Series MR

General Specifications

Electrical Capacity (Resistive Load)

For MRA: 250mA @ 125V AC For MRF or MRK: 0.4VA maximum @ 28V AC/DC maximum (Applicable Range 0.1mA ~ 0.1A @ 20mV ~ 28V) Note: Find additional explanation of operating range in Supplement section.

Other Ratings

Contact Resistance:	e: 10 milliohms maximum for MRA; 50 milliohms maximum for MRF & MRK			
Insulation Resistance:	100 megohms minimum @ 500V DC			
Dielectric Strength:	1,000V AC minimum for 1 minute minimum for MRA			
	500V AC minimum for 1 minute minimum for MRF & MRK			
Mechanical Life:	30,000 operations minimum			
Electrical Life:	10,000 operations minimum			
Range of Operating Torque:	0.02 ~ 0.07Nm for MRA; 0.005 ~ 0.02Nm for MRF & MRK			
Contact Timing:	Nonshorting (break-before-make)			
	MRA – self-cleaning, sliding contact; MRF & MRK – self-cleaning, rotary contactor disk			
Indexing:	30°			

Materials & Finishes

Shaft: Brass with nickel plating **Stopper Plate:** Steel with zinc plating for MRA & MRK; polyamide cover with stopper for MRF **Bushing/Housing:** Zinc alloy with zinc plating Copper with silver plating for MRA; phosphor bronze with gold plating for MRF & MRK **Movable Contacts:** Brass with silver plating for MRA; phosphor bronze with gold plating for MRF & MRK End Contacts & Terminals: Brass with silver plating for MRA; phosphor bronze with gold plating for MRF & MRK **Common Contacts & Terminals:** Diallyl phthalate for MRA; fiberglass reinforced polyamide for MRF & MRK Base:

Environmental Data

Operating lemperature Range: Humidity:	-10°C through +/0°C (+14°F through +158°F) 90 ~ 95% humidity for 96 hours @ 40°C (104°F)
Vibration: Shock: Sealing:	10 ~ 55Hz with peak-to-peak amplitude of 1.5mm traversing the trequency range & returning in 1 minute; 3 right angled directions for 2 hours 50G (490m/s ²) acceleration (tested in 3 right angled directions, with 3 shocks in each direction) MRK model meets IP67 of IEC60529 standards
Installation Mounting Torque: Cap Installation Force:	.686Nm (6.08 lb•in) 19.6 ~ 29.4N (4.41 ~ 6.61 lbf) for MRA & MRK

Processing

Soldering Time & Temperature:	Wave Soldering for MRA: See Profile A in Supplement section.
	Wave Soldering for MRF & MRK: See Profile B in Supplement section.
	Manual Soldering for MRA: See Profile A in Supplement section.
	Manual Soldering for MRF & MRK: See Profile B in Supplement section.
Cleaning:	Automated cleaning recommended. Stopper plate, as well as washers for MRA & MRK, must be in place to maintain automated cleaning. See Cleaning specifications in Supplement section.

Standards & Certifications

MRA, MRF, & MRK models have not been tested for UL recognition or CSA certification. These switches are designed for use in a low-voltage, low-current, logic-level circuit. When used as intended in a logic-level circuit, the results do not produce hazardous energy.

Distinctive Characteristics

Low profile body of MRF model accommodates space limitations required for PCB mounting. For the MRA and MRK bushing mount models, the range of behind panel body depths is .323" to .669" (8.2mm to 17.0mm).

Positive detent mechanism for distinct feel and audible feedback.

Metal bushing and housing construction increases durability.

Adjustable stopper plate allows 2–12 position settings.

High contact reliability achieved by the self-cleaning contact mechanism.

Break-before-make contact timing with sliding contacts in MRA and rotary contactor disk in MRF and MRK models.

Interior housing seal and molded-in PC terminals, plus shaft rubber o-ring on MRA and MRK and polyamide cover on MRF model, allow cleaning after automated soldering.

MRK model meets IP67 of IEC60529 specifications (similar to NEMA 4 & 13).

POSITION SETTING FOR MRA, MRF, & MRK MODELS

Each switch is supplied with the stopper set for the maximum number of positions allowed for that model. Prior to installation, the desired position setting should be made. Contact factory for continuous rotation.

MRF Models

- 1. Remove the protective cover from the switch body.
- 2. Turn the shaft counterclockwise to the extreme left by using a screwdriver.
- Inside the cover is a magnifying lens which would be positioned over the number which is to be the maximum position used; when the cover is then snapped into the switch, the projection beside the lens fits into the correct hole for setting the stop.

Series MR

MRK & MRA Models

- Using the actuator knob, turn the shaft counterclockwise to the extreme left. If the shaft is not turned counterclockwise to the extreme left, proper setting cannot be achieved. At this extreme position, the white line on the knob points to the number 1 position shown on the side of the switch.
- Remove the knob from the shaft and loosen the nut far enough to allow raising the stopper plate, plus washer(s), for resetting to the desired position.
- 3. Note the position numbers on the side of the switch; these correspond to the terminal numbers and stopper holes. Insert the stopper in the hole numbered for the maximum desired number of stop settings. Satisfactory switch functioning cannot be assured if the stopper plate is not properly positioned.
- 4. Tighten the nut (beveled side up) firmly against the stopper plate.
