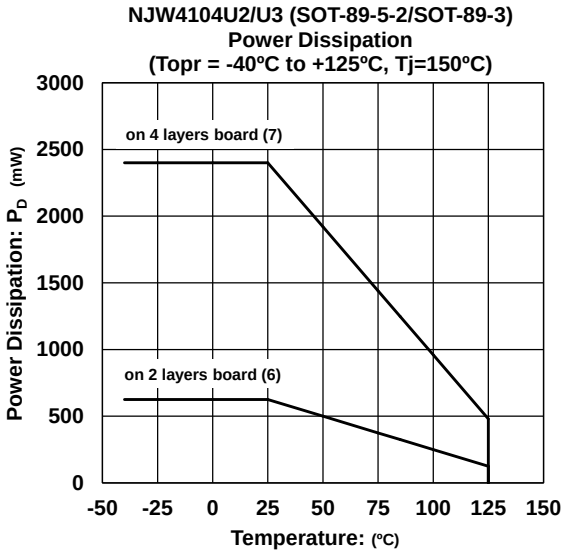
PARAMETER	SYMBOL	VALUE		UNIT
Junction-to-ambient thermal resistance	θja	SOT-89-3/-5-2	200(6) 52(7)	°C/W
		TO-252-3-L1	105(6) 40(7)	
Junction-to-Top of package characterization parameter	ψjt	SOT-89-3/-5-2	43(6) 19(7)	°C/W
		TO-252-3-L1	17(6) 12(7)	

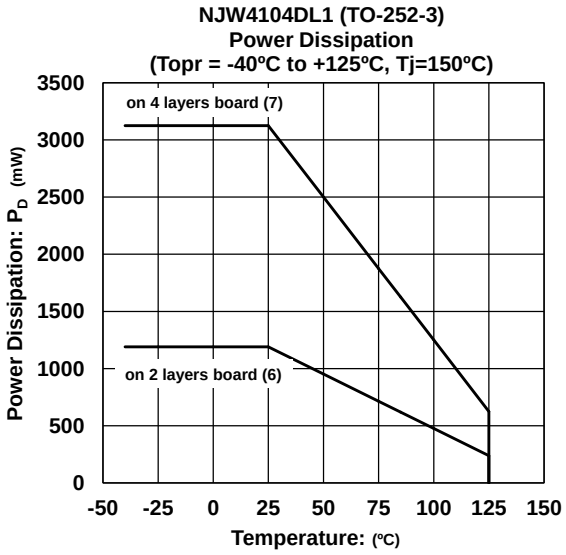
(6): Mounted on glass epoxy board. (76.2×114.3×1.6mm: based on EIA/JEDEC standard, 2Layers)

(7): Mounted on glass epoxy board. (76.2´114.3´1.6mm: based on EIA/JEDEC standard, 4Layers), internal Cu area: 74.2x74.2mm

(For 4Layers :Applying 74.2 x 74.2mm inner Cu area and thermal via holes to board based on JEDEC standard JESD51-5)

■POWER DISSIPATION vs. AMBIENT TEMPERATURE





*Input Capacitor C_{IN}

The input capacitor C_{IN} is required in order to prevent oscillation and reduce power supply ripple of applications when high power supply impedance or a long power supply line.

Therefore, the recommended capacitance (refer to conditions of ELECTRIC CHARACTERISTIC) or larger input capacitor, connected between V_{IN} and GND as short path as possible, is recommended in order to avoid the problem.

*Output Capacitor C_O

The output capacitor C_O is required for a phase compensation of the internal error amplifier, and the capacitance and the equivalent series resistance (ESR) influence stable operation of the regulator.

If use a smaller output capacitor than the recommended capacitance (refer to conditions of ELECTRIC CHARACTERISTIC), it may cause excess output noise or oscillation of the regulator due to lack of the phase compensation. Therefore, the recommended capacitance or larger output capacitor, connected between V_{OUT} and GND as short path as possible, is recommended for stable operation. The recommended capacitance may be different by output voltage, therefore confirm the recommended capacitance of the required output voltage.

Furthermore, a larger output capacitor reduces output noise and ripple output, and also improves Output Transient Response when a load changes rapidly.

