NTE2913 MOSFET N-Ch, Enhancement Mode High Speed Switch TO247 Type Package

Features:

- Advanced Process Technology
- Ultra Low On-Resistance
- Dynamic dv/dt Rating
- +175°C Operating Temperature
- Fast Switching
- Fully Avalanche Rated

Description:

The NTE2913 Power MOSFET utilizes advanced processing techniques to achieve extremely low on-resistance per silicon area. This benefit, combined with the fast switching speed and ruggedized device design provides the designer with an extremely efficient and reliable device for use in a wide variety of applications.

The TO247 package is preferred for commercial-industrial applications where higher power levels preclude the use of TO220 devices. The TO247 is similar, but superior, to the TO218 package because of its isolated mounting hole.