Selecting the output capacitor, should consider varied characteristics of a capacitor: frequency characteristics, temperature characteristics, DC bias characteristics and so on. Therefore, the capacitor that has a sufficient margin of the rated voltage against the output voltage and superior temperature characteristics, is recommended for C_O.

*Transient Response of Output Voltage

In general, the regulator tends to cause overshoot or undershoot of output voltage at the following conditions.

Particularly in products featuring low current consumption, the output voltage fluctuation may become large due to product characteristics.

- When input voltage or output current fluctuate sharply
- When output capacitance is small
- When output load is light
- When start up from the condition of narrow voltage difference between an Input and an output.

One way to improve transient response is to use a large capacity input and output capacitors to suppress to the fluctuation.

Amount of transient fluctuation will change according to multiple conditions, so please refer to the above to confirm with actual equipment.

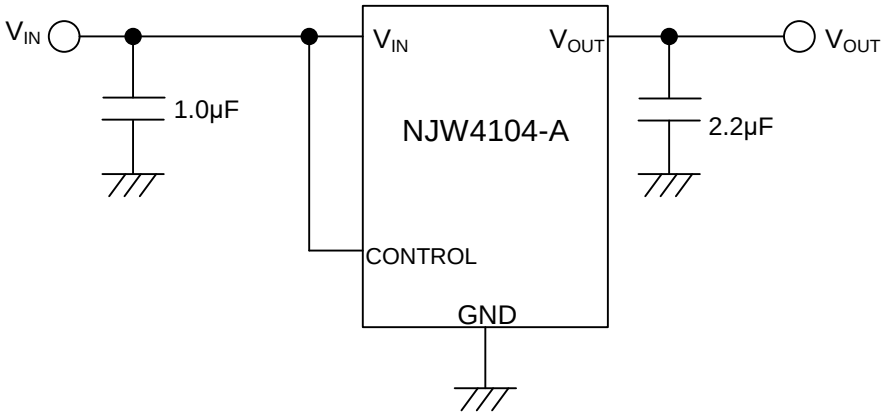
■TYPICAL APPLICATION

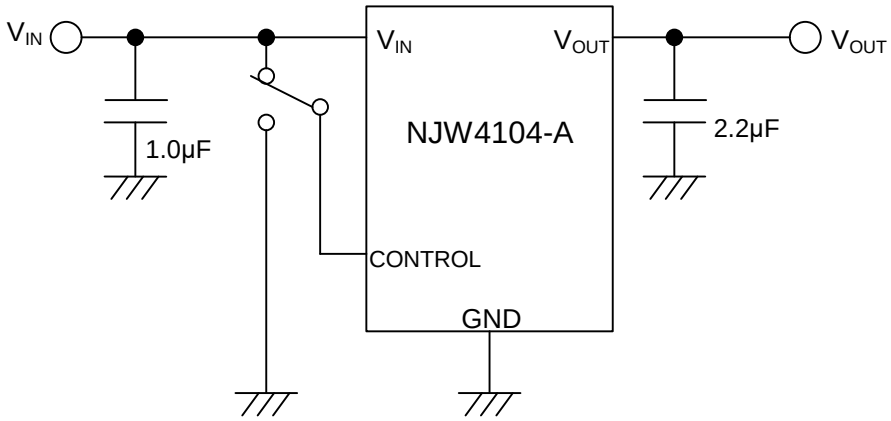
●A version

1. In the case where ON/OFF Control is not required



Connect CONTROL Pin to V_{IN} Pin

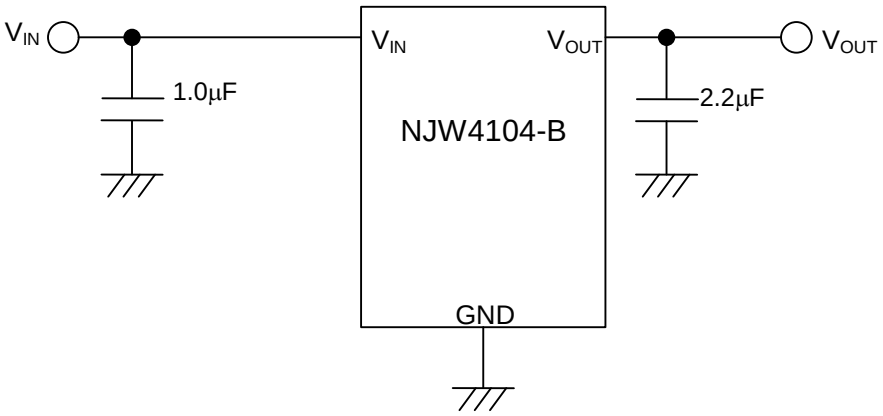
2. In use of ON/OFF CONTROL



State of CONTROL Pin:

"H" → output is enabled. "L" or "open" → output is disabled

●B version



■APPLICATION NOTE / GLOSSARY

*Under Voltage Lockout UVLO

The NJW4104 includes UVLO circuit to prevent malfunction in case of low input voltage.

When the input voltage increases and exceeds the “UVLO Release voltage” (2.8V typ.),UVLO is released and the output voltage rises up.

The UVLO circuit has hysteresis(200mV typ.). Therefore, if the input voltage decreases below the threshold voltage:“UVLO Release voltage” – “UVLO Hysteresis Voltage”, the output voltage shuts down.

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to our sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without the prior written consent of us.
3. This product and any technical information relating thereto are subject to complementary export controls (so-called KNOW controls) under the Foreign Exchange and Foreign Trade Law, and related politics ministerial ordinance of the law. (Note that the complementary export controls are inapplicable to any application-specific products, except rockets and pilotless aircraft, that are insusceptible to design or program changes.) Accordingly, when exporting or carrying abroad this product, follow the Foreign Exchange and Foreign Trade Control Law and its related regulations with respect to the complementary export controls.
4. The technical information described in this document shows typical characteristics and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under our or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for automotive applications. Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death should first contact us.
    - Aerospace Equipment
    - Equipment Used in the Deep Sea
    - Power Generator Control Equipment (nuclear, steam, hydraulic, etc.)
    - Life Maintenance Medical Equipment
    - Fire Alarms / Intruder Detectors
    - Vehicle Control Equipment (airplane, railroad, ship, etc.)
    - Various Safety Devices
    - Traffic control system
    - Combustion equipment

    In case your company desires to use this product for any applications other than general electronic equipment mentioned above, make sure to contact our company in advance. Note that the important requirements mentioned in this section are not applicable to cases where operation requirements such as application conditions are confirmed by our company in writing after consultation with your company.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, fire containment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. The products have been designed and tested to function within controlled environmental conditions. Do not use products under conditions that deviate from methods or applications specified in this datasheet. Failure to employ the products in the proper applications can lead to deterioration, destruction or failure of the products. We shall not be responsible for any bodily injury, fires or accident, property damage or any consequential damages resulting from misuse or misapplication of the products.
8. Quality Warranty
    8-1. Quality Warranty Period
    In the case of a product purchased through an authorized distributor or directly from us, the warranty period for this product shall be one (1) year after delivery to your company. For defective products that occurred during this period, we will take the quality warranty measures described in section 8-2. However, if there is an agreement on the warranty period in the basic transaction agreement, quality assurance agreement, delivery specifications, etc., it shall be followed.
    8-2. Quality Warranty Remedies
    When it has been proved defective due to manufacturing factors as a result of defect analysis by us, we will either deliver a substitute for the defective product or refund the purchase price of the defective product.
    Note that such delivery or refund is sole and exclusive remedies to your company for the defective product.
    8-3. Remedies after Quality Warranty Period
    With respect to any defect of this product found after the quality warranty period, the defect will be analyzed by us. On the basis of the defect analysis results, the scope and amounts of damage shall be determined by mutual agreement of both parties. Then we will deal with upper limit in Section 8-2. This provision is not intended to limit any legal rights of your company.
9. Anti-radiation design is not implemented in the products described in this document.
10. The X-ray exposure can influence functions and characteristics of the products. Confirm the product functions and characteristics in the evaluation stage.
11. WLCSP products should be used in light shielded environments. The light exposure can influence functions and characteristics of the products under operation or storage.
12. Warning for handling Gallium and Arsenic (GaAs) products (Applying to GaAs MMIC, Photo Reflector). These products use Gallium (Ga) and Arsenic (As) which are specified as poisonous chemicals by law. For the prevention of a hazard, do not burn, destroy, or process chemically to make them as gas or power. When the product is disposed of, please follow the related regulation and do not mix this with general industrial waste or household waste.
13. Please contact our sales representatives should you have any questions or comments concerning the products or the technical information.
